Ms. Kelley Boyle
Office of the Inspector General
U.S. Department of Energy
Mailstop 574
P.O. Box 98518
Las Vegas, Nevada 89193-8418

SUBJECT: REQUEST FOR MATERIALS RELATED TO DEVELOPMENT OF
ALTERNATIVE TECHNICAL SOLUTIONS FOR IMPLEMENTATION OF THE
LICENSING SUPPORT NETWORK

Reference: Phonecon Boyle to Graser, dated September 29, 2003

Dear Ms. Boyle:

As requested during your September 29, 2003 phone call to me, I am forwarding materials related to the process used by the Licensing Support Network Advisory Review Panel (LSNARP) in arriving at a recommendation on alternatives that should be considered by the Nuclear Regulatory Commission (NRC) for implementing the Licensing Support Network (LSN).

To assist you in your review, I have developed a matrix covering information included in this transmittal (Enclosure 1). Some documentation is already readily available via the NRC's publicly accessible ADAMS system at <http://www.nrc.gov/reading-rm/adams/web-based.html>. Items that you can access directly have the ADAMS accession number indicated on the matrix, and no print copies of those items are included in my transmittal.

For your convenience, I have included a convenient listing on the matrix of all the Department of Energy recipients of those communications.

Sincerely,

/RA/

Daniel J. Graser
Licensing Support Network Administrator

Enclosures:

1. Chronology/Documentation Matrix of LSN Design Decision
2. Transmittal of 10/1/1999 - Announcement of Planned TWG Meetings
3. Transmittal of 10/28/1999 - Draft TWG Meeting Minutes Circulated for Review
4. Transmittal of 11/5/1999 - TWG Meeting Minutes to LSNARP
