

November 28, 2003

Mr. R. Duff Green
Orange County Emergency Manager
P.O. Box 111
Orange, Virginia 22960

Dear Mr. Green:

The purpose of this letter is to inform you, as a public official who may have an interest in activities related to the North Anna Power Station, that the U.S. Nuclear Regulatory Commission (NRC) has received an application dated September 25, 2003, from Dominion Nuclear North Anna, LLC (Dominion NNA) for an early site permit (ESP). We have docketed this application (Docket No. 52-008) and would like to acquaint you with the major steps that lie ahead as the staff reviews it. The application is for a site, identified by Dominion NNA as the "North Anna ESP site," adjacent to the existing nuclear power plant units already operating on the North Anna site.

The NRC plans to hold an open house and public meeting on the scope of the environmental review associated with the application. The open house and public meeting will be held at the Louisa County Middle School on Monday, December 8, 2003. The open house will begin at 6:00 pm, to be followed by the public meeting at 7:00 pm.

Under the NRC's regulations in Part 52 of Title 10 of the *Code of Federal Regulations*, "Early Site Permits; Standard Design Certifications; and Combined Licenses for Nuclear Power Plants," the NRC can issue an ESP for approval of one or more sites for possible future construction of a nuclear power plant or plants. The term of an ESP may be up to 20 years. The ESP process can lead to resolution of site-related issues without the need for the applicant to expend substantial resources as would be necessary to seek a license to actually construct a nuclear power plant or plants. The NRC's review of an ESP addresses site safety issues, environmental protection issues, and plans for coping with emergencies, independent of the review of a specific nuclear plant design. Should an ESP be issued for the North Anna ESP site, it would resolve a certain set of those issues, independent of the review of a specific nuclear plant design. Dominion NNA could reference the ESP in seeking a license to construct or operate a nuclear power plant or plants on the site. We emphasize that an ESP, standing alone, does not authorize construction or operation of a nuclear power plant.

The NRC staff has begun a detailed technical review of the application, which will lead to the development of the NRC's safety evaluation report (SER). The SER will document the staff's review of whether Dominion NNA's proposed site is acceptable to host a nuclear power plant or plants. In addition, the NRC will develop an environmental impact statement (EIS) that will document the NRC staff's review of the application for environmental impacts associated with construction and operation of a nuclear power plant or plants at the site. At the December 8, 2003 meeting, interested persons will have the opportunity to comment on the scope of the issues to be considered in the staff's environmental impact statement. The public

will also have the opportunity to review and comment on the draft EIS after it is prepared in 2004.

In the near future, the NRC will also issue a *Federal Register* Notice and press release to announce the opportunity for persons whose interests may be affected to petition for leave to intervene in a hearing to be held after the completion of the staff's SER and EIS. After the *Federal Register* Notice is published, affected persons who wish to intervene will have 30 days in which to file such a petition in accordance with 10 CFR 2.714 as discussed in detail in the *Federal Register* Notice. An Atomic Safety and Licensing Board will be designated to preside over the hearing, consider evidence presented, and make findings on whether to issue an ESP to Dominion NNA. If the Board's findings support issuance of an ESP, they will also determine what conditions or limitations, if any, should be placed on it. The Commission will consider the staff recommendations and Board's findings in making its decision whether an ESP is to be issued. The NRC staff expects the process to take approximately 33 months from receipt of the application to the final Commission decision.

We hope you have found this letter to be informative. If you have any questions regarding this process, please contact Mike Scott, the Safety Project Manager for the North Anna ESP application, by e-mail at mls3@nrc.gov or by telephone at 301-415-1421. If you have questions regarding the environmental review, please contact Andy Kugler, the Environmental Project Manager for the North Anna ESP review, by e-mail at ajk1@nrc.gov or by telephone at 301-415-2828.

Sincerely,

/RA/

Mr. Ed Kube
Orange County Administrator
P.O. Box 111
Orange, VA 22960

Dear Mr. Kube:

The purpose of this letter is to inform you, as a public official who may have an interest in activities related to the North Anna Power Station, that the U.S. Nuclear Regulatory Commission (NRC) has received an application dated September 25, 2003, from Dominion Nuclear North Anna, LLC (Dominion NNA) for an early site permit (ESP). We have docketed this application (Docket No. 52-008) and would like to acquaint you with the major steps that lie ahead as the staff reviews it. The application is for a site, identified by Dominion NNA as the "North Anna ESP site," adjacent to the existing nuclear power plant units already operating on the North Anna site.

The NRC plans to hold an open house and public meeting on the scope of the environmental review associated with the application. The open house and public meeting will be held at the Louisa County Middle School on Monday, December 8, 2003. The open house will begin at 6:00 pm, to be followed by the public meeting at 7:00 pm.

Under the NRC's regulations in Part 52 of Title 10 of the *Code of Federal Regulations*, "Early Site Permits; Standard Design Certifications; and Combined Licenses for Nuclear Power Plants," the NRC can issue an ESP for approval of one or more sites for possible future construction of a nuclear power plant or plants. The term of an ESP may be up to 20 years. The ESP process can lead to resolution of site-related issues without the need for the applicant to expend substantial resources as would be necessary to seek a license to actually construct a nuclear power plant or plants. The NRC's review of an ESP addresses site safety issues, environmental protection issues, and plans for coping with emergencies, independent of the review of a specific nuclear plant design. Should an ESP be issued for the North Anna ESP site, it would resolve a certain set of those issues, independent of the review of a specific nuclear plant design. Dominion NNA could reference the ESP in seeking a license to construct or operate a nuclear power plant or plants on the site. We emphasize that an ESP, standing alone, does not authorize construction or operation of a nuclear power plant.

The NRC staff has begun a detailed technical review of the application, which will lead to the development of the NRC's safety evaluation report (SER). The SER will document the staff's review of whether Dominion NNA's proposed site is acceptable to host a nuclear power plant or plants. In addition, the NRC will develop an environmental impact statement (EIS) that will document the NRC staff's review of the application for environmental impacts associated with construction and operation of a nuclear power plant or plants at the site. At the December 8, 2003 meeting, interested persons will have the opportunity to comment on the scope of the issues to be considered in the staff's environmental impact statement. The public

will also have the opportunity to review and comment on the draft EIS after it is prepared in 2004.

In the near future, the NRC will also issue a *Federal Register* Notice and press release to announce the opportunity for persons whose interests may be affected to petition for leave to intervene in a hearing to be held after the completion of the staff's SER and EIS. After the *Federal Register* Notice is published, affected persons who wish to intervene will have 30 days in which to file such a petition in accordance with 10 CFR 2.714 as discussed in detail in the *Federal Register* Notice. An Atomic Safety and Licensing Board will be designated to preside over the hearing, consider evidence presented, and make findings on whether to issue an ESP to Dominion NNA. If the Board's findings support issuance of an ESP, they will also determine what conditions or limitations, if any, should be placed on it. The Commission will consider the staff recommendations and Board's findings in making its decision whether an ESP is to be issued. The NRC staff expects the process to take approximately 33 months from receipt of the application to the final Commission decision.

We hope you have found this letter to be informative. If you have any questions regarding this process, please contact Mike Scott, the Safety Project Manager for the North Anna ESP application, by e-mail at mls3@nrc.gov or by telephone at 301-415-1421. If you have questions regarding the environmental review, please contact Andy Kugler, the Environmental Project Manager for the North Anna ESP review, by e-mail at ajk1@nrc.gov or by telephone at 301-415-2828.

Sincerely,

/RA/

Docket No. 52-008

November 28, 2003

Mr. Ashland Fortune
Sheriff, Louisa County
P.O. Box 504
Louisa, Virginia 23093

Dear Sheriff Fortune:

The purpose of this letter is to inform you, as a public official who may have an interest in activities related to the North Anna Power Station, that the U.S. Nuclear Regulatory Commission (NRC) has received an application dated September 25, 2003, from Dominion Nuclear North Anna, LLC (Dominion NNA) for an early site permit (ESP). We have docketed this application (Docket No. 52-008) and would like to acquaint you with the major steps that lie ahead as the staff reviews it. The application is for a site, identified by Dominion NNA as the "North Anna ESP site," adjacent to the existing nuclear power plant units already operating on the North Anna site.

The NRC plans to hold an open house and public meeting on the scope of the environmental review associated with the application. The open house and public meeting will be held at the Louisa County Middle School on Monday, December 8, 2003. The open house will begin at 6:00 pm, to be followed by the public meeting at 7:00 pm.

Under the NRC's regulations in Part 52 of Title 10 of the *Code of Federal Regulations*, "Early Site Permits; Standard Design Certifications; and Combined Licenses for Nuclear Power Plants," the NRC can issue an ESP for approval of one or more sites for possible future construction of a nuclear power plant or plants. The term of an ESP may be up to 20 years. The ESP process can lead to resolution of site-related issues without the need for the applicant to expend substantial resources as would be necessary to seek a license to actually construct a nuclear power plant or plants. The NRC's review of an ESP addresses site safety issues, environmental protection issues, and plans for coping with emergencies, independent of the review of a specific nuclear plant design. Should an ESP be issued for the North Anna ESP site, it would resolve a certain set of those issues, independent of the review of a specific nuclear plant design. Dominion NNA could reference the ESP in seeking a license to construct or operate a nuclear power plant or plants on the site. We emphasize that an ESP, standing alone, does not authorize construction or operation of a nuclear power plant.

The NRC staff has begun a detailed technical review of the application, which will lead to the development of the NRC's safety evaluation report (SER). The SER will document the staff's review of whether Dominion NNA's proposed site is acceptable to host a nuclear power plant or plants. In addition, the NRC will develop an environmental impact statement (EIS) that will document the NRC staff's review of the application for environmental impacts associated with construction and operation of a nuclear power plant or plants at the site. At the December 8, 2003 meeting, interested persons will have the opportunity to comment on the scope of the issues to be considered in the staff's environmental impact statement. The public

will also have the opportunity to review and comment on the draft EIS after it is prepared in 2004.

In the near future, the NRC will also issue a *Federal Register* Notice and press release to announce the opportunity for persons whose interests may be affected to petition for leave to intervene in a hearing to be held after the completion of the staff's SER and EIS. After the *Federal Register* Notice is published, affected persons who wish to intervene will have 30 days in which to file such a petition in accordance with 10 CFR 2.714 as discussed in detail in the *Federal Register* Notice. An Atomic Safety and Licensing Board will be designated to preside over the hearing, consider evidence presented, and make findings on whether to issue an ESP to Dominion NNA. If the Board's findings support issuance of an ESP, they will also determine what conditions or limitations, if any, should be placed on it. The Commission will consider the staff recommendations and Board's findings in making its decision whether an ESP is to be issued. The NRC staff expects the process to take approximately 33 months from receipt of the application to the final Commission decision.

We hope you have found this letter to be informative. If you have any questions regarding this process, please contact Mike Scott, the Safety Project Manager for the North Anna ESP application, by e-mail at mls3@nrc.gov or by telephone at 301-415-1421. If you have questions regarding the environmental review, please contact Andy Kugler, the Environmental Project Manager for the North Anna ESP review, by e-mail at ajk1@nrc.gov or by telephone at 301-415-2828.

Office of Nuclear Reactor Regulation

November 28, 2003

Charles Rosson, Mayor
Town of Louisa
P.O. Box 531
Louisa, Virginia 23093

Dear Mayor Rosson:

The purpose of this letter is to inform you, as a public official who may have an interest in activities related to the North Anna Power Station, that the U.S. Nuclear Regulatory Commission (NRC) has received an application dated September 25, 2003, from Dominion Nuclear North Anna, LLC (Dominion NNA) for an early site permit (ESP). We have docketed this application (Docket No. 52-008) and would like to acquaint you with the major steps that lie ahead as the staff reviews it. The application is for a site, identified by Dominion NNA as the "North Anna ESP site," adjacent to the existing nuclear power plant units already operating on the North Anna site.

The NRC plans to hold an open house and public meeting on the scope of the environmental review associated with the application. The open house and public meeting will be held at the Louisa County Middle School on Monday, December 8, 2003. The open house will begin at 6:00 pm, to be followed by the public meeting at 7:00 pm.

Under the NRC's regulations in Part 52 of Title 10 of the *Code of Federal Regulations*, "Early Site Permits; Standard Design Certifications; and Combined Licenses for Nuclear Power Plants," the NRC can issue an ESP for approval of one or more sites for possible future construction of a nuclear power plant or plants. The term of an ESP may be up to 20 years. The ESP process can lead to resolution of site-related issues without the need for the applicant to expend substantial resources as would be necessary to seek a license to actually construct a nuclear power plant or plants. The NRC's review of an ESP addresses site safety issues, environmental protection issues, and plans for coping with emergencies, independent of the review of a specific nuclear plant design. Should an ESP be issued for the North Anna ESP site, it would resolve a certain set of those issues, independent of the review of a specific nuclear plant design. Dominion NNA could reference the ESP in seeking a license to construct or operate a nuclear power plant or plants on the site. We emphasize that an ESP, standing alone, does not authorize construction or operation of a nuclear power plant.

The NRC staff has begun a detailed technical review of the application, which will lead to the development of the NRC's safety evaluation report (SER). The SER will document the staff's review of whether Dominion NNA's proposed site is acceptable to host a nuclear power plant or plants. In addition, the NRC will develop an environmental impact statement (EIS) that will document the NRC staff's review of the application for environmental impacts associated with construction and operation of a nuclear power plant or plants at the site. At the December 8, 2003 meeting, interested persons will have the opportunity to comment on the scope of the issues to be considered in the staff's environmental impact statement. The public

will also have the opportunity to review and comment on the draft EIS after it is prepared in 2004.

In the near future, the NRC will also issue a *Federal Register* Notice and press release to announce the opportunity for persons whose interests may be affected to petition for leave to intervene in a hearing to be held after the completion of the staff's SER and EIS. After the *Federal Register* Notice is published, affected persons who wish to intervene will have 30 days in which to file such a petition in accordance with 10 CFR 2.714 as discussed in detail in the *Federal Register* Notice. An Atomic Safety and Licensing Board will be designated to preside over the hearing, consider evidence presented, and make findings on whether to issue an ESP to Dominion NNA. If the Board's findings support issuance of an ESP, they will also determine what conditions or limitations, if any, should be placed on it. The Commission will consider the staff recommendations and Board's findings in making its decision whether an ESP is to be issued. The NRC staff expects the process to take approximately 33 months from receipt of the application to the final Commission decision.

We hope you have found this letter to be informative. If you have any questions regarding this process, please contact Mike Scott, the Safety Project Manager for the North Anna ESP application, by e-mail at mls3@nrc.gov or by telephone at 301-415-1421. If you have questions regarding the environmental review, please contact Andy Kugler, the Environmental Project Manager for the North Anna ESP review, by e-mail at ajk1@nrc.gov or by telephone at 301-415-2828.

Docket No. 52-008

November 28, 2003

Mr. Willie Harper
Chairman of the Board
County of Louisa
P.O. Box 928
Mineral, VA 23117

Dear Mr. Chairman:

The purpose of this letter is to inform you, as a public official who may have an interest in activities related to the North Anna Power Station, that the U.S. Nuclear Regulatory Commission (NRC) has received an application dated September 25, 2003, from Dominion Nuclear North Anna, LLC (Dominion NNA) for an early site permit (ESP). We have docketed this application (Docket No. 52-008) and would like to acquaint you with the major steps that lie ahead as the staff reviews it. The application is for a site, identified by Dominion NNA as the "North Anna ESP site," adjacent to the existing nuclear power plant units already operating on the North Anna site.

The NRC plans to hold an open house and public meeting on the scope of the environmental review associated with the application. The open house and public meeting will be held at the Louisa County Middle School on Monday, December 8, 2003. The open house will begin at 6:00 pm, to be followed by the public meeting at 7:00 pm.

Under the NRC's regulations in Part 52 of Title 10 of the *Code of Federal Regulations*, "Early Site Permits; Standard Design Certifications; and Combined Licenses for Nuclear Power Plants," the NRC can issue an ESP for approval of one or more sites for possible future construction of a nuclear power plant or plants. The term of an ESP may be up to 20 years. The ESP process can lead to resolution of site-related issues without the need for the applicant to expend substantial resources as would be necessary to seek a license to actually construct a nuclear power plant or plants. The NRC's review of an ESP addresses site safety issues, environmental protection issues, and plans for coping with emergencies, independent of the review of a specific nuclear plant design. Should an ESP be issued for the North Anna ESP site, it would resolve a certain set of those issues, independent of the review of a specific nuclear plant design. Dominion NNA could reference the ESP in seeking a license to construct or operate a nuclear power plant or plants on the site. We emphasize that an ESP, standing alone, does not authorize construction or operation of a nuclear power plant.

The NRC staff has begun a detailed technical review of the application, which will lead to the development of the NRC's safety evaluation report (SER). The SER will document the staff's review of whether Dominion NNA's proposed site is acceptable to host a nuclear power plant or plants. In addition, the NRC will develop an environmental impact statement (EIS) that will document the NRC staff's review of the application for environmental impacts associated with construction and operation of a nuclear power plant or plants at the site. At the December 8, 2003 meeting, interested persons will have the opportunity to comment on the scope of the issues to be considered in the staff's environmental impact statement. The public

will also have the opportunity to review and comment on the draft EIS after it is prepared in 2004.

In the near future, the NRC will also issue a *Federal Register* Notice and press release to announce the opportunity for persons whose interests may be affected to petition for leave to intervene in a hearing to be held after the completion of the staff's SER and EIS. After the *Federal Register* Notice is published, affected persons who wish to intervene will have 30 days in which to file such a petition in accordance with 10 CFR 2.714 as discussed in detail in the *Federal Register* Notice. An Atomic Safety and Licensing Board will be designated to preside over the hearing, consider evidence presented, and make findings on whether to issue an ESP to Dominion NNA. If the Board's findings support issuance of an ESP, they will also determine what conditions or limitations, if any, should be placed on it. The Commission will consider the staff recommendations and Board's findings in making its decision whether an ESP is to be issued. The NRC staff expects the process to take approximately 33 months from receipt of the application to the final Commission decision.

We hope you have found this letter to be informative. If you have any questions regarding this process, please contact Mike Scott, the Safety Project Manager for the North Anna ESP application, by e-mail at mls3@nrc.gov or by telephone at 301-415-1421. If you have questions regarding the environmental review, please contact Andy Kugler, the Environmental Project Manager for the North Anna ESP review, by e-mail at ajk1@nrc.gov or by telephone at 301-415-2828.

Sincerely,

/RA/

James E. Lyons, Program Director
New, Research and Test Reactors Program
Division of Regulatory Improvement Programs
Office of Nuclear Reactor Regulation

November 28, 2003

Dr. Ethel Eaton, Manager
Office of Review and Compliance
Virginia Department of Historic Resources
2801 Kensington Avenue
Richmond, VA 23221

Dear Dr. Eaton:

The purpose of this letter is to inform you, as a public official who may have an interest in activities related to the North Anna Power Station, that the U.S. Nuclear Regulatory Commission (NRC) has received an application dated September 25, 2003, from Dominion Nuclear North Anna, LLC (Dominion NNA) for an early site permit (ESP). We have docketed this application (Docket No. 52-008) and would like to acquaint you with the major steps that lie ahead as the staff reviews it. The application is for a site, identified by Dominion NNA as the "North Anna ESP site," adjacent to the existing nuclear power plant units already operating on the North Anna site.

The NRC plans to hold an open house and public meeting on the scope of the environmental review associated with the application. The open house and public meeting will be held at the Louisa County Middle School on Monday, December 8, 2003. The open house will begin at 6:00 pm, to be followed by the public meeting at 7:00 pm.

Under the NRC's regulations in Part 52 of Title 10 of the *Code of Federal Regulations*, "Early Site Permits; Standard Design Certifications; and Combined Licenses for Nuclear Power Plants," the NRC can issue an ESP for approval of one or more sites for possible future construction of a nuclear power plant or plants. The term of an ESP may be up to 20 years. The ESP process can lead to resolution of site-related issues without the need for the applicant to expend substantial resources as would be necessary to seek a license to actually construct a nuclear power plant or plants. The NRC's review of an ESP addresses site safety issues, environmental protection issues, and plans for coping with emergencies, independent of the review of a specific nuclear plant design. Should an ESP be issued for the North Anna ESP site, it would resolve a certain set of those issues, independent of the review of a specific nuclear plant design. Dominion NNA could reference the ESP in seeking a license to construct or operate a nuclear power plant or plants on the site. We emphasize that an ESP, standing alone, does not authorize construction or operation of a nuclear power plant.

The NRC staff has begun a detailed technical review of the application, which will lead to the development of the NRC's safety evaluation report (SER). The SER will document the staff's review of whether Dominion NNA's proposed site is acceptable to host a nuclear power plant or plants. In addition, the NRC will develop an environmental impact statement (EIS) that will document the NRC staff's review of the application for environmental impacts associated with construction and operation of a nuclear power plant or plants at the site. At the December 8, 2003 meeting, interested persons will have the opportunity to comment on the scope of the issues to be considered in the staff's environmental impact statement. The public

will also have the opportunity to review and comment on the draft EIS after it is prepared in 2004.

In the near future, the NRC will also issue a *Federal Register* Notice and press release to announce the opportunity for persons whose interests may be affected to petition for leave to intervene in a hearing to be held after the completion of the staff's SER and EIS. After the *Federal Register* Notice is published, affected persons who wish to intervene will have 30 days in which to file such a petition in accordance with 10 CFR 2.714 as discussed in detail in the *Federal Register* Notice. An Atomic Safety and Licensing Board will be designated to preside over the hearing, consider evidence presented, and make findings on whether to issue an ESP to Dominion NNA. If the Board's findings support issuance of an ESP, they will also determine what conditions or limitations, if any, should be placed on it. The Commission will consider the staff recommendations and Board's findings in making its decision whether an ESP is to be issued. The NRC staff expects the process to take approximately 33 months from receipt of the application to the final Commission decision.

We hope you have found this letter to be informative. If you have any questions regarding this process, please contact Mike Scott, the Safety Project Manager for the North Anna ESP application, by e-mail at mls3@nrc.gov or by telephone at 301-415-1421. If you have questions regarding the environmental review, please contact Andy Kugler, the Environmental Project Manager for the North Anna ESP review, by e-mail at ajk1@nrc.gov or by telephone at 301-415-2828.

Sincerely,

/RA/

James E. Lyons, Program Director
New, Research and Test Reactors Program
Division of Regulatory Improvement Programs
Office of Nuclear Reactor Regulation

November 28, 2003

Mr. Jackson Wright
Louisa County Board of Supervisors
217 West Chapel Drive
Bumpass, Virginia 23024

Dear Mr. Wright:

The purpose of this letter is to inform you, as a public official who may have an interest in activities related to the North Anna Power Station, that the U.S. Nuclear Regulatory Commission (NRC) has received an application dated September 25, 2003, from Dominion Nuclear North Anna, LLC (Dominion NNA) for an early site permit (ESP). We have docketed this application (Docket No. 52-008) and would like to acquaint you with the major steps that lie ahead as the staff reviews it. The application is for a site, identified by Dominion NNA as the "North Anna ESP site," adjacent to the existing nuclear power plant units already operating on the North Anna site.

The NRC plans to hold an open house and public meeting on the scope of the environmental review associated with the application. The open house and public meeting will be held at the Louisa County Middle School on Monday, December 8, 2003. The open house will begin at 6:00 pm, to be followed by the public meeting at 7:00 pm.

Under the NRC's regulations in Part 52 of Title 10 of the *Code of Federal Regulations*, "Early Site Permits; Standard Design Certifications; and Combined Licenses for Nuclear Power Plants," the NRC can issue an ESP for approval of one or more sites for possible future construction of a nuclear power plant or plants. The term of an ESP may be up to 20 years. The ESP process can lead to resolution of site-related issues without the need for the applicant to expend substantial resources as would be necessary to seek a license to actually construct a nuclear power plant or plants. The NRC's review of an ESP addresses site safety issues, environmental protection issues, and plans for coping with emergencies, independent of the review of a specific nuclear plant design. Should an ESP be issued for the North Anna ESP site, it would resolve a certain set of those issues, independent of the review of a specific nuclear plant design. Dominion NNA could reference the ESP in seeking a license to construct or operate a nuclear power plant or plants on the site. We emphasize that an ESP, standing alone, does not authorize construction or operation of a nuclear power plant.

The NRC staff has begun a detailed technical review of the application, which will lead to the development of the NRC's safety evaluation report (SER). The SER will document the staff's review of whether Dominion NNA's proposed site is acceptable to host a nuclear power plant or plants. In addition, the NRC will develop an environmental impact statement (EIS) that will document the NRC staff's review of the application for environmental impacts associated with construction and operation of a nuclear power plant or plants at the site. At the December 8, 2003 meeting, interested persons will have the opportunity to comment on the scope of the issues to be considered in the staff's environmental impact statement. The public

will also have the opportunity to review and comment on the draft EIS after it is prepared in 2004.

In the near future, the NRC will also issue a *Federal Register* Notice and press release to announce the opportunity for persons whose interests may be affected to petition for leave to intervene in a hearing to be held after the completion of the staff's SER and EIS. After the *Federal Register* Notice is published, affected persons who wish to intervene will have 30 days in which to file such a petition in accordance with 10 CFR 2.714 as discussed in detail in the *Federal Register* Notice. An Atomic Safety and Licensing Board will be designated to preside over the hearing, consider evidence presented, and make findings on whether to issue an ESP to Dominion NNA. If the Board's findings support issuance of an ESP, they will also determine what conditions or limitations, if any, should be placed on it. The Commission will consider the staff recommendations and Board's findings in making its decision whether an ESP is to be issued. The NRC staff expects the process to take approximately 33 months from receipt of the application to the final Commission decision.

We hope you have found this letter to be informative. If you have any questions regarding this process, please contact Mike Scott, the Safety Project Manager for the North Anna ESP application, by e-mail at mls3@nrc.gov or by telephone at 301-415-1421. If you have questions regarding the environmental review, please contact Andy Kugler, the Environmental Project Manager for the North Anna ESP review, by e-mail at ajk1@nrc.gov or by telephone at 301-415-2828.

Sincerely,

/RA/

James E. Lyons, Program Director
New, Research and Test Reactors Program
Division of Regulatory Improvement Programs
Office of Nuclear Reactor Regulation

November 28, 2003

Mr. Fitzgerald Barnes
Louisa County Board of Supervisors
7307 Courthouse Road
Louisa, Virginia 23093

Dear Mr. Barnes:

The purpose of this letter is to inform you, as a public official who may have an interest in activities related to the North Anna Power Station, that the U.S. Nuclear Regulatory Commission (NRC) has received an application dated September 25, 2003, from Dominion Nuclear North Anna, LLC (Dominion NNA) for an early site permit (ESP). We have docketed this application (Docket No. 52-008) and would like to acquaint you with the major steps that lie ahead as the staff reviews it. The application is for a site, identified by Dominion NNA as the "North Anna ESP site," adjacent to the existing nuclear power plant units already operating on the North Anna site.

The NRC plans to hold an open house and public meeting on the scope of the environmental review associated with the application. The open house and public meeting will be held at the Louisa County Middle School on Monday, December 8, 2003. The open house will begin at 6:00 pm, to be followed by the public meeting at 7:00 pm.

Under the NRC's regulations in Part 52 of Title 10 of the *Code of Federal Regulations*, "Early Site Permits; Standard Design Certifications; and Combined Licenses for Nuclear Power Plants," the NRC can issue an ESP for approval of one or more sites for possible future construction of a nuclear power plant or plants. The term of an ESP may be up to 20 years. The ESP process can lead to resolution of site-related issues without the need for the applicant to expend substantial resources as would be necessary to seek a license to actually construct a nuclear power plant or plants. The NRC's review of an ESP addresses site safety issues, environmental protection issues, and plans for coping with emergencies, independent of the review of a specific nuclear plant design. Should an ESP be issued for the North Anna ESP site, it would resolve a certain set of those issues, independent of the review of a specific nuclear plant design. Dominion NNA could reference the ESP in seeking a license to construct or operate a nuclear power plant or plants on the site. We emphasize that an ESP, standing alone, does not authorize construction or operation of a nuclear power plant.

The NRC staff has begun a detailed technical review of the application, which will lead to the development of the NRC's safety evaluation report (SER). The SER will document the staff's review of whether Dominion NNA's proposed site is acceptable to host a nuclear power plant or plants. In addition, the NRC will develop an environmental impact statement (EIS) that will document the NRC staff's review of the application for environmental impacts associated with construction and operation of a nuclear power plant or plants at the site. At the December 8, 2003 meeting, interested persons will have the opportunity to comment on the scope of the issues to be considered in the staff's environmental impact statement. The public

will also have the opportunity to review and comment on the draft EIS after it is prepared in 2004.

In the near future, the NRC will also issue a *Federal Register* Notice and press release to announce the opportunity for persons whose interests may be affected to petition for leave to intervene in a hearing to be held after the completion of the staff's SER and EIS. After the *Federal Register* Notice is published, affected persons who wish to intervene will have 30 days in which to file such a petition in accordance with 10 CFR 2.714 as discussed in detail in the *Federal Register* Notice. An Atomic Safety and Licensing Board will be designated to preside over the hearing, consider evidence presented, and make findings on whether to issue an ESP to Dominion NNA. If the Board's findings support issuance of an ESP, they will also determine what conditions or limitations, if any, should be placed on it. The Commission will consider the staff recommendations and Board's findings in making its decision whether an ESP is to be issued. The NRC staff expects the process to take approximately 33 months from receipt of the application to the final Commission decision.

We hope you have found this letter to be informative. If you have any questions regarding this process, please contact Mike Scott, the Safety Project Manager for the North Anna ESP application, by e-mail at mls3@nrc.gov or by telephone at 301-415-1421. If you have questions regarding the environmental review, please contact Andy Kugler, the Environmental Project Manager for the North Anna ESP review, by e-mail at ajk1@nrc.gov or by telephone at 301-415-2828.

Sincerely,

/RA/

James E. Lyons, Program Director
New, Research and Test Reactors Program
Division of Regulatory Improvement Programs
Office of Nuclear Reactor Regulation

November 28, 2003

David Morgan, M.D.
Louisa County Board of Supervisors
1487 Poindexter Road
Louisa, Virginia 23093

Dear Dr. Morgan:

The purpose of this letter is to inform you, as a public official who may have an interest in activities related to the North Anna Power Station, that the U.S. Nuclear Regulatory Commission (NRC) has received an application dated September 25, 2003, from Dominion Nuclear North Anna, LLC (Dominion NNA) for an early site permit (ESP). We have docketed this application (Docket No. 52-008) and would like to acquaint you with the major steps that lie ahead as the staff reviews it. The application is for a site, identified by Dominion NNA as the "North Anna ESP site," adjacent to the existing nuclear power plant units already operating on the North Anna site.

The NRC plans to hold an open house and public meeting on the scope of the environmental review associated with the application. The open house and public meeting will be held at the Louisa County Middle School on Monday, December 8, 2003. The open house will begin at 6:00 pm, to be followed by the public meeting at 7:00 pm.

Under the NRC's regulations in Part 52 of Title 10 of the *Code of Federal Regulations*, "Early Site Permits; Standard Design Certifications; and Combined Licenses for Nuclear Power Plants," the NRC can issue an ESP for approval of one or more sites for possible future construction of a nuclear power plant or plants. The term of an ESP may be up to 20 years. The ESP process can lead to resolution of site-related issues without the need for the applicant to expend substantial resources as would be necessary to seek a license to actually construct a nuclear power plant or plants. The NRC's review of an ESP addresses site safety issues, environmental protection issues, and plans for coping with emergencies, independent of the review of a specific nuclear plant design. Should an ESP be issued for the North Anna ESP site, it would resolve a certain set of those issues, independent of the review of a specific nuclear plant design. Dominion NNA could reference the ESP in seeking a license to construct or operate a nuclear power plant or plants on the site. We emphasize that an ESP, standing alone, does not authorize construction or operation of a nuclear power plant.

The NRC staff has begun a detailed technical review of the application, which will lead to the development of the NRC's safety evaluation report (SER). The SER will document the staff's review of whether Dominion NNA's proposed site is acceptable to host a nuclear power plant or plants. In addition, the NRC will develop an environmental impact statement (EIS) that will document the NRC staff's review of the application for environmental impacts associated with construction and operation of a nuclear power plant or plants at the site. At the December 8, 2003 meeting, interested persons will have the opportunity to comment on the scope of the issues to be considered in the staff's environmental impact statement. The public

will also have the opportunity to review and comment on the draft EIS after it is prepared in 2004.

In the near future, the NRC will also issue a *Federal Register* Notice and press release to announce the opportunity for persons whose interests may be affected to petition for leave to intervene in a hearing to be held after the completion of the staff's SER and EIS. After the *Federal Register* Notice is published, affected persons who wish to intervene will have 30 days in which to file such a petition in accordance with 10 CFR 2.714 as discussed in detail in the *Federal Register* Notice. An Atomic Safety and Licensing Board will be designated to preside over the hearing, consider evidence presented, and make findings on whether to issue an ESP to Dominion NNA. If the Board's findings support issuance of an ESP, they will also determine what conditions or limitations, if any, should be placed on it. The Commission will consider the staff recommendations and Board's findings in making its decision whether an ESP is to be issued. The NRC staff expects the process to take approximately 33 months from receipt of the application to the final Commission decision.

We hope you have found this letter to be informative. If you have any questions regarding this process, please contact Mike Scott, the Safety Project Manager for the North Anna ESP application, by e-mail at mls3@nrc.gov or by telephone at 301-415-1421. If you have questions regarding the environmental review, please contact Andy Kugler, the Environmental Project Manager for the North Anna ESP review, by e-mail at ajk1@nrc.gov or by telephone at 301-415-2828.

Sincerely,

/RA/

New, Research and Test Reactors Program
Division of Regulatory Improvement Programs
Office of Nuclear Reactor Regulation

November 28, 2003

Mr. William Seay
Louisa County Board of Supervisors
4558 Davis Highway
Louisa, VA 23093

Dear Mr. Seay:

The purpose of this letter is to inform you, as a public official who may have an interest in activities related to the North Anna Power Station, that the U.S. Nuclear Regulatory Commission (NRC) has received an application dated September 25, 2003, from Dominion Nuclear North Anna, LLC (Dominion NNA) for an early site permit (ESP). We have docketed this application (Docket No. 52-008) and would like to acquaint you with the major steps that lie ahead as the staff reviews it. The application is for a site, identified by Dominion NNA as the "North Anna ESP site," adjacent to the existing nuclear power plant units already operating on the North Anna site.

The NRC plans to hold an open house and public meeting on the scope of the environmental review associated with the application. The open house and public meeting will be held at the Louisa County Middle School on Monday, December 8, 2003. The open house will begin at 6:00 pm, to be followed by the public meeting at 7:00 pm.

Under the NRC's regulations in Part 52 of Title 10 of the *Code of Federal Regulations*, "Early Site Permits; Standard Design Certifications; and Combined Licenses for Nuclear Power Plants," the NRC can issue an ESP for approval of one or more sites for possible future construction of a nuclear power plant or plants. The term of an ESP may be up to 20 years. The ESP process can lead to resolution of site-related issues without the need for the applicant to expend substantial resources as would be necessary to seek a license to actually construct a nuclear power plant or plants. The NRC's review of an ESP addresses site safety issues, environmental protection issues, and plans for coping with emergencies, independent of the review of a specific nuclear plant design. Should an ESP be issued for the North Anna ESP site, it would resolve a certain set of those issues, independent of the review of a specific nuclear plant design. Dominion NNA could reference the ESP in seeking a license to construct or operate a nuclear power plant or plants on the site. We emphasize that an ESP, standing alone, does not authorize construction or operation of a nuclear power plant.

The NRC staff has begun a detailed technical review of the application, which will lead to the development of the NRC's safety evaluation report (SER). The SER will document the staff's review of whether Dominion NNA's proposed site is acceptable to host a nuclear power plant or plants. In addition, the NRC will develop an environmental impact statement (EIS) that will document the NRC staff's review of the application for environmental impacts associated with construction and operation of a nuclear power plant or plants at the site. At the December 8, 2003 meeting, interested persons will have the opportunity to comment on the scope of the issues to be considered in the staff's environmental impact statement. The public

will also have the opportunity to review and comment on the draft EIS after it is prepared in 2004.

In the near future, the NRC will also issue a *Federal Register* Notice and press release to announce the opportunity for persons whose interests may be affected to petition for leave to intervene in a hearing to be held after the completion of the staff's SER and EIS. After the *Federal Register* Notice is published, affected persons who wish to intervene will have 30 days in which to file such a petition in accordance with 10 CFR 2.714 as discussed in detail in the *Federal Register* Notice. An Atomic Safety and Licensing Board will be designated to preside over the hearing, consider evidence presented, and make findings on whether to issue an ESP to Dominion NNA. If the Board's findings support issuance of an ESP, they will also determine what conditions or limitations, if any, should be placed on it. The Commission will consider the staff recommendations and Board's findings in making its decision whether an ESP is to be issued. The NRC staff expects the process to take approximately 33 months from receipt of the application to the final Commission decision.

We hope you have found this letter to be informative. If you have any questions regarding this process, please contact Mike Scott, the Safety Project Manager for the North Anna ESP application, by e-mail at mls3@nrc.gov or by telephone at 301-415-1421. If you have questions regarding the environmental review, please contact Andy Kugler, the Environmental Project Manager for the North Anna ESP review, by e-mail at ajk1@nrc.gov or by telephone at 301-415-2828.

Sincerely,

/RA/

James E. Lyons, Program Director

Office of Nuclear Reactor Regulation

Docket No. 52-008

November 28, 2003

Mr. C. Lee Lintecum, County Administrator
Louisa County
P.O. Box 160
Louisa, VA 23093

Dear Mr. Lintecum:

The purpose of this letter is to inform you, as a public official who may have an interest in activities related to the North Anna Power Station, that the U.S. Nuclear Regulatory Commission (NRC) has received an application dated September 25, 2003, from Dominion Nuclear North Anna, LLC (Dominion NNA) for an early site permit (ESP). We have docketed this application (Docket No. 52-008) and would like to acquaint you with the major steps that lie ahead as the staff reviews it. The application is for a site, identified by Dominion NNA as the "North Anna ESP site," adjacent to the existing nuclear power plant units already operating on the North Anna site.

The NRC plans to hold an open house and public meeting on the scope of the environmental review associated with the application. The open house and public meeting will be held at the Louisa County Middle School on Monday, December 8, 2003. The open house will begin at 6:00 pm, to be followed by the public meeting at 7:00 pm.

Under the NRC's regulations in Part 52 of Title 10 of the *Code of Federal Regulations*, "Early Site Permits; Standard Design Certifications; and Combined Licenses for Nuclear Power Plants," the NRC can issue an ESP for approval of one or more sites for possible future construction of a nuclear power plant or plants. The term of an ESP may be up to 20 years. The ESP process can lead to resolution of site-related issues without the need for the applicant to expend substantial resources as would be necessary to seek a license to actually construct a nuclear power plant or plants. The NRC's review of an ESP addresses site safety issues, environmental protection issues, and plans for coping with emergencies, independent of the review of a specific nuclear plant design. Should an ESP be issued for the North Anna ESP site, it would resolve a certain set of those issues, independent of the review of a specific nuclear plant design. Dominion NNA could reference the ESP in seeking a license to construct or operate a nuclear power plant or plants on the site. We emphasize that an ESP, standing alone, does not authorize construction or operation of a nuclear power plant.

The NRC staff has begun a detailed technical review of the application, which will lead to the development of the NRC's safety evaluation report (SER). The SER will document the staff's review of whether Dominion NNA's proposed site is acceptable to host a nuclear power plant or plants. In addition, the NRC will develop an environmental impact statement (EIS) that will document the NRC staff's review of the application for environmental impacts associated with construction and operation of a nuclear power plant or plants at the site. At the December 8, 2003 meeting, interested persons will have the opportunity to comment on the scope of the issues to be considered in the staff's environmental impact statement. The public

will also have the opportunity to review and comment on the draft EIS after it is prepared in 2004.

In the near future, the NRC will also issue a *Federal Register* Notice and press release to announce the opportunity for persons whose interests may be affected to petition for leave to intervene in a hearing to be held after the completion of the staff's SER and EIS. After the *Federal Register* Notice is published, affected persons who wish to intervene will have 30 days in which to file such a petition in accordance with 10 CFR 2.714 as discussed in detail in the *Federal Register* Notice. An Atomic Safety and Licensing Board will be designated to preside over the hearing, consider evidence presented, and make findings on whether to issue an ESP to Dominion NNA. If the Board's findings support issuance of an ESP, they will also determine what conditions or limitations, if any, should be placed on it. The Commission will consider the staff recommendations and Board's findings in making its decision whether an ESP is to be issued. The NRC staff expects the process to take approximately 33 months from receipt of the application to the final Commission decision.

We hope you have found this letter to be informative. If you have any questions regarding this process, please contact Mike Scott, the Safety Project Manager for the North Anna ESP application, by e-mail at mls3@nrc.gov or by telephone at 301-415-1421. If you have questions regarding the environmental review, please contact Andy Kugler, the Environmental Project Manager for the North Anna ESP review, by e-mail at ajk1@nrc.gov or by telephone at 301-415-2828.

Sincerely,

/RA/

Office of Nuclear Reactor Regulation

Docket No. 52-008

November 28, 2003

Mr. William F. Stephens, Director
Virginia State Corporation Commission
Division of Energy Regulation
1300 East Main Street, 4th Floor Tyler Bldg.
Richmond, VA 23219

Dear Mr. Stephens:

The purpose of this letter is to inform you, as a public official who may have an interest in activities related to the North Anna Power Station, that the U.S. Nuclear Regulatory Commission (NRC) has received an application dated September 25, 2003, from Dominion Nuclear North Anna, LLC (Dominion NNA) for an early site permit (ESP). We have docketed this application (Docket No. 52-008) and would like to acquaint you with the major steps that lie ahead as the staff reviews it. The application is for a site, identified by Dominion NNA as the "North Anna ESP site," adjacent to the existing nuclear power plant units already operating on the North Anna site.

The NRC plans to hold an open house and public meeting on the scope of the environmental review associated with the application. The open house and public meeting will be held at the Louisa County Middle School on Monday, December 8, 2003. The open house will begin at 6:00 pm, to be followed by the public meeting at 7:00 pm.

Under the NRC's regulations in Part 52 of Title 10 of the *Code of Federal Regulations*, "Early Site Permits; Standard Design Certifications; and Combined Licenses for Nuclear Power Plants," the NRC can issue an ESP for approval of one or more sites for possible future construction of a nuclear power plant or plants. The term of an ESP may be up to 20 years. The ESP process can lead to resolution of site-related issues without the need for the applicant to expend substantial resources as would be necessary to seek a license to actually construct a nuclear power plant or plants. The NRC's review of an ESP addresses site safety issues, environmental protection issues, and plans for coping with emergencies, independent of the review of a specific nuclear plant design. Should an ESP be issued for the North Anna ESP site, it would resolve a certain set of those issues, independent of the review of a specific nuclear plant design. Dominion NNA could reference the ESP in seeking a license to construct or operate a nuclear power plant or plants on the site. We emphasize that an ESP, standing alone, does not authorize construction or operation of a nuclear power plant.

The NRC staff has begun a detailed technical review of the application, which will lead to the development of the NRC's safety evaluation report (SER). The SER will document the staff's review of whether Dominion NNA's proposed site is acceptable to host a nuclear power plant or plants. In addition, the NRC will develop an environmental impact statement (EIS) that will document the NRC staff's review of the application for environmental impacts associated with construction and operation of a nuclear power plant or plants at the site. At the December 8, 2003 meeting, interested persons will have the opportunity to comment on the scope of the issues to be considered in the staff's environmental impact statement. The public

will also have the opportunity to review and comment on the draft EIS after it is prepared in 2004.

In the near future, the NRC will also issue a *Federal Register* Notice and press release to announce the opportunity for persons whose interests may be affected to petition for leave to intervene in a hearing to be held after the completion of the staff's SER and EIS. After the *Federal Register* Notice is published, affected persons who wish to intervene will have 30 days in which to file such a petition in accordance with 10 CFR 2.714 as discussed in detail in the *Federal Register* Notice. An Atomic Safety and Licensing Board will be designated to preside over the hearing, consider evidence presented, and make findings on whether to issue an ESP to Dominion NNA. If the Board's findings support issuance of an ESP, they will also determine what conditions or limitations, if any, should be placed on it. The Commission will consider the staff recommendations and Board's findings in making its decision whether an ESP is to be issued. The NRC staff expects the process to take approximately 33 months from receipt of the application to the final Commission decision.

We hope you have found this letter to be informative. If you have any questions regarding this process, please contact Mike Scott, the Safety Project Manager for the North Anna ESP application, by e-mail at mls3@nrc.gov or by telephone at 301-415-1421. If you have questions regarding the environmental review, please contact Andy Kugler, the Environmental Project Manager for the North Anna ESP review, by e-mail at ajk1@nrc.gov or by telephone at 301-415-2828.

Sincerely,

/RA/

Division of Regulatory Improvement Programs
Office of Nuclear Reactor Regulation

Docket No. 52-008

November 28, 2003

Mr. Michael P. Murphy, Director
Virginia Department of Environmental Quality
P.O. Box 10009
Richmond, VA 23240-0009

Dear Mr. Murphy:

The purpose of this letter is to inform you, as a public official who may have an interest in activities related to the North Anna Power Station, that the U.S. Nuclear Regulatory Commission (NRC) has received an application dated September 25, 2003, from Dominion Nuclear North Anna, LLC (Dominion NNA) for an early site permit (ESP). We have docketed this application (Docket No. 52-008) and would like to acquaint you with the major steps that lie ahead as the staff reviews it. The application is for a site, identified by Dominion NNA as the "North Anna ESP site," adjacent to the existing nuclear power plant units already operating on the North Anna site.

The NRC plans to hold an open house and public meeting on the scope of the environmental review associated with the application. The open house and public meeting will be held at the Louisa County Middle School on Monday, December 8, 2003. The open house will begin at 6:00 pm, to be followed by the public meeting at 7:00 pm.

Under the NRC's regulations in Part 52 of Title 10 of the *Code of Federal Regulations*, "Early Site Permits; Standard Design Certifications; and Combined Licenses for Nuclear Power Plants," the NRC can issue an ESP for approval of one or more sites for possible future construction of a nuclear power plant or plants. The term of an ESP may be up to 20 years. The ESP process can lead to resolution of site-related issues without the need for the applicant to expend substantial resources as would be necessary to seek a license to actually construct a nuclear power plant or plants. The NRC's review of an ESP addresses site safety issues, environmental protection issues, and plans for coping with emergencies, independent of the review of a specific nuclear plant design. Should an ESP be issued for the North Anna ESP site, it would resolve a certain set of those issues, independent of the review of a specific nuclear plant design. Dominion NNA could reference the ESP in seeking a license to construct or operate a nuclear power plant or plants on the site. We emphasize that an ESP, standing alone, does not authorize construction or operation of a nuclear power plant.

The NRC staff has begun a detailed technical review of the application, which will lead to the development of the NRC's safety evaluation report (SER). The SER will document the staff's review of whether Dominion NNA's proposed site is acceptable to host a nuclear power plant or plants. In addition, the NRC will develop an environmental impact statement (EIS) that will document the NRC staff's review of the application for environmental impacts associated with construction and operation of a nuclear power plant or plants at the site. At the December 8, 2003 meeting, interested persons will have the opportunity to comment on the scope of the issues to be considered in the staff's environmental impact statement. The public

will also have the opportunity to review and comment on the draft EIS after it is prepared in 2004.

In the near future, the NRC will also issue a *Federal Register* Notice and press release to announce the opportunity for persons whose interests may be affected to petition for leave to intervene in a hearing to be held after the completion of the staff's SER and EIS. After the *Federal Register* Notice is published, affected persons who wish to intervene will have 30 days in which to file such a petition in accordance with 10 CFR 2.714 as discussed in detail in the *Federal Register* Notice. An Atomic Safety and Licensing Board will be designated to preside over the hearing, consider evidence presented, and make findings on whether to issue an ESP to Dominion NNA. If the Board's findings support issuance of an ESP, they will also determine what conditions or limitations, if any, should be placed on it. The Commission will consider the staff recommendations and Board's findings in making its decision whether an ESP is to be issued. The NRC staff expects the process to take approximately 33 months from receipt of the application to the final Commission decision.

We hope you have found this letter to be informative. If you have any questions regarding this process, please contact Mike Scott, the Safety Project Manager for the North Anna ESP application, by e-mail at mls3@nrc.gov or by telephone at 301-415-1421. If you have questions regarding the environmental review, please contact Andy Kugler, the Environmental Project Manager for the North Anna ESP review, by e-mail at ajk1@nrc.gov or by telephone at 301-415-2828.

Sincerely,

/RA/

James E. Lyons, Program Director
New, Research and Test Reactors Program
Division of Regulatory Improvement Programs
Office of Nuclear Reactor Regulation

November 28, 2003

Robert B. Strobe, M.D., M.P.H.
State Health Commissioner
Office of the Commissioner
Virginia Department of Health
P.O. Box 2448
Richmond, VA 23218

Dear Dr. Strobe:

The purpose of this letter is to inform you, as a public official who may have an interest in activities related to the North Anna Power Station, that the U.S. Nuclear Regulatory Commission (NRC) has received an application dated September 25, 2003, from Dominion Nuclear North Anna, LLC (Dominion NNA) for an early site permit (ESP). We have docketed this application (Docket No. 52-008) and would like to acquaint you with the major steps that lie ahead as the staff reviews it. The application is for a site, identified by Dominion NNA as the "North Anna ESP site," adjacent to the existing nuclear power plant units already operating on the North Anna site.

The NRC plans to hold an open house and public meeting on the scope of the environmental review associated with the application. The open house and public meeting will be held at the Louisa County Middle School on Monday, December 8, 2003. The open house will begin at 6:00 pm, to be followed by the public meeting at 7:00 pm.

Under the NRC's regulations in Part 52 of Title 10 of the *Code of Federal Regulations*, "Early Site Permits; Standard Design Certifications; and Combined Licenses for Nuclear Power Plants," the NRC can issue an ESP for approval of one or more sites for possible future construction of a nuclear power plant or plants. The term of an ESP may be up to 20 years. The ESP process can lead to resolution of site-related issues without the need for the applicant to expend substantial resources as would be necessary to seek a license to actually construct a nuclear power plant or plants. The NRC's review of an ESP addresses site safety issues, environmental protection issues, and plans for coping with emergencies, independent of the review of a specific nuclear plant design. Should an ESP be issued for the North Anna ESP site, it would resolve a certain set of those issues, independent of the review of a specific nuclear plant design. Dominion NNA could reference the ESP in seeking a license to construct or operate a nuclear power plant or plants on the site. We emphasize that an ESP, standing alone, does not authorize construction or operation of a nuclear power plant.

The NRC staff has begun a detailed technical review of the application, which will lead to the development of the NRC's safety evaluation report (SER). The SER will document the staff's review of whether Dominion NNA's proposed site is acceptable to host a nuclear power plant or plants. In addition, the NRC will develop an environmental impact statement (EIS) that will document the NRC staff's review of the application for environmental impacts associated with construction and operation of a nuclear power plant or plants at the site. At the December 8, 2003 meeting, interested persons will have the opportunity to comment on the scope of the issues to be considered in the staff's environmental impact statement. The public

will also have the opportunity to review and comment on the draft EIS after it is prepared in 2004.

In the near future, the NRC will also issue a *Federal Register* Notice and press release to announce the opportunity for persons whose interests may be affected to petition for leave to intervene in a hearing to be held after the completion of the staff's SER and EIS. After the *Federal Register* Notice is published, affected persons who wish to intervene will have 30 days in which to file such a petition in accordance with 10 CFR 2.714 as discussed in detail in the *Federal Register* Notice. An Atomic Safety and Licensing Board will be designated to preside over the hearing, consider evidence presented, and make findings on whether to issue an ESP to Dominion NNA. If the Board's findings support issuance of an ESP, they will also determine what conditions or limitations, if any, should be placed on it. The Commission will consider the staff recommendations and Board's findings in making its decision whether an ESP is to be issued. The NRC staff expects the process to take approximately 33 months from receipt of the application to the final Commission decision.

We hope you have found this letter to be informative. If you have any questions regarding this process, please contact Mike Scott, the Safety Project Manager for the North Anna ESP application, by e-mail at mls3@nrc.gov or by telephone at 301-415-1421. If you have questions regarding the environmental review, please contact Andy Kugler, the Environmental Project Manager for the North Anna ESP review, by e-mail at ajk1@nrc.gov or by telephone at 301-415-2828.

Sincerely,

/RA/

James E. Lyons, Program Director
New, Research and Test Reactors Program
Division of Regulatory Improvement Programs
Office of Nuclear Reactor Regulation

November 28, 2003

Mr. Leslie P. Foldesi, CHP, Director
Bureau of Radiological Health
Division of Health Hazards Control, Department of Health
Main Street Station
1500 East Main, Room 240
Richmond, Virginia 23219

Dear Mr. Foldesi:

The purpose of this letter is to inform you, as a public official who may have an interest in activities related to the North Anna Power Station, that the U.S. Nuclear Regulatory Commission (NRC) has received an application dated September 25, 2003, from Dominion Nuclear North Anna, LLC (Dominion NNA) for an early site permit (ESP). We have docketed this application (Docket No. 52-008) and would like to acquaint you with the major steps that lie ahead as the staff reviews it. The application is for a site, identified by Dominion NNA as the "North Anna ESP site," adjacent to the existing nuclear power plant units already operating on the North Anna site.

The NRC plans to hold an open house and public meeting on the scope of the environmental review associated with the application. The open house and public meeting will be held at the Louisa County Middle School on Monday, December 8, 2003. The open house will begin at 6:00 pm, to be followed by the public meeting at 7:00 pm.

Under the NRC's regulations in Part 52 of Title 10 of the *Code of Federal Regulations*, "Early Site Permits; Standard Design Certifications; and Combined Licenses for Nuclear Power Plants," the NRC can issue an ESP for approval of one or more sites for possible future construction of a nuclear power plant or plants. The term of an ESP may be up to 20 years. The ESP process can lead to resolution of site-related issues without the need for the applicant to expend substantial resources as would be necessary to seek a license to actually construct a nuclear power plant or plants. The NRC's review of an ESP addresses site safety issues, environmental protection issues, and plans for coping with emergencies, independent of the review of a specific nuclear plant design. Should an ESP be issued for the North Anna ESP site, it would resolve a certain set of those issues, independent of the review of a specific nuclear plant design. Dominion NNA could reference the ESP in seeking a license to construct or operate a nuclear power plant or plants on the site. We emphasize that an ESP, standing alone, does not authorize construction or operation of a nuclear power plant.

The NRC staff has begun a detailed technical review of the application, which will lead to the development of the NRC's safety evaluation report (SER). The SER will document the staff's review of whether Dominion NNA's proposed site is acceptable to host a nuclear power plant or plants. In addition, the NRC will develop an environmental impact statement (EIS) that will document the NRC staff's review of the application for environmental impacts associated with construction and operation of a nuclear power plant or plants at the site. At the December 8, 2003 meeting, interested persons will have the opportunity to comment on the scope of the issues to be considered in the staff's environmental impact statement. The public

will also have the opportunity to review and comment on the draft EIS after it is prepared in 2004.

In the near future, the NRC will also issue a *Federal Register* Notice and press release to announce the opportunity for persons whose interests may be affected to petition for leave to intervene in a hearing to be held after the completion of the staff's SER and EIS. After the *Federal Register* Notice is published, affected persons who wish to intervene will have 30 days in which to file such a petition in accordance with 10 CFR 2.714 as discussed in detail in the *Federal Register* Notice. An Atomic Safety and Licensing Board will be designated to preside over the hearing, consider evidence presented, and make findings on whether to issue an ESP to Dominion NNA. If the Board's findings support issuance of an ESP, they will also determine what conditions or limitations, if any, should be placed on it. The Commission will consider the staff recommendations and Board's findings in making its decision whether an ESP is to be issued. The NRC staff expects the process to take approximately 33 months from receipt of the application to the final Commission decision.

We hope you have found this letter to be informative. If you have any questions regarding this process, please contact Mike Scott, the Safety Project Manager for the North Anna ESP application, by e-mail at mls3@nrc.gov or by telephone at 301-415-1421. If you have questions regarding the environmental review, please contact Andy Kugler, the Environmental Project Manager for the North Anna ESP review, by e-mail at ajk1@nrc.gov or by telephone at 301-415-2828.

Sincerely,

/RA/

Docket No. 52-008

November 28, 2003

Chief Charles Carneal
Hanover County
P.O. Box 470
Hanover, VA 23069-0470

Dear Chief Carneal:

The purpose of this letter is to inform you, as a public official who may have an interest in activities related to the North Anna Power Station, that the U.S. Nuclear Regulatory Commission (NRC) has received an application dated September 25, 2003, from Dominion Nuclear North Anna, LLC (Dominion NNA) for an early site permit (ESP). We have docketed this application (Docket No. 52-008) and would like to acquaint you with the major steps that lie ahead as the staff reviews it. The application is for a site, identified by Dominion NNA as the "North Anna ESP site," adjacent to the existing nuclear power plant units already operating on the North Anna site.

The NRC plans to hold an open house and public meeting on the scope of the environmental review associated with the application. The open house and public meeting will be held at the Louisa County Middle School on Monday, December 8, 2003. The open house will begin at 6:00 pm, to be followed by the public meeting at 7:00 pm.

Under the NRC's regulations in Part 52 of Title 10 of the *Code of Federal Regulations*, "Early Site Permits; Standard Design Certifications; and Combined Licenses for Nuclear Power Plants," the NRC can issue an ESP for approval of one or more sites for possible future construction of a nuclear power plant or plants. The term of an ESP may be up to 20 years. The ESP process can lead to resolution of site-related issues without the need for the applicant to expend substantial resources as would be necessary to seek a license to actually construct a nuclear power plant or plants. The NRC's review of an ESP addresses site safety issues, environmental protection issues, and plans for coping with emergencies, independent of the review of a specific nuclear plant design. Should an ESP be issued for the North Anna ESP site, it would resolve a certain set of those issues, independent of the review of a specific nuclear plant design. Dominion NNA could reference the ESP in seeking a license to construct or operate a nuclear power plant or plants on the site. We emphasize that an ESP, standing alone, does not authorize construction or operation of a nuclear power plant.

The NRC staff has begun a detailed technical review of the application, which will lead to the development of the NRC's safety evaluation report (SER). The SER will document the staff's review of whether Dominion NNA's proposed site is acceptable to host a nuclear power plant or plants. In addition, the NRC will develop an environmental impact statement (EIS) that will document the NRC staff's review of the application for environmental impacts associated with construction and operation of a nuclear power plant or plants at the site. At the December 8, 2003 meeting, interested persons will have the opportunity to comment on the scope of the issues to be considered in the staff's environmental impact statement. The public

will also have the opportunity to review and comment on the draft EIS after it is prepared in 2004.

In the near future, the NRC will also issue a *Federal Register* Notice and press release to announce the opportunity for persons whose interests may be affected to petition for leave to intervene in a hearing to be held after the completion of the staff's SER and EIS. After the *Federal Register* Notice is published, affected persons who wish to intervene will have 30 days in which to file such a petition in accordance with 10 CFR 2.714 as discussed in detail in the *Federal Register* Notice. An Atomic Safety and Licensing Board will be designated to preside over the hearing, consider evidence presented, and make findings on whether to issue an ESP to Dominion NNA. If the Board's findings support issuance of an ESP, they will also determine what conditions or limitations, if any, should be placed on it. The Commission will consider the staff recommendations and Board's findings in making its decision whether an ESP is to be issued. The NRC staff expects the process to take approximately 33 months from receipt of the application to the final Commission decision.

We hope you have found this letter to be informative. If you have any questions regarding this process, please contact Mike Scott, the Safety Project Manager for the North Anna ESP application, by e-mail at mls3@nrc.gov or by telephone at 301-415-1421. If you have questions regarding the environmental review, please contact Andy Kugler, the Environmental Project Manager for the North Anna ESP review, by e-mail at ajk1@nrc.gov or by telephone at 301-415-2828.

Sincerely,

/RA/

Office of Nuclear Reactor Regulation

Docket No. 52-008

November 28, 2003

Captain Douglas Boggs
Spotsylvania County
P.O. Box 818
Spotsylvania, VA 22553

Dear Mr. Boggs:

The purpose of this letter is to inform you, as a public official who may have an interest in activities related to the North Anna Power Station, that the U.S. Nuclear Regulatory Commission (NRC) has received an application dated September 25, 2003, from Dominion Nuclear North Anna, LLC (Dominion NNA) for an early site permit (ESP). We have docketed this application (Docket No. 52-008) and would like to acquaint you with the major steps that lie ahead as the staff reviews it. The application is for a site, identified by Dominion NNA as the "North Anna ESP site," adjacent to the existing nuclear power plant units already operating on the North Anna site.

The NRC plans to hold an open house and public meeting on the scope of the environmental review associated with the application. The open house and public meeting will be held at the Louisa County Middle School on Monday, December 8, 2003. The open house will begin at 6:00 pm, to be followed by the public meeting at 7:00 pm.

Under the NRC's regulations in Part 52 of Title 10 of the *Code of Federal Regulations*, "Early Site Permits; Standard Design Certifications; and Combined Licenses for Nuclear Power Plants," the NRC can issue an ESP for approval of one or more sites for possible future construction of a nuclear power plant or plants. The term of an ESP may be up to 20 years. The ESP process can lead to resolution of site-related issues without the need for the applicant to expend substantial resources as would be necessary to seek a license to actually construct a nuclear power plant or plants. The NRC's review of an ESP addresses site safety issues, environmental protection issues, and plans for coping with emergencies, independent of the review of a specific nuclear plant design. Should an ESP be issued for the North Anna ESP site, it would resolve a certain set of those issues, independent of the review of a specific nuclear plant design. Dominion NNA could reference the ESP in seeking a license to construct or operate a nuclear power plant or plants on the site. We emphasize that an ESP, standing alone, does not authorize construction or operation of a nuclear power plant.

The NRC staff has begun a detailed technical review of the application, which will lead to the development of the NRC's safety evaluation report (SER). The SER will document the staff's review of whether Dominion NNA's proposed site is acceptable to host a nuclear power plant or plants. In addition, the NRC will develop an environmental impact statement (EIS) that will document the NRC staff's review of the application for environmental impacts associated with construction and operation of a nuclear power plant or plants at the site. At the December 8, 2003 meeting, interested persons will have the opportunity to comment on the scope of the issues to be considered in the staff's environmental impact statement. The public

will also have the opportunity to review and comment on the draft EIS after it is prepared in 2004.

In the near future, the NRC will also issue a *Federal Register* Notice and press release to announce the opportunity for persons whose interests may be affected to petition for leave to intervene in a hearing to be held after the completion of the staff's SER and EIS. After the *Federal Register* Notice is published, affected persons who wish to intervene will have 30 days in which to file such a petition in accordance with 10 CFR 2.714 as discussed in detail in the *Federal Register* Notice. An Atomic Safety and Licensing Board will be designated to preside over the hearing, consider evidence presented, and make findings on whether to issue an ESP to Dominion NNA. If the Board's findings support issuance of an ESP, they will also determine what conditions or limitations, if any, should be placed on it. The Commission will consider the staff recommendations and Board's findings in making its decision whether an ESP is to be issued. The NRC staff expects the process to take approximately 33 months from receipt of the application to the final Commission decision.

We hope you have found this letter to be informative. If you have any questions regarding this process, please contact Mike Scott, the Safety Project Manager for the North Anna ESP application, by e-mail at mls3@nrc.gov or by telephone at 301-415-1421. If you have questions regarding the environmental review, please contact Andy Kugler, the Environmental Project Manager for the North Anna ESP review, by e-mail at ajk1@nrc.gov or by telephone at 301-415-2828.

Sincerely,

/RA/

Office of Nuclear Reactor Regulation

November 28, 2003

Ms. Mary Lee Carter, Chair
Spotsylvania County Board of Supervisors
P.O. Box 99
Spotsylvania, VA 22553

Dear Ms. Carter:

The purpose of this letter is to inform you, as a public official who may have an interest in activities related to the North Anna Power Station, that the U.S. Nuclear Regulatory Commission (NRC) has received an application dated September 25, 2003, from Dominion Nuclear North Anna, LLC (Dominion NNA) for an early site permit (ESP). We have docketed this application (Docket No. 52-008) and would like to acquaint you with the major steps that lie ahead as the staff reviews it. The application is for a site, identified by Dominion NNA as the "North Anna ESP site," adjacent to the existing nuclear power plant units already operating on the North Anna site.

The NRC plans to hold an open house and public meeting on the scope of the environmental review associated with the application. The open house and public meeting will be held at the Louisa County Middle School on Monday, December 8, 2003. The open house will begin at 6:00 pm, to be followed by the public meeting at 7:00 pm.

Under the NRC's regulations in Part 52 of Title 10 of the *Code of Federal Regulations*, "Early Site Permits; Standard Design Certifications; and Combined Licenses for Nuclear Power Plants," the NRC can issue an ESP for approval of one or more sites for possible future construction of a nuclear power plant or plants. The term of an ESP may be up to 20 years. The ESP process can lead to resolution of site-related issues without the need for the applicant to expend substantial resources as would be necessary to seek a license to actually construct a nuclear power plant or plants. The NRC's review of an ESP addresses site safety issues, environmental protection issues, and plans for coping with emergencies, independent of the review of a specific nuclear plant design. Should an ESP be issued for the North Anna ESP site, it would resolve a certain set of those issues, independent of the review of a specific nuclear plant design. Dominion NNA could reference the ESP in seeking a license to construct or operate a nuclear power plant or plants on the site. We emphasize that an ESP, standing alone, does not authorize construction or operation of a nuclear power plant.

The NRC staff has begun a detailed technical review of the application, which will lead to the development of the NRC's safety evaluation report (SER). The SER will document the staff's review of whether Dominion NNA's proposed site is acceptable to host a nuclear power plant or plants. In addition, the NRC will develop an environmental impact statement (EIS) that will document the NRC staff's review of the application for environmental impacts associated with construction and operation of a nuclear power plant or plants at the site. At the December 8, 2003 meeting, interested persons will have the opportunity to comment on the scope of the issues to be considered in the staff's environmental impact statement. The public

M. Carter

- 2 -

will also have the opportunity to review and comment on the draft EIS after it is prepared in 2004.

In the near future, the NRC will also issue a *Federal Register* Notice and press release to announce the opportunity for persons whose interests may be affected to petition for leave to intervene in a hearing to be held after the completion of the staff's SER and EIS. After the *Federal Register* Notice is published, affected persons who wish to intervene will have 30 days in which to file such a petition in accordance with 10 CFR 2.714 as discussed in detail in the *Federal Register* Notice. An Atomic Safety and Licensing Board will be designated to preside over the hearing, consider evidence presented, and make findings on whether to issue an ESP to Dominion NNA. If the Board's findings support issuance of an ESP, they will also determine what conditions or limitations, if any, should be placed on it. The Commission will consider the staff recommendations and Board's findings in making its decision whether an ESP is to be issued. The NRC staff expects the process to take approximately 33 months from receipt of the application to the final Commission decision.

We hope you have found this letter to be informative. If you have any questions regarding this process, please contact Mike Scott, the Safety Project Manager for the North Anna ESP application, by e-mail at mls3@nrc.gov or by telephone at 301-415-1421. If you have questions regarding the environmental review, please contact Andy Kugler, the Environmental Project Manager for the North Anna ESP review, by e-mail at ajk1@nrc.gov or by telephone at 301-415-2828.

Sincerely,

/RA/

Docket No. 52-008

November 28, 2003

Mr. Anthony Barrett
Spotsylvania County Administrator
9105 Courthouse Road
Spotsylvania, VA 22553

Dear Mr. Barrett:

The purpose of this letter is to inform you, as a public official who may have an interest in activities related to the North Anna Power Station, that the U.S. Nuclear Regulatory Commission (NRC) has received an application dated September 25, 2003, from Dominion Nuclear North Anna, LLC (Dominion NNA) for an early site permit (ESP). We have docketed this application (Docket No. 52-008) and would like to acquaint you with the major steps that lie ahead as the staff reviews it. The application is for a site, identified by Dominion NNA as the "North Anna ESP site," adjacent to the existing nuclear power plant units already operating on the North Anna site.

The NRC plans to hold an open house and public meeting on the scope of the environmental review associated with the application. The open house and public meeting will be held at the Louisa County Middle School on Monday, December 8, 2003. The open house will begin at 6:00 pm, to be followed by the public meeting at 7:00 pm.

Under the NRC's regulations in Part 52 of Title 10 of the *Code of Federal Regulations*, "Early Site Permits; Standard Design Certifications; and Combined Licenses for Nuclear Power Plants," the NRC can issue an ESP for approval of one or more sites for possible future construction of a nuclear power plant or plants. The term of an ESP may be up to 20 years. The ESP process can lead to resolution of site-related issues without the need for the applicant to expend substantial resources as would be necessary to seek a license to actually construct a nuclear power plant or plants. The NRC's review of an ESP addresses site safety issues, environmental protection issues, and plans for coping with emergencies, independent of the review of a specific nuclear plant design. Should an ESP be issued for the North Anna ESP site, it would resolve a certain set of those issues, independent of the review of a specific nuclear plant design. Dominion NNA could reference the ESP in seeking a license to construct or operate a nuclear power plant or plants on the site. We emphasize that an ESP, standing alone, does not authorize construction or operation of a nuclear power plant.

The NRC staff has begun a detailed technical review of the application, which will lead to the development of the NRC's safety evaluation report (SER). The SER will document the staff's review of whether Dominion NNA's proposed site is acceptable to host a nuclear power plant or plants. In addition, the NRC will develop an environmental impact statement (EIS) that will document the NRC staff's review of the application for environmental impacts associated with construction and operation of a nuclear power plant or plants at the site. At the December 8, 2003 meeting, interested persons will have the opportunity to comment on the scope of the issues to be considered in the staff's environmental impact statement. The public

will also have the opportunity to review and comment on the draft EIS after it is prepared in 2004.

In the near future, the NRC will also issue a *Federal Register* Notice and press release to announce the opportunity for persons whose interests may be affected to petition for leave to intervene in a hearing to be held after the completion of the staff's SER and EIS. After the *Federal Register* Notice is published, affected persons who wish to intervene will have 30 days in which to file such a petition in accordance with 10 CFR 2.714 as discussed in detail in the *Federal Register* Notice. An Atomic Safety and Licensing Board will be designated to preside over the hearing, consider evidence presented, and make findings on whether to issue an ESP to Dominion NNA. If the Board's findings support issuance of an ESP, they will also determine what conditions or limitations, if any, should be placed on it. The Commission will consider the staff recommendations and Board's findings in making its decision whether an ESP is to be issued. The NRC staff expects the process to take approximately 33 months from receipt of the application to the final Commission decision.

We hope you have found this letter to be informative. If you have any questions regarding this process, please contact Mike Scott, the Safety Project Manager for the North Anna ESP application, by e-mail at mls3@nrc.gov or by telephone at 301-415-1421. If you have questions regarding the environmental review, please contact Andy Kugler, the Environmental Project Manager for the North Anna ESP review, by e-mail at ajk1@nrc.gov or by telephone at 301-415-2828.

Sincerely,

/RA/

James E. Lyons, Program Director
New, Research and Test Reactors Program
Division of Regulatory Improvement Programs
Office of Nuclear Reactor Regulation

Docket No. 52-008

November 28, 2003

Mr. Michael Schlemmer
Louisa County Emergency Services
P.O. Box 160
Louisa, VA 23093

Dear Mr. Schlemmer:

The purpose of this letter is to inform you, as a public official who may have an interest in activities related to the North Anna Power Station, that the U.S. Nuclear Regulatory Commission (NRC) has received an application dated September 25, 2003, from Dominion Nuclear North Anna, LLC (Dominion NNA) for an early site permit (ESP). We have docketed this application (Docket No. 52-008) and would like to acquaint you with the major steps that lie ahead as the staff reviews it. The application is for a site, identified by Dominion NNA as the "North Anna ESP site," adjacent to the existing nuclear power plant units already operating on the North Anna site.

The NRC plans to hold an open house and public meeting on the scope of the environmental review associated with the application. The open house and public meeting will be held at the Louisa County Middle School on Monday, December 8, 2003. The open house will begin at 6:00 pm, to be followed by the public meeting at 7:00 pm.

Under the NRC's regulations in Part 52 of Title 10 of the *Code of Federal Regulations*, "Early Site Permits; Standard Design Certifications; and Combined Licenses for Nuclear Power Plants," the NRC can issue an ESP for approval of one or more sites for possible future construction of a nuclear power plant or plants. The term of an ESP may be up to 20 years. The ESP process can lead to resolution of site-related issues without the need for the applicant to expend substantial resources as would be necessary to seek a license to actually construct a nuclear power plant or plants. The NRC's review of an ESP addresses site safety issues, environmental protection issues, and plans for coping with emergencies, independent of the review of a specific nuclear plant design. Should an ESP be issued for the North Anna ESP site, it would resolve a certain set of those issues, independent of the review of a specific nuclear plant design. Dominion NNA could reference the ESP in seeking a license to construct or operate a nuclear power plant or plants on the site. We emphasize that an ESP, standing alone, does not authorize construction or operation of a nuclear power plant.

The NRC staff has begun a detailed technical review of the application, which will lead to the development of the NRC's safety evaluation report (SER). The SER will document the staff's review of whether Dominion NNA's proposed site is acceptable to host a nuclear power plant or plants. In addition, the NRC will develop an environmental impact statement (EIS) that will document the NRC staff's review of the application for environmental impacts associated with construction and operation of a nuclear power plant or plants at the site. At the December 8, 2003 meeting, interested persons will have the opportunity to comment on the scope of the issues to be considered in the staff's environmental impact statement. The public

will also have the opportunity to review and comment on the draft EIS after it is prepared in 2004.

In the near future, the NRC will also issue a *Federal Register* Notice and press release to announce the opportunity for persons whose interests may be affected to petition for leave to intervene in a hearing to be held after the completion of the staff's SER and EIS. After the *Federal Register* Notice is published, affected persons who wish to intervene will have 30 days in which to file such a petition in accordance with 10 CFR 2.714 as discussed in detail in the *Federal Register* Notice. An Atomic Safety and Licensing Board will be designated to preside over the hearing, consider evidence presented, and make findings on whether to issue an ESP to Dominion NNA. If the Board's findings support issuance of an ESP, they will also determine what conditions or limitations, if any, should be placed on it. The Commission will consider the staff recommendations and Board's findings in making its decision whether an ESP is to be issued. The NRC staff expects the process to take approximately 33 months from receipt of the application to the final Commission decision.

We hope you have found this letter to be informative. If you have any questions regarding this process, please contact Mike Scott, the Safety Project Manager for the North Anna ESP application, by e-mail at mls3@nrc.gov or by telephone at 301-415-1421. If you have questions regarding the environmental review, please contact Andy Kugler, the Environmental Project Manager for the North Anna ESP review, by e-mail at ajk1@nrc.gov or by telephone at 301-415-2828.

Sincerely,

/RA/

Office of Nuclear Reactor Regulation

Docket No. 52-008

November 28, 2003

Mr. Ed Fuzy, Director
Caroline County
P.O. Box 447
Bowling Green, VA 22427

Dear Mr. Fuzy:

The purpose of this letter is to inform you, as a public official who may have an interest in activities related to the North Anna Power Station, that the U.S. Nuclear Regulatory Commission (NRC) has received an application dated September 25, 2003, from Dominion Nuclear North Anna, LLC (Dominion NNA) for an early site permit (ESP). We have docketed this application (Docket No. 52-008) and would like to acquaint you with the major steps that lie ahead as the staff reviews it. The application is for a site, identified by Dominion NNA as the "North Anna ESP site," adjacent to the existing nuclear power plant units already operating on the North Anna site.

The NRC plans to hold an open house and public meeting on the scope of the environmental review associated with the application. The open house and public meeting will be held at the Louisa County Middle School on Monday, December 8, 2003. The open house will begin at 6:00 pm, to be followed by the public meeting at 7:00 pm.

Under the NRC's regulations in Part 52 of Title 10 of the *Code of Federal Regulations*, "Early Site Permits; Standard Design Certifications; and Combined Licenses for Nuclear Power Plants," the NRC can issue an ESP for approval of one or more sites for possible future construction of a nuclear power plant or plants. The term of an ESP may be up to 20 years. The ESP process can lead to resolution of site-related issues without the need for the applicant to expend substantial resources as would be necessary to seek a license to actually construct a nuclear power plant or plants. The NRC's review of an ESP addresses site safety issues, environmental protection issues, and plans for coping with emergencies, independent of the review of a specific nuclear plant design. Should an ESP be issued for the North Anna ESP site, it would resolve a certain set of those issues, independent of the review of a specific nuclear plant design. Dominion NNA could reference the ESP in seeking a license to construct or operate a nuclear power plant or plants on the site. We emphasize that an ESP, standing alone, does not authorize construction or operation of a nuclear power plant.

The NRC staff has begun a detailed technical review of the application, which will lead to the development of the NRC's safety evaluation report (SER). The SER will document the staff's review of whether Dominion NNA's proposed site is acceptable to host a nuclear power plant or plants. In addition, the NRC will develop an environmental impact statement (EIS) that will document the NRC staff's review of the application for environmental impacts associated with construction and operation of a nuclear power plant or plants at the site. At the December 8, 2003 meeting, interested persons will have the opportunity to comment on the scope of the issues to be considered in the staff's environmental impact statement. The public

will also have the opportunity to review and comment on the draft EIS after it is prepared in 2004.

In the near future, the NRC will also issue a *Federal Register* Notice and press release to announce the opportunity for persons whose interests may be affected to petition for leave to intervene in a hearing to be held after the completion of the staff's SER and EIS. After the *Federal Register* Notice is published, affected persons who wish to intervene will have 30 days in which to file such a petition in accordance with 10 CFR 2.714 as discussed in detail in the *Federal Register* Notice. An Atomic Safety and Licensing Board will be designated to preside over the hearing, consider evidence presented, and make findings on whether to issue an ESP to Dominion NNA. If the Board's findings support issuance of an ESP, they will also determine what conditions or limitations, if any, should be placed on it. The Commission will consider the staff recommendations and Board's findings in making its decision whether an ESP is to be issued. The NRC staff expects the process to take approximately 33 months from receipt of the application to the final Commission decision.

We hope you have found this letter to be informative. If you have any questions regarding this process, please contact Mike Scott, the Safety Project Manager for the North Anna ESP application, by e-mail at mls3@nrc.gov or by telephone at 301-415-1421. If you have questions regarding the environmental review, please contact Andy Kugler, the Environmental Project Manager for the North Anna ESP review, by e-mail at ajk1@nrc.gov or by telephone at 301-415-2828.

Sincerely,

/RA/

Docket No. 52-008

November 28, 2003

Mr. Michael M. Cline, State Coordinator
Virginia Department of Emergency Management
10501 Trade Court
Richmond, Virginia 23236-3713

Dear Mr. Cline:

The purpose of this letter is to inform you, as a public official who may have an interest in activities related to the North Anna Power Station, that the U.S. Nuclear Regulatory Commission (NRC) has received an application dated September 25, 2003, from Dominion Nuclear North Anna, LLC (Dominion NNA) for an early site permit (ESP). We have docketed this application (Docket No. 52-008) and would like to acquaint you with the major steps that lie ahead as the staff reviews it. The application is for a site, identified by Dominion NNA as the "North Anna ESP site," adjacent to the existing nuclear power plant units already operating on the North Anna site.

The NRC plans to hold an open house and public meeting on the scope of the environmental review associated with the application. The open house and public meeting will be held at the Louisa County Middle School on Monday, December 8, 2003. The open house will begin at 6:00 pm, to be followed by the public meeting at 7:00 pm.

Under the NRC's regulations in Part 52 of Title 10 of the *Code of Federal Regulations*, "Early Site Permits; Standard Design Certifications; and Combined Licenses for Nuclear Power Plants," the NRC can issue an ESP for approval of one or more sites for possible future construction of a nuclear power plant or plants. The term of an ESP may be up to 20 years. The ESP process can lead to resolution of site-related issues without the need for the applicant to expend substantial resources as would be necessary to seek a license to actually construct a nuclear power plant or plants. The NRC's review of an ESP addresses site safety issues, environmental protection issues, and plans for coping with emergencies, independent of the review of a specific nuclear plant design. Should an ESP be issued for the North Anna ESP site, it would resolve a certain set of those issues, independent of the review of a specific nuclear plant design. Dominion NNA could reference the ESP in seeking a license to construct or operate a nuclear power plant or plants on the site. We emphasize that an ESP, standing alone, does not authorize construction or operation of a nuclear power plant.

The NRC staff has begun a detailed technical review of the application, which will lead to the development of the NRC's safety evaluation report (SER). The SER will document the staff's review of whether Dominion NNA's proposed site is acceptable to host a nuclear power plant or plants. In addition, the NRC will develop an environmental impact statement (EIS) that will document the NRC staff's review of the application for environmental impacts associated with construction and operation of a nuclear power plant or plants at the site. At the December 8, 2003 meeting, interested persons will have the opportunity to comment on the scope of the issues to be considered in the staff's environmental impact statement. The public

will also have the opportunity to review and comment on the draft EIS after it is prepared in 2004.

In the near future, the NRC will also issue a *Federal Register* Notice and press release to announce the opportunity for persons whose interests may be affected to petition for leave to intervene in a hearing to be held after the completion of the staff's SER and EIS. After the *Federal Register* Notice is published, affected persons who wish to intervene will have 30 days in which to file such a petition in accordance with 10 CFR 2.714 as discussed in detail in the *Federal Register* Notice. An Atomic Safety and Licensing Board will be designated to preside over the hearing, consider evidence presented, and make findings on whether to issue an ESP to Dominion NNA. If the Board's findings support issuance of an ESP, they will also determine what conditions or limitations, if any, should be placed on it. The Commission will consider the staff recommendations and Board's findings in making its decision whether an ESP is to be issued. The NRC staff expects the process to take approximately 33 months from receipt of the application to the final Commission decision.

We hope you have found this letter to be informative. If you have any questions regarding this process, please contact Mike Scott, the Safety Project Manager for the North Anna ESP application, by e-mail at mls3@nrc.gov or by telephone at 301-415-1421. If you have questions regarding the environmental review, please contact Andy Kugler, the Environmental Project Manager for the North Anna ESP review, by e-mail at ajk1@nrc.gov or by telephone at 301-415-2828.

Sincerely,

/RA/
