- (5) A description of how your agency currently reports its use of voluntary consensus standards. Specifically, please provide your agency's answers to the following questions:

Does your federal agency report (a) only the first-time use of standards, (b) continued uses of standards, or (c) both first-time and continued uses of standards?

The NRC reports only the first-time use of standards.

- (6) Does your agency report (a) the total number of standards it uses or (b) each instance where the agency uses (i.e., references) a standard?

The NRC reports the total number of standards.

- (7) Does your agency report multiple editions of a single standard as one standard used or as multiple standards used?

Multiple standards – some standards are significantly changed from one version to the next. Hence, each revision is reviewed on its own merits.

- (8) Does your federal agency report standards that it uses for guidance purposes (as opposed to compliance purposes)?

Yes.

- (9) Does your agency report use of standards from non-ANSI-accredited standards developers including industry consortia?

No.

- (10) Identification of voluntary consensus standards that have been substituted by your agency for government-unique standards during the reporting period as a result of an agency review under section 15b(7) of the Circular.

None.

- (11) An evaluation of the effectiveness of Circular A-119 policy and any recommendations for changes to the Circular.

The NRC believes that the circular provides appropriate direction and encouragement for federal agencies to develop internal agency-wide guidelines. The circular also provides sufficient and reasonable flexibility for each agency to make an independent determination relative to participation on voluntary consensus standards bodies and use of developed standards.
