Subject: License Renewal comment

I am writing in regard to the proposed renewal of the operating license for the Ginna nuclear power plant.

As a resident of the village of Webster, I am within the 10-mile radius covered by the emergency planning zone, and so have a vested interest in the security and safety of the plant.

I am not opposed to the renewal of the plant's license. However, I am very concerned by the plan to sell a large part of the land surrounding the plant to be converted from agricultural use to a residential development.

I believe that the presence of a development in such proximity to the plant will increase the risk of an attack on the plant, increase the number of people at risk from an incident at the plant, and increase the cost of trying to maintain security there. There is no reason to incur all of these costs to benefit a developer.

The Rochester metropolitan area has almost no population growth, and there is a large stock of housing already available in the area. There is no pressure to build still more developments in the area. I request that the license board require that, as a condition of renewing the Ginna license, there should be no additional development of the surrounding land.

Sincerely,
Mike Seager
