 2. Letter from OPPD (D. J. Bannister) to NRC (Document Control Desk) dated January 27, 2003, "Fort Calhoun Station Unit No. 1 License Amendment Request, Removal of Allowance to Perform Recirculation Actuation Logic Channel Functional Test," (LIC-02-0124)

**SUBJECT: Completion of Recirculation Actuation Logic Channel Functional Test
Circuitry Modification**

In Reference 2, the Omaha Public Power District committed to install a modification to the recirculation actuation logic channel functional test circuitry to eliminate the need to rely on administrative controls while performing the quarterly channel functional test. The purpose of this letter is to inform the NRC that this action was completed on October 6, 2003 when Modification EC-29667 was accepted for operability.

Modification EC-29667 installed two test switches that allow the tested equipment to remain operable while the quarterly recirculation actuation logic channel functional test is performed.

No commitments are made to the NRC in this letter. If you have additional questions, or require further information, please contact Dr. R. L. Jaworski at (402) 533-6833.

Sincerely,

Ross T. Ridenoure
Division Manager - Nuclear Operations
