We request a 30-day extension to the announced 30-day public comment period for draft criteria published in the Federal Register [November 26, 2003, Vol. 68, No. 228, Page 66501-66503] that would codify currently non-compliant operator manual actions and forgive long standing and widespread fire protection violations at U.S. nuclear power stations. The extension is needed in order to allow the submission of meaningful comments.
