Subject: Approval to Post NUREG-1725 and NUREG/CR-6695
Place: NRCWEB

Please post the following NUREG and NURE/CR documents to the NRC public web site:

1) NUREG-1725, "Human Interaction with Reused Soil: An Information Search"

2) NUREG/CR-6695, "Hydrologic Uncertainty Assessment for Decommissioning Sites: Hypothetical Test Case Applications"

These NUREG and NUREG/CR documents have been reviewed based on information in COMSECY-01-0030 (January 25, 2002) which provides the latest Commission guidance to the staff on development of criteria for release of information to the public. Based on these sensitivity reviews, it has been determined that the contents of NUREG-1725 and NUREG/CR-6695 do not contain information that could provide a clear and significant benefit to a terrorist in a potential attack. The result of the reviews (attached) has been approved by Farouk Eltawila (D:DSARE), the cognizant RES Division Director. An electronic file for each report is contained in the respective attached e-mail chain.

Thanks,
Gil Millman

Subject: New Posting of NUREG-1725

Cheryl:

(Using the "boiler plate" narrative from Cheryl Burrows) I am requesting that NUREG-1725 (NAL report) "Human Interaction with Reused Soil: An Information Search" be posted on the NRC public Web site. The report was issued in January 2002. Attached is a pdf file.

As the project manager for the subject report, I have reviewed NUREG-1725 based on Commission guidance (dated January 25, 2002) to the staff for release of information to the public. Considering the Commission guidance, the content of NUREG-1725 contains no information that could provide a clear and significant benefit to a terrorist in a potential attack.

Thanks.....Tom
