LETTER NUMBER: 2.03.130

Dear Sir or Madam:

The purpose of this letter is to inform the NRC that Entergy is withdrawing the proposed License Amendment (Reference 1) to the Pilgrim Technical Specifications regarding the Post-Accident Monitoring Instrumentation Requirements and the supplements provided in References 2 to 4 (listed above).

A001

Subsequent to our submittals (References 1 to 4), the NRC published in the Federal Register a final rule regarding combustible gas control in containment, on September 16, 2003. In addition, on September 25, 2003, the NRC also published a notice of availability of a model application concerning technical specification improvements, including changes to the hydrogen and oxygen monitor requirements. Entergy will evaluate these Federal Register notices and utilize the information as appropriate.

There are no new commitments made in this letter. If you have any questions, please contact Mr. Bryan Ford 508-830-8403.

Sincerely,

Michael A. Balduzzi
