Place: NRCWEB

Please repost NUREG-0492, "Fault Tree Handbook " to the NRC public web site.

This document has been reviewed based on Commission guidance (dated January 25, 2002) to the staff for developing final criteria for release of information to the public. Based on the sensitivity review, it has been determined that NUREG-0492 does not contain information that could provide a clear and significant benefit to a terrorist in a potential attack. The result of the review (attached) has been approved by Scott Newberry (D:DRAA), the cognizant RES Division Director.

Thanks,
Gil Millman

Mark I think this is in your branch area. Personally I don't think we need to restrict distribution.
