(ATMTC)

\* ASP methodology - used to assess the HEPs  
- HEPs assessed. (HIGH-STRESS environment)  
(Complexity) (Procedures, etc)

NRC's evaluation  
(explained by See King)

- Pat Gwynn - emphasized the importance re: fire event. (cited Browns F&W  
Waterford (Energy plant).

→ NRC - maintains that procedures = inadequate, not robust enough  
- because maintains that procedures have been untested, simulator-  
tested, etc. - new procedures are in place - improved beyond  
what NRC evaluated??
