Subject: Re: REVIEW OF BASIC REFERENCES

Based on a review using the draft criteria, I'm recommending reposting the following documents:

NUREG/BR-0125, Rev. 1: Public Involvement in the Nuclear Regulatory Process

NUREG/BR-0240, Rev. 1: Reporting Safety Concerns to the NRC

NUREG/BR-0164, Rev. 4: NRC Regulatory of Nuclear Safety

(This last document shows a cutaway of a generic PWR containment identifying it as being approximately 3-5 feet thick. This information is in one of NRC's recent press releases and is therefore in the public domain. Also, the information doesn't identify a specific thickness or a specific facility.)

I need Susan Frant or her designee to make a judgment on some of the information in NUREG: /BR-0256 where it talks about risks at various NMSS facilities as well as the number of spent fuel casks at independent spent fuel storage installations (pp.33-40. Otherwise the remainder of the document looks OK.

As the remaining documents are reviewed by OPA staff, I will forward our recommendation for each to you.

Beth:

As you know, we will be posting some material in the Electronic Room. Please review the OPA brochures listed at

<http://nrcweb.nrc.gov:303/reading-rm/basic-ref.html>

for posting to Release 1 of Web Lite

If you are comfortable making a judgement call on the basis of the EDO's draft criteria.

OPA brochures include first 2 under How You Can Become Involved; all except the 2nd under Gen. Info.; and the three under Reg. Programs.

Subject: Brochures to be Reposted to the Web

Listed below are those brochures OPA has reviewed against the draft criteria Mindy provided and recommend they be reposted to the web:

NUREG/BR-0282, Rev. 1: Nuclear Research Programs to Ensure Public Health and Safety

NUREG/BR-0099, Rev. 10: NRC Fact Sheet

NUREG-1649, Rev. 3: Reactor Oversight Process

Only one of the brochures you asked us to review remains to be reviewed.
