Subject: Oyster Creek - Draft RAI for Discussion (**TAC MB8481**)

Pareez:

This is regarding AmerGen's application for amendment dated 4/21/03, as supplemented on 9/11/03, regarding DC power source requirements based on TSTF-360. Our review is ongoing and we believe more information is needed to completed our review. Accordingly, we are providing the following draft questions for discussion in a phone call:

- (1) Provide the basis, including results of analysis demonstrating the need and justification for, the proposed 7-day allowed outage time for an inoperable battery charger.
- (2) Describe and justify the extent to which risk has (or has not) been considered as part of the basis and analysis justifying the proposed 7-day allowed outage time for an inoperable battery charger.
- (3) Identify and justify compensatory measures that will be implemented during the proposed 7-day allowed outage time for an inoperable battery charger.

This e-mail aims solely to prepare you and others for a telephone discussion. **This e-mail does not formally request for information, nor does it convey a formal NRC staff position.**
