7/3/03

\* releasing plan = SECY-03-000 - 6/17/03 - released to public from Commission

- Scope: Help determine actions re: releasing

20: fire protection - 5 - determining human actions?

PRAB - provide "risk insights"; provide summary of FIRM IPEEE.

\* look at all avail. risk studies related to manual action in F. Prot. Area. "fire protection study" - initial literature search re: manual action in fire protection area.

These types of human actions = more risk - good ...

\* risk information = small part of input to overall effort.

\* some sort of "context" User Need written ?? < ??

\* insights report on fire risk < Easman mentioned - based on IP-EEG

=> NEI interested in "playing", now

\* PRAB = put together 'outline' for the effort.

0/53

\* provide some sources of literature

↓  
examples of risk studies

(All Qualls to provide)

→ identify plants taking these compensating actions → provide to

PRAB → PRAB to "ramp" these actions to IP-EC3/

insights report to see if there's risk-info available

\* AND = rich data source

= Schedule:

① Doctrine of fact = to be completed ~ 3 weeks (24th July)

- NEI wants to meet, now/

\* only will be "accepting" simple actions - not complex.
