Place: NRCWEB

Please post the following two draft RGs to the NRC public web site:

- 1) DG-1114, "Control Room Habitability at Light-Water Nuclear Power Reactors"**
- 2) DG-1115, "Demonstrating Control Room Envelope Integrity at Nuclear Power Reactors"**

These regulatory guides have been reviewed based on information in COMSECY-01-0030 (January 25, 2002) which provides the latest Commission guidance to the staff on development of criteria for release of information to the public. Based on these sensitivity reviews, it has been determined that the contents of draft regulatory guides DG-1114 and DG-1115 do not contain information that could provide a clear and significant benefit to a terrorist in a potential attack. The reviews were performed by the NRR Document Review Team. The attachment documents the result of the reviews.

Thanks,
Gil Millman

The criteria we used to review the documents for sensitivity is the draft commission criteria for withholding of sensitive homeland security information from the public.
