Bob

I reviewed your draft response to the CI and found it perfect. Look forward to the concurrence

I have attempted to draft a response to the individual for the Holtec/US Tool & die allegation, based on the notes you have provided. Please review the attached and let me know what changes may be necessary. We need to get this out as soon as possible.

Chris

The NMSS allegation coordinator, Bob O'Connell was using the info our inspection provided to respond to the allegor. At this time, I don't see a need for RIII to do an inspection. The allegor's future actions may change that but our request to examine the ComEd procedures need not be done.

Paul

Paul,

You initially requested RIII assistance for this one, but when I spoke to you after the inspection there, you thought it would not be necessary. Did your panel agree? I want to delete the AITS item we gave ourselves if so.

thanks

chris
