

SIM CALDWELL
U.S. NUCLEAR REGULATORY COMMISSION
801 WARRENVILLE ROAD
LISLE, IL
60532-4351

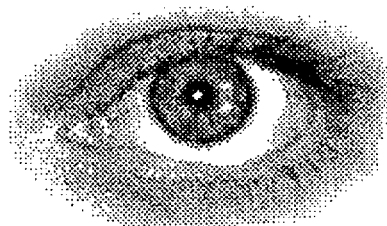

MR. CALDWELL,

I UNDERSTAND THAT THE
NUCLEAR POWER PLANT, DAVIS-BESSE,
HAS A COUNT OF 0 AND 2.

WILL THE THIRD STRIKE BE
OUR LAST?

SINCERELY,

GARY SHUSKEY

**Look me in the eye
and tell me Davis-Besse is safe**

Mr. Caldwell,

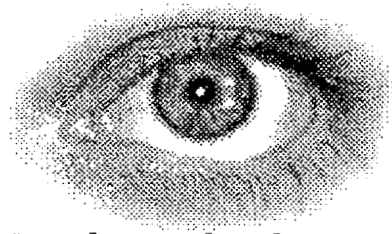

As a citizen of [REDACTED] and the mother of a 2 yr. old., I would hope you and the NRC would be concerned about the well-being and health of my family. Seeing that a melt down would cause irreversible damage to Lake Erie and could contaminate the drinking water that my child consumes - Please keep the Davis-Besse nuclear reactor closed. I hope you will do what is best for the public and not FirstEnergy's agenda. A response would be appreciated upon receipt. Samantha Hexenbaugh

**Look me in the eye
and tell me Davis-Besse is safe**

I am very concerned about our lake.
I get very livid as I consider
the fact that I can't even swim
in the lake, without the fear
of getting sick. I mean honestly,
this pollution is killing people.
So I really only have 1 thing
to say, Pollution is not the
way, we are not saving
our precious earth with
chemicals ~~there~~, we are destroying
it.

a concerned ~~pe~~ citizen,
Heather Hartley

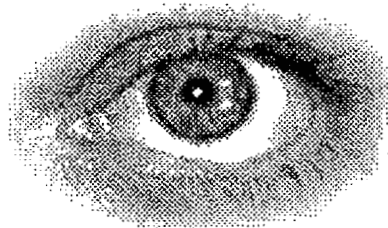

**Look me in the eye
and tell me Davis-Besse is safe**

With the recent eastcoast blackout
and the sudden shut-down of the
other nuclear power plants - Consider
what would have happened?

One meltdown would cause ~~devastation~~
devastation beyond things that most
of ~~us~~ could imagine. Davis-Besse
remaining closed gives most -
peace of mind. I know it

does for me - my concern is for
my children and the future
generations to come and their
survival.

**Look me in the eye
and tell me Davis-Besse is safe**

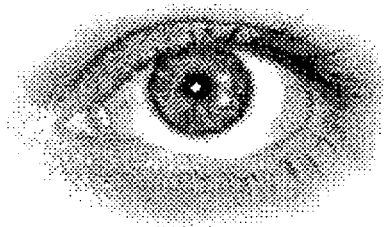

Mr. Caldwell,

I am writing this due to my concern over the safety of nuclear power plants, namely the Davis-Besse plant. I was astonished to hear about the condition of the Davis-Besse reactor, and its dangers towards the local communities. I am a young man in [REDACTED] and am looking to start a family in the near future. The thought of having unsafe power plants, which could effect my children's lives, frightens me. I don't think that finding cheaper ways to provide energy outweighs the risks. It is my hope that the NRC does its job and protects the people, not the plants. Thank you for your time.

Sincerely,

Dan Friedman

7/16/03

Look me in the eye
and tell me Davis-Besse is safe

Hello, Mr. Dyer:

I live in [REDACTED], Ohio with

my family (wife, 2 children & 2 Dogs). I am concerned w/my family's safety over a letter I rec'd on July 16, 2003 AT 6:30 A.M. The subject/topic of concern is a possible problem(s) exist at Davis-Besse Nuclear Power Plant. The NRC's top priority must be public safety / NOT First Energy's schedule, let alone Bank Balance. I am asking you to investigate all current problems that exist at Davis-Besse plant - while your investigation takes place, please keep the plant closed. The HEALTH, ECONOMICS AND ENVIRONMENTAL issues about Davis-Besse raise? Your NRC can explain. Please respond ASAP. Thank you

MIKE MORAN
[REDACTED]
[REDACTED]
[REDACTED]

Look me in the eye
and tell me Davis-Besse is safe

7/14/03

To: James E. Dyer

I live in [REDACTED] Ohio and consider
the Davis-Besse reactor a potential
hazard. It should not be reopened
under any circumstances.

July 16, 03

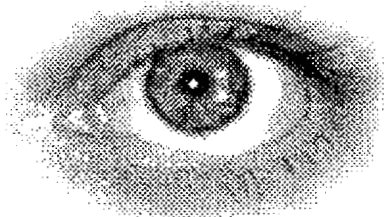

Look me in the eye

and tell me Davis-Besse is safe

I would like to start ~~my~~ saying,
I think it is a disgrace that the only way,
it seems, to get things stopped in our wild
new adage, is by a massive letter writing
campaign to state why we feel things
should not be done.

Instead, I would like to ask Mr.
James Dyer if he could give me 10
good guaranteed reasons why the
Davis-Besse nuclear plant should
remain open.

Would Mr. Dyer live with his
family in a 10-25 mile radius of a
nuclear power plant? If so, where, what
is the address? Would your work
on a daily basis be at some radius?
~~from your home~~ been made
about Davis-Besse since its conception,
and they have been unable to keep
them over and over, like in 1985 and
again in 2002. And, of course the
general population probably would
not know how many other times.

**Look me in the eye
and tell me Davis-Besse is safe**

Dear Mr. Ryan -

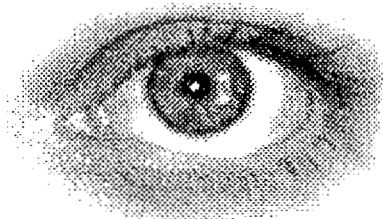

I live in [REDACTED] Ohio and am very concerned
of our safety. A melt-down at Davis-Besse would cause
irreversible damage to Lake Erie & potentially to the Great
Lakes system. The Lake provides drinking water for at
least 11 million people. You need to be aware of
public safety & not First Energy's schedule.

I am asking you to keep the Davis-Besse nuclear reactor
closed.

Thank you.

Luis Salazar

Mrs. Marie Dorazio
[REDACTED]
[REDACTED]

Jim Caldwell, Regional Administrator
U.S. Nuclear Regulatory Commission
801 Warrenville Road
Lisle IL 60532-4351

Mr. Caldwell,

I know in your position, you must believe that nuclear power is safe. You probably believe that the general public has been misled or deceived by a mostly biased television and newspaper media campaign. I am writing to tell you that I do not believe that I have been misled. I, like many other citizens in my neighborhood, feel that the Davis-Besse plant is grave disaster waiting to happen, again!

This facility's track record speaks for itself. People are human do make mistakes. Equipment does fail. It is inevitable, despite the greatest of Quality Assurance programs. Unfortunately, in a nuclear plant there is little margin for error. An accident at this facility would be devastating to this entire region of the country and for many generations to come.

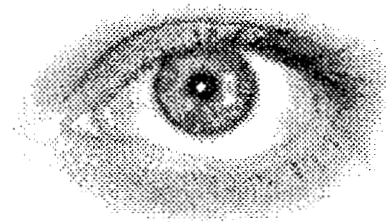

I shudder to think of the possibility of the ecosystem of the Great Lakes and surrounding farmlands being contaminated and unusable. I want to my children and grandchildren to know Cedar Point, Geneva-on-the-Lake, Put-in-Bay, the Ohio farmlands and the Amish country. I want them to be able to eat Ohio-grown produce, dairy and meats. I don't want these to become faded memories.

I am saddened at the thought of more friends and loved ones suffering the slow and painful death of cancer. If you have ever lost anyone to cancer, I don't need need to explain to you that "big business" should come second public safety.

Please use your position of power and keep Davis-Besse closed. I look forward to a response from you regarding this matter.

Sincerely,

Marie E. Dorazio

**Look me in the eye
and tell me Davis-Besse is safe**

25 July 2003

Jim Caldwell,

As you can tell from the letterhead, I am writing to address the condition of the Davis-Besse nuclear power station. I have already written your predecessor, Jim Dyer, about my concerns. The thing about him which impressed me was his statement of potential regret for approving Davis-Besse's restart in the case of a major accident. He did not want the responsibility for hundreds or thousands of lost or destroyed lives to rest upon his shoulders. Do you share a similar sense of conscience? I should hope so - I hold you personally responsible for the result of the restart of this reactor.

To this point, FirstEnergy has proven that their staff and management lack the ability to operate the plant in a safe fashion. In light of this, I offer you not a plea, but a directive - keep Davis-Besse closed! Neither I nor anyone in Ohio, the midwest, or indeed the whole of the United States is prepared to suffer the consequences of a nuclear accident. Do the proper thing Mr. Caldwell.

Thank you,

David E. Gee II

Look me in the eye

July 25, 2003

Dear Mr Caldwell,

It is with deep concern that I write you this letter about the Davis-Besse nuclear power plant. It is a threat to the lives of many people including yours and mine. I live in Ohio and so far our quality of life is wonderful, however if this power plant continues to operate, all that could be changed.

Just Energy's only concern is money and not the well being of personal life and/or the purity of the environment.

I implore you to keep the Davis-Besse nuclear reactor closed and ensure our quality of life and the purity of the earth.

Please respond to my requests and I pray you act in a responsible way.

Respectfully,

Josephine Dickey

801 Warrenville Rd.
Lisle, IL 60532-4351

July 24, 2003

Dear Mr. Caldwell,

My family lives in N.E. Ohio and the proximity of the Davis-Besse reactor is of concern, especially in light of the recent closing and safety concerns.

While utilizing methods which produce energy efficiently and cost effectively is certainly our goal, safety of life is of utmost importance. If, indeed Davis-Besse should have been closed prior to March 6, 2002 and the leak was detected earlier, it should be your Commission's responsibility to ensure that standards are being met.

Please ensure that this reactor remains closed until safety issues are addressed and the public can be guaranteed safety.

Thank you,

Geraldine A. Pallis

Re: Davis-Besse Nuclear facility & First Energy

Dear Sir;

My name is Elaine Dickon and I live in the [redacted] Ohio area. I am concerned about the March 6, 2002 hole (5. by 7-inch) discovered by employees. To me, whoever is responsible for the safe & efficient running of this plant should have closed it down until all necessary repairs were made in order to guarantee that no such accident happens in the future. If they do not comply with the will of the thousands of people who depend upon them, then you as our representative should use your authority to close the plant until there is assurance that no such "accident" can happen in the future.

I, speaking for many others, believe that nuclear energy is the most promising and dependable source of energy, at least for the near future, except for the following:

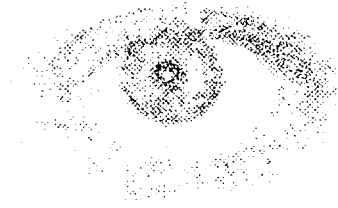

- 1) If the top priority is safety, not First Energy's schedule.
- 2) It considers & weighs the results of a possible meltdown and acts accordingly, rather than "putting a band-aid" on the problem.
- 3) The fact that public opinion, due to these accidents, turns away from the building of more facilities later on.
- 4) Bottom-line becomes more important than an efficiently-run plant.

I know you will do your best to represent not only the people of the Lake Erie Watershed, but the wonderful old Lake which can't speak for itself, and the precious land and air that will be affected.

Yours truly,
Elaine Dickon

[redacted]

P.S. I would appreciate an immediate response, so that I can pass along my confidence in the NRC to relatives, neighbors & friends

Jim Caldwell
Regional Administrator
U.S. Nuclear Regulatory Commission
801 Warrenville Road
Lisle, IL 60532-4351

Dear Mr. Caldwell:

The Davis-Besse nuclear power plant is NOT worth the risks to our environment, the economy, or the millions of people who would be affected ~~any more~~ should a meltdown occur. There have already been two near-disasters, and the third may be an actual disaster. How many chances is the NRC willing to take before it closes Davis-Besse down? How can you gamble with such enormous risks ~~on~~ on people's lives? This country is already suffering enough both economically and environmentally; and closing down Davis-Besse should be a good step

Look me in the eye
and tell me Davis-Besse is safe

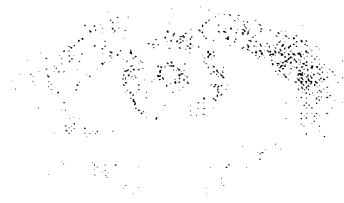

Dear Mr. Caldwell,

I am writing regarding the Davis-Besse nuclear plant, I have heard that it is not safe. I would very much like for you to shut the reactor down and put safety as the first priority. Being a man with a family, I am concerned not only for my family's safety, but also the other people in that area with families of their own. Are you a family man, Mr. Caldwell I hope so, and thus I hope that you will empathize with my situation, as well as the thousands of other people that this will affect. May God bless your actions and may you make good choices.

Sincerely,

Brian Helling, 11/14/74

P.S. Please let me know what your response is.

Look me in the eye
and tell me Davis-Besse is safe

Mr. Calanell,

My family lives in [REDACTED] Ohio and we are very concerned about the safety of our environment and the effects of any nuclear reactor being opened.

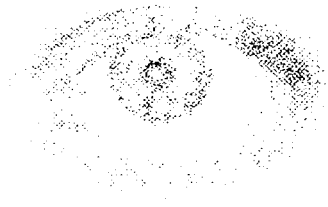

I believe that the most important and very top priority of the NRC is to ensure PUBLIC safety, not interests of big business. Please keep the Davis-Besse nuclear reactor closed. It is in the best interest of all to do so.

Thank you for your very prompt attention to this matter.

Sincerely,

Franklin D. [REDACTED]

To Jim Caldwell - NRC

I live in [redacted] Oh. and am really concerned with the attitude of the legislature of Ohio. As usual it is politically motivated without any concern for the citizens of the state. We, over the years have put up with neglect by the partisan members of our republican state congress as well as our Senators Voinovich and Doldine who have let our state ~~to deteriorate~~ deteriorate into an abysmal state of condition.

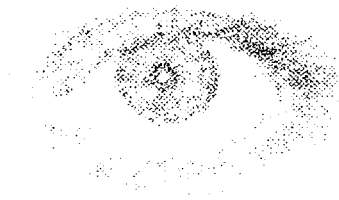

The carelessness and lack of concern for the workers of the Davis-Besse plant as well of the citizens of Ohio is a typical example of the attitude of the rich stockholders of the nation and the present administration of our nation.

~~Conclusion~~ Conclusion - Most people in Northwestern Ohio are as hell because of the lack of moral attitude of our legislative govt.

and tell me Davis-Besse is safe**

James Dyer:

This letter is to inform you that as a resident of the State of Ohio and of this country, I am extremely concerned about the Davis-Besse nuclear power plant and want it to be closed indefinitely. What kind of legacy do you want to leave for the future generations of this country? I hope for clean water to drink, clean air to breathe and healthy food for my children - do you really hope for contaminated soil and cancerous water? Even if you do not live near the power plant you are not immune to the cancer & genetic deficiencies an overlooked problem would cause. Don't forget that Ohio grows a lot of the food that ends up on the tables of families all across this country. What leaks into our soil & water is what is in many of your foods. Think about it. Keep this plant closed, there are better alternatives.

Sincerely,

Rachel McLintock

Please Respond to

Rachel McLintock

Lisle, IL 60532-4351

Dear Mr. Caldwell,

I'm writing to express my concern regarding the Davis-Besse nuclear power plant. I am VERY concerned with the two near-disasters that have occurred in the last 18 years, with the most recent one being in March 2002.

I frequently travel to the Great Lakes area for work and tourism and want to know that I am safe in so. The NRC's **TOP** priority should be public safety and NOT First Energy's schedule!

PLEASE keep the Davis-Besse nuclear reactor CLOSED!

I look forward to hearing from you!

Respectfully,

Susan Meeks

RE: Davis-Besse Nuclear Reactor

Dear Sir:

I am writing to ask that you keep the Davis-Besse nuclear reactor closed. In my opinion, the power plant is a ticking bomb. I am a [REDACTED] year old woman living in [REDACTED] Ohio. I have lived here since 1969. I have never felt safe since the plant opened. There has been shut-down after shut-down since it opened. The latest fiasco was last year when a hole was found on the reactor due to corrosion. If this had caused a meltdown, our entire area would be contaminated. Look at Chernobyl in Russia. There are still deaths occurring to people exposed during the fire there. The land there is unusable. In the case of Chernobyl, the area affected was mainly farmland. With Davis-Besse, you have one of the most populated areas in the state of Ohio along the north coast of Lake Erie. Not to mention the Lake and tributary rivers. This is our drinking water. This is a food supply and tourist area.

The job of the NRC is public safety first and foremost. It should not be your job to rubber stamp Toledo Edison and First Energy's every request. This plant has never been and never will be safe. Please keep it closed forever.

Jeri Ann Waltrip

James E. Dyer, Regional Administrator
U.S. Nuclear Regulatory Commission
801 Warrensville Road
Lisle, IL 60532-4315

Dear Mr. Dyer:

I am writing as a citizen of [REDACTED] Ohio, to express my concern about the possible re-opening of the Davis-Besse nuclear power plant. In March 2002, there was very nearly a serious accident when a hole, that had been ignored, was discovered on a reactor. I, along with my neighbors and friends, am concerned about public safety as well as potential damage to Lake Erie and the freshwater system of our Great Lakes. Lake Erie, alone, provides drinking water for eleven million people.

I urge you to keep the Davis Besse reactor closed. Safety and health are of prime importance. Please let me know your reactions and what you plan to do.

Sincerely,

Gloria Brangwynne

Gloria Brangwynne

DEAR MR. DYER,

I AM A RESIDENT OF [REDACTED]
[REDACTED] OHIO. I REQUIRE THE WATERS
OF LAKE ERIE FOR MY EVERYDAY USE,
AS DO MY CHILDREN AND GRANDCHILDREN.
THE MERE THOUGHT OF HAVING OUR
PRECIOUS WATER SYSTEM AND HOMELAND
CONTAMINATED DUE TO A NUCLEAR
MELTDOWN AT DAVIS-BESSE IS DEVAS-
TATING. PUBLIC SAFETY MUST BE
THE TOP PRIORITY OF THE NUCLEAR
REGULATORY COMMISSION. ISN'T THERE
ENOUGH DESTRUCTION IN THIS WORLD?
By RE-OPENING THE DAVIS-BESSE
NUCLEAR REACTOR YOU ARE OPENING
A WINDOW FOR DISASTER. I IMPLORE
YOU, MR. DYER PLEASE KEEP THE
DAVIS-BESSE NUCLEAR REACTOR CLOSED.
PLEASE, FOR MY FAMILY AND YOURS.

SINCERELY,
SUSAN VETOVITZ
[REDACTED]
[REDACTED]

Mr. Caldwell:

July 16, 2003

There have been two instances where the Davis-Besse Nuclear power plant has been shut down due to failures that could have been catastrophic.

Fortunately for the people living in the surrounding areas, the plant was shut down in time and repairs made. Just how many instances do we have to say that the reactor should be shut down indefinitely ? We are not only talking about the health of the people but the contamination of the Great Lakes which provides drinking water for millions of people..These lakes are not replaceable. The time to act is now before a meltdown occurs.

I do hope for a response to this plea.

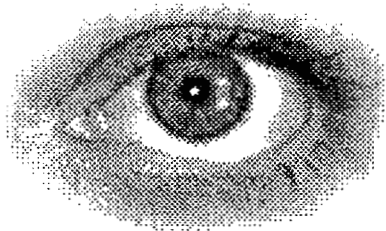

Thank you:

William Rousis

[REDACTED]

[redacted], OH.

Look me in the eye

[redacted] me Davis-Besse is safe

Attention: Mr. Jim Caldwell, NCR

I live very close to Lake Erie, Erie County, in [redacted], Ohio. and am very concerned about the safety of the water in Great Lakes Water System. There is danger to eleven million people in the area of Davis-Besse. Lives, money, etc.

The NCR's top priority should be for public safety, not First Energy's schedule.

If people were wiped out there wouldn't be anybody for First Energy to serve!

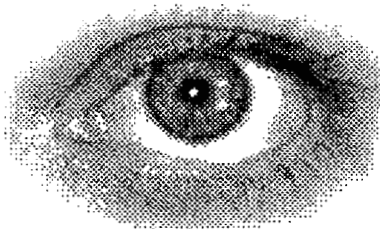

If there's any way possible we hope and pray that Davis-Besse Nuclear Reactor be remained closed forever! -

My friends and I drove by Davis-Besse the other day and the reactor looks very much in disrepair.

Please do not try to rebuild, repair, etc. for the sake of the whole Great Lakes System! Not only would the water be contaminated, but just think of the illness killing or maiming of millions of innocent people -
Please have mercy on us people, living on

[REDACTED]
Davis Besse,

We are the Calveys and I (Jackie) am concerned for our safety because I need to feel secure, not always worried if something will happen in my community. My cousins/family always play out-side and I don't know what I would do with-out them. You should be worried about public safety, not just about what First Energys schedule is, because you just might save an innocents life. Maybe for the safety of our public, you could keep the Davis-Besse nuclear closed. I am not demanding but highly suggesting this. IF you want to respond, my name is Jackie Calvey, an [REDACTED] year old. My address is [REDACTED] respond

Look me in the eye
and tell me Davis-Besse is safe

July 26, 2003

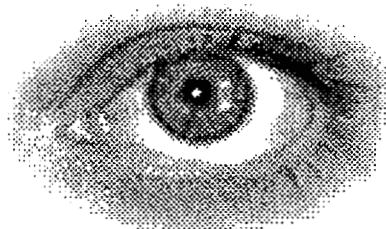

Dear Mr. Caldwell,

I rarely write to public officials, but
grave concerns over safety issues at The
Davis-Besse nuclear power plant prompt this
letter. I write today as a parent and an
educator, and speak for a generation of
children who are not yet able to.

Davis-Besse has a history of near-
disasters, and steps taken so far to assure
the safety of the plant have been less than
adequate. An actual meltdown would have
tragic repercussions, impacting economic
stability, environmental damage, and, most
tragically, ~~for~~ human fatalities due to
radiation exposure.

Please use your authority to keep
Davis-Besse closed. Thank you for your
time and attention.

Look me in the eye
and tell me Davis-Besse is safe

7/18/03

To Whom it may concern - Jim Caldwell

I'm a [REDACTED] resident with 4 children

My safety is your concern not First Energy's schedule
Davis-Besse should remain closed till i'm safe.

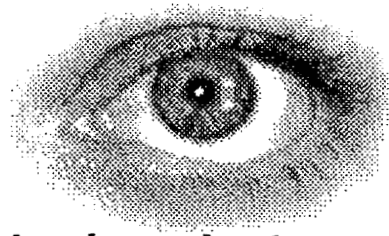

Can you assure me it's never to reopen until
the public is 100% out of danger?

Thank for

Don O'Malley

[REDACTED]

[REDACTED]

**Look me in the eye
and tell me Davis-Besse is safe**

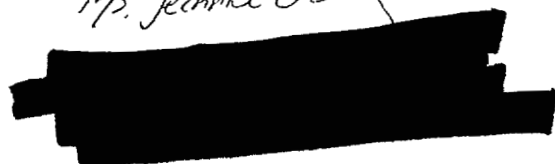

Dr. Mr. James Dyer,

I am a resident of the city of [REDACTED] and have been made aware of the possible disasters that may occur with the reopening of the Davis-Besse Nuclear power plant. As a homeowner near Lake Erie I am very concerned about the potential hazards and contamination of our waters. Lake Erie is the greatest asset we have in Northern Ohio. Please keep public safety your number one priority when considering the re-opening of Davis-Besse. I'm tired of the mighty dollar being the driving force behind bad choices regarding our environment. Please let the citizens of our community know they matter the most.

Sincerely,
M. Perry

22 July 2003

Ms. Jeannie Berry

Mr. Jim Goldwell, Regional Administrator
U.S. Nuclear Regulatory Commission
801 Wrensville Road
Lisle, IL 60532-4351

Dear Mr. Goldwell-

I am very concerned with the history of failure at the
Dow-Besse nuclear reactor and would like it to remain
closed. I do not feel that the benefits outweigh the man-
risk associated with a possible disaster and I do not
feel that the precautions taken have been sufficient. I believe
that the NRC's top priority must be public safety, so it must
remain closed.

I look forward to hearing back from you at the above
address. Thank you, in advance, for your consideration
of my concerns. (Please note that I have 2 children who
are the way - so I am concerned for their future!)

Sincerely,

Jeannie M. Berry

July 21, 2003

Dear Mr. Caldwell:

Just want to make sure that you are doing all you can to keep the Davis-Besse nuclear reactor closed. As you know NRC's top priority must be public safety and not compliance to another company's schedule such as FirstEnergy which is the company that is opposing this. We live at the following address:

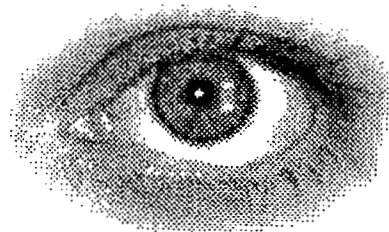

[REDACTED]

We are concerned that the community could have some serious health consequences if the Davis-Besse nuclear reactor is not kept closed.

Appreciate your prompt consideration to this issue.

Joel P. & Barbara A. Bruno

[REDACTED]

and tell me Davis-Besse is safe**

Jim Caldwell, Regional Administrator
U.S. Nuclear Regulatory Commission
801 Warrenville Road
Lisle, IL 60532-4351

22 July, 2003

Dear Sir,

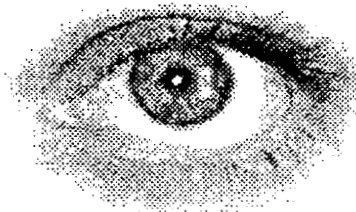

I am writing to express my concerns about the Davis-Besse Nuclear Power Plant operated by First Energy of Ohio. I understand that the plant has been closed since the "acid accident" over a year ago. I think that the plant should remain closed. The fact that this accident happened in the first place shows that First Energy is not taking seriously its responsibility with regard to the environment, the community, and future generations. If the plant is permanently closed it is certain that Ohio citizens will be better protected. If re-opened it is certain that accidents like the most recent one will occur again.

I live in [REDACTED], Ohio, a suburb of Cleveland. While it is unlikely that a minor leak at Davis-Besse would impact my family immediately we still pay the price of the day-to-day operations of the plant through higher electricity costs (I am factoring in the costs of waste disposal which each taxpayer is being forced to cover). My son will certainly be paying for the cost of nuclear power through his entire adulthood. I feel that I must do what I can to help reduce his nuclear burden and to protect his children from the long-range effects of radiation exposure.

Nuclear power is an insane solution to the problem of boiling water for power generation. PLEASE keep Davis-Besse closed.

With Respect, in Gentleness and Peace

John Storhm

Lisle, IL 60532-4351

Mr. Caldwell,

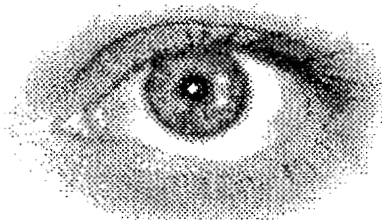

As a current resident of [REDACTED], OH, I am gravely concerned about the condition of the Davis-Besse nuclear power plant. I am writing you this letter to urge you to keep this facility closed. The plant itself is in dreadful condition, and as a resident of the area I fear that my safety as well as others is in great danger. You must know as the Regional Administrator of the NRC that it is your civic duty to realize that public safety is the zenith in making important decisions concerning nuclear facilities. Please I urge you to consider keeping David-Besse closed, for the publics' sake. I thank you for taking the time to read this letter and I hope to hear an immediate response from you on this very serious issue at hand.

Sincerely,

Keith B. Estes

**Look me in the eye
and tell me Davis-Besse is safe**

Dear Mr. Caldwell,

My name is Michael Malinak. I live at [REDACTED]
[REDACTED] [REDACTED] I am in a severe
state of confusion over why Davis-Besse is still being considered
a plant that can be operational as a nuclear facility.
I am sure if you read all of your files on Davis-Besse,
the obvious will stand out. The obvious is First Energy's lack
of concern for the safety of my friends, family, and myself.
I would really hate to see everyone I know die, if not instantly,
then slowly over the next 30 years because First Energy is
concerned about profits and not safety. If you say Davis Besse
is safe to start and something goes wrong, I would like
you to come to my house, look me in the eye, then tell me
it is safe. Please make the right decision. Keep
Davis Besse closed!

Concerned Citizen,
Michael Malinak

P.S.
Please keep in mind that
the NRC's top priority should
be Public Safety NOT First
Energy's Schedule.

**Look me in the eye
and tell me Davis-Besse is safe**

Dear Jim Coldwell,

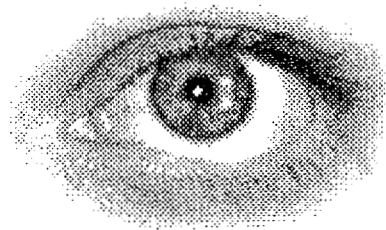

My family lives here in [REDACTED] OHIO. I am very concerned with the Davis-Besse reactor site being so close to home. I understand in great detail how reactors operate, I am not happy to hear of the 2 incidents that have occurred in the past. It's making me think twice before buying or building in the [REDACTED] area. It is such a nice community. I am renting here for 3 years now. I would hate to see this community diminish because of business politics. For safety sake keep the reactor closed. would you live here? would you raise your family here? what's my families health going to be like in 30 years from now. Keep us safe + healthy. Please respond quickly, there's no time to waste.

Thank You,
Jim McElcar
[REDACTED]

To Whom It May Concern,

My family and I live in [REDACTED], OH.
My husband was diagnosed with cancer
when my oldest daughter was only two years
old. Until you experience the ordeal we went
through you will never know why it is so
important to be concerned about things like
what you are doing. Please keep the David-Besse
nuclear reactor closed. You don't want to see
the results if you do not and someone else is
put in danger, especially if this time it
becomes you or one of your family members.
I know. We experienced it. We still don't know
what caused my husband's cancer, but I certainly
wouldn't tempt God by your lack of concern,
because things have a funny way of working
out like that. Please respond to this letter.

The Parsons Family
[REDACTED]

Look me in the eye
and tell me Davis-Besse is safe

Dear Mr. Caldwell,

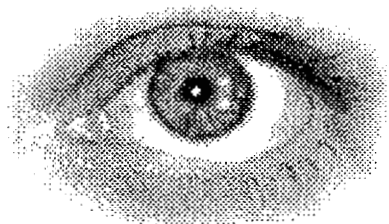

I am writing to you concerning the Davis-Besse nuclear power plant. My children attend colleges in the Cleveland area & their safety is of great concern to me.

Being that the Davis-Besse nuclear power plant has had two near disasters, I feel the dangers of this plant far outweigh any benefits. Public safety must be put ahead of big business interests.

Please do what is right and keep this plant closed.

Sincerely,
Fori Gill

Look me in the eye
and tell me Davis-Besse is safe

My family & I live in [REDACTED] Ohio, and we are concerned with the problems and disasters that can occur from nuclear power. In the long run it would not only affect surrounding areas, but all of us at some point. We have other means of producing electricity and first energy might want to look into that with all the profit they make. And be more concerned with their customers, after all were why they have a business.

Lisle, IL 60532-4531

Dear Mr. Dyer,

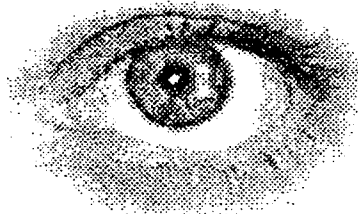

I am writing to you to express my concern over the potential for continued operation of the Davis-Besse nuclear power plant here in Ohio. I am deeply concerned that the Davis-Besse power plant is no longer a sustainable facility for the production of safe, clean, and reliable nuclear power. I live in [REDACTED] Ohio, and work in Lyndhurst, both cities well within the range of Davis-Besse's potential danger zone. If this power-plant is allowed to continue operations, it will be a horrible mistake on the part of the NRC.

Please do all in your power to see that the safety of the public remains the top priority of the NRC. Keep Davis-Besse closed, and keep our communities safe. Thank you for your consideration of my opinion on this important issue. I look forward to hearing of your action in this matter.

Sincerely,

Megan Eckner

Mr. Caldwell,

I live in a small suburb
of [REDACTED] Ohio, called [REDACTED] I am
concerned for the safety of my family &
neighbors.

If the Davis-Besse plant has had
all the problems with its reactors please
keep it closed. Public Safety not
First Energy's schedule should be a top
Priority.

Robert B. Thompson
[REDACTED]
[REDACTED]
[REDACTED]

Look me in the eye
and tell me Davis-Besse is safe

Jim Caldwell,

I am writing this letter for my family and I to urge you to
keep the DAVIS-Besse nuclear reactor closed.

In light of the recent incident at the nuclear
power plant on March 6th 2002 and its prior
track record in 1985, I cannot express enough
the need for this plant to stay closed.

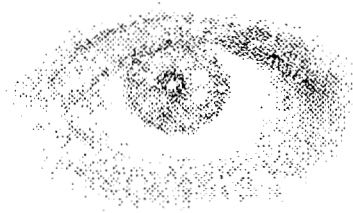

I am advocate of Alternative Energy sources, but
not at the sacrifice of my family, community and
STATE.

Until the day comes when a 100% ~~GUARANTEE~~ ^{GUARANTEE} CAN BE GIVEN
there are too many concerns that surround the
need for this reactor to be closed. Health care cost,
Reconstruction costs, property lost and environmental
are only a few of the impacts that would result
from a catastrophe at the DAVIS-BESSE PLANT.

THANK YOU for taking the time to listen to my concerns
and the efforts taken By OHIO Citizen Action to ensure
a better AND SAFER tomorrow. I look forward to hearing
from you. ROBERT & RENEE SCHOSKEK

DAVIS-BESSE NUCLEAR POWER PLANT

Dear Mr. Caldwell:

We live in [REDACTED] Ohio, a village of nearly 4,000 residents [REDACTED] in Wayne County. Wherever health and safety are concerned, we are, as hopefully all the rest of us are here in this country.

Let's look at the three main factors affecting us: 1) our health; 2) our economy; and finally, 3) our environment...

Back in 1982 a study was made for the NRC and it was estimated that a core meltdown at Davis-Besse would cause...

- 10,000 cancer deaths over the lifetime of the exposed population, with the exception of leukemia which will occur within 30 years of the accident (in just a few short years that time will be upon us).
- 1,400 early fatalities due to radiation exposure from causes other than cancer within one year of the accident.
- 73,000 early radiation-related injuries within one year of the accident which require hospital treatment or medical attention.

This data accounts for only those who live within a 25-mile radius of the plant. In the event of an actual accident, these numbers could be much higher.

This same study found that a meltdown at Davis-Besse would cause \$84 billion in damages in 1982 dollars...that's \$159 billion in current dollars!

This figure does not include health care costs to the affected population, lost wages, relocation expenses, decontamination costs, or lost property and farmland.

In addition, an accident at Davis-Besse could destroy Lake Erie which is essential to Ohio's tourist, fishing and agricultural industries. For example, Ohio's seven lakeshore counties earned \$7.4 billion from travel and tourism in 1999.

A meltdown at Davis-Besse would cause irreversible damage to Lake Erie and potentially the Great Lakes system...the largest freshwater system in the world. Twelve million people live in the Lake Erie watershed, including seventeen metropolitan areas with more than 50,000 residents. The lake provides drinking water for eleven million of these people.

With all these thoughts, **please** let's keep our public safe...that should be the focus here, not FirstEnergy's schedule! **Request that you keep the Davis-Besse nuclear reactor closed.**

We would appreciate your thoughts on this. May we hear from you soon?

Respectfully,

Glen & Beverly Rufener

Mr. Jim Caldwell
United State NRC
801 Warrenville Rd
Lisle IL 60532-4351

Dear Mr. Caldwell:

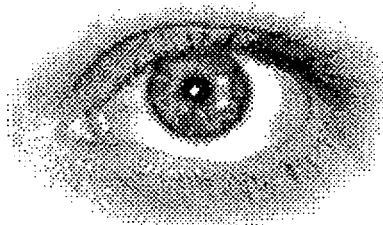

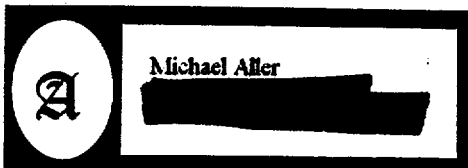

Davis-Besse was a bad idea when it was built – though we didn't know then just how bad an idea. Now we do.

I have a young godson living downwind from Three Mile Island and he's just now old enough to learn what happened there. He is terrified, not only that another accident could happen, but also because such plants are targets.

Keep Davis-Besse closed. One step at a time, close these dinosaurs.

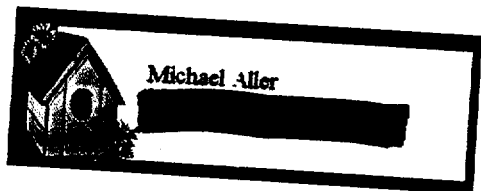

Respectfully,

Wayne H. Thayer

Look me in the eye
and tell me Davis-Besse is safe

TO JIM CALDWELL,
KEEP IN MIND THE SAFETY ASPECT
OF THIS NUC PLANT AT ALL TIMES, WE ARE
MOSTLY CONCERNED ABOUT THE PUBLIC SAFETY
OF THIS PLANT AND SO FORTH.
WOULD YOU KEEP US INFORMED OF THE
STATUS OF THIS PLANT.

THANKS,
Mike

Dear Mr Colwell,

I live in [REDACTED] Office not too far from the power plant. Because of the neglect of the Davis Bessie plant I feel it should be closed.

Public Safety is always come first as well as the environment of our area. Cutting corners on the upkeep of this place has resulted in all this.

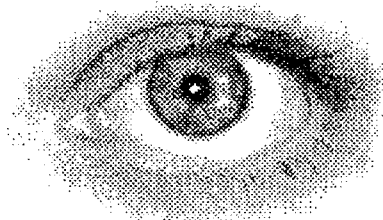

Corporate America only really cares about profit #1 and only.

I am looking forward to a response.

Sincerely

Marty Gauer

**Look me in the eye
and tell me Davis-Besse is safe**

Dear Jim Caldwell,

I was approached by the Ohio Citizen Action group for funds to keep Davis Besse closed. I have read their information on the possible outcome of an accident. They seem catastrophic but to make an educated decision I need to know exactly what Davis Besse does. With any nuclear power plant problems can be devastating but to make progress in society sometimes those risks can make life better. I would like to see the highest safety precautions but am not sure on the closure of the plant. Send me information so that I can be informed on what Davis Besse does the benefits the problems that may happen and what's being done to prevent that.

Jim Caldwell, Regional Administrator
U.S. Nuclear Regulatory Commission
801 Warrenville Road
Lisle, IL 60532-4351

Dear Mr. Caldwell

The Davis-Besse nuclear power plant has had two near-disasters. After the first in 1985, FirstEnergy, the plant's owner, and the Nuclear Regulatory Commission (NRC) went to great lengths to assure that Davis-Besse would never come that close to disaster again. They failed.

On March 6, 2002, Davis-Besse employees discovered a 5-by-7 inch hole on the cracked reactor. Boric acid had leaked through cracked pipes and eaten through six inches of carbon steel, leaving only three-eighths of an inch of a stainless steel cladding to seal the reactor.

Had the hole burst, the emergency cooling system would not have worked which would have lead to a meltdown.

The dangers of Davis-Besse far outweigh any benefits and leads to the question, "Is it all worth it?"

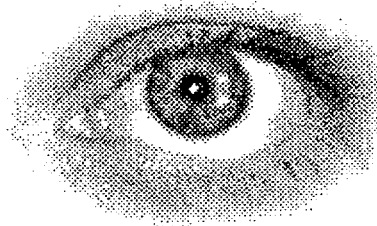

Our family is very concerned about this potential disaster. We live in [REDACTED], Ohio where this does effect everyone in our community.

The NRC's top priority should be public safety and not FirstEnergy's schedule. We urge you to keep the Davis-Besse reactor closed.

Sincerely

Melissa Gradwohl

RE: Davis-Besse Nuclear Reactor
Dear Sir:

I was visited, today, by three young individuals from the Ohio Citizen Action group in my hometown of [REDACTED]. What they had to say was pretty disturbing. As I am from [REDACTED] the Pickering Nuclear Generating Station, I am familiar with the controversy surrounding the Nuclear Safety Issue. Frankly, I'm not sure which is worse, having the government run these facilities with their bureaucracy and inefficiencies or the private sector with their sight on the bottom line. Neither seems to place public safety and concern as a top priority.

Unless you can guarantee that the Davis-Besse nuclear reactor can operate as 100% safe, I can only hope that you feel, as many of us do, that this issue needs to be addressed responsibly. I trust you will take into consideration first, the safety of those families that are affected by the reactor the most. Namely, the towns and cities that surround it. Let First Energy, with all its resources, search for the most efficient and safe source of energy for Ohio.

Sincerely,

Lorraine Read
[REDACTED]
[REDACTED]

August 13, 2003

Dear Mr. Caldwell,

My family and I live in [REDACTED]
We have grave concerns about the safety of
Davis-Besse nuclear plant. As you know
in March of 2002 there was a near disaster
which could have had severe health, environmental
and economic damages. Please make NRC's
top priority public safety! Keep Davis-Besse
nuclear reactor closed!

Thank you for your time and I hope
and pray you will consider my plea. I
look forward to an immediate reply.

Sincerely,

Ann Scherma

8-12-03

TO: JIM CALDWELL / REGIONAL ADMINISTRATOR
FR: MICHAEL + MICHELLE GUYOT

Regarding the NRC and the Davis-Besse issue, we are very adamant about keeping the plant closed. We feel this way because, obviously, we care about personal safety and public safety. It is totally inexcusable for "public safety" officials in such a crucial position to be so lax in their obligations to the public. We live in a safe, hopefully, suburb -- Strongsville -- and yet know that the importance of the issue is to safeguard every person's / suburb's / community's safety.

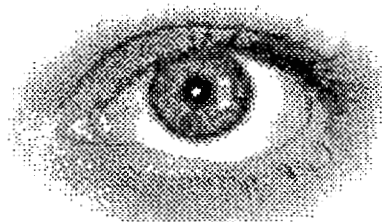

Forget about the energy company's concerns.

This is about people.

Please keep the Davis-Besse nuclear reactor closed

Please also respond to our common plea --
Michael + Michelle Guyot

[REDACTED]

Jim Caldwell
Regional Administrator
U.S. Nuclear Regulatory Commission
801 Warrenville Road
Lisle, IL 60532

Mr. Caldwell,

My name is Mike Ackermann and I and my children live in [REDACTED]

Even though we live about [REDACTED] from Lake Erie, the children and I frequently use the lake or are near the lake for recreation. It is unbelievable to hear about holes rusted in the reactor. I am concerned about what would happen to Lake Erie if an accident occurred. Considering that the Great Lakes are the largest source of freshwater in the world, shouldn't we do our best to protect it?

I urge you to take appropriate action and shut down the Davis-Besse reactor and remove its enormous threat from our area.

I look forward to your response.

Sincerely,

A handwritten signature in black ink, appearing to read 'Michael Ackermann', followed by a long horizontal line extending to the right.

Michael Ackermann

Lisle, IL 60532-4351 -

N.S. Hapsonowicz
~~_____~~
~~_____~~
~~_____~~

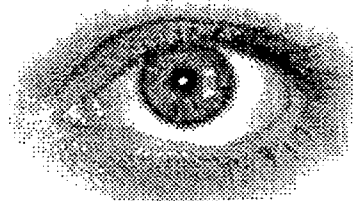

Dear Sir —

In our opinion, Davis-Besse has been "a disaster waiting to happen" ... for many years. I do not need to itemize the Health & Economic issues related to a possible melt-down (or even, a moderate accident) at Davis-Besse.

The consequences for our area would be devastating both in human suffering and economic repercussions for decades to come.

We want this reactor to remain closed. It is not feasible to re-open it in view of the Potential consequences

Sincerely,
Mrs. N.S. Hapsonowicz

U.S. Nuclear Regulatory Commission
801 Warrenville Road
Lisle, IL 60532-4351

Dear Mr. Caldwell:

Living in [REDACTED], my family and I are down wind of the Davis-Besse Nuclear Power Plant. In addition, we travel quite often along [REDACTED], which passes immediately next to the plant.

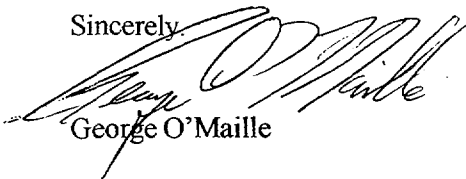

We have had deep concerns for over a year regarding the safety of the plant and the concern (or lack thereof) exhibited by the First Energy Corporation.

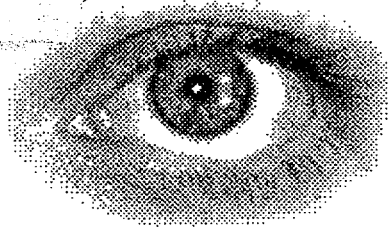

The extreme danger posed by this mismanaged and ill-maintained plant should be also of the highest concern of you and your commission.

I strongly urge you to keep the plant closed for the foreseeable future and to NEVER allow it to restart under the management of First Energy.

Thank you for your concern.

Sincerely,

George O'Maille

Look me in the eye
and tell me Davis-Besse is safe

With all the things going on
in this world today. I beleive
the public safty every where
not just here in the Canton
Ohio area should be
top priority.

[REDACTED]
Jim Caldwell, Regional Administrator
U.S. Nuclear Regulatory Commission
801 Warrenville Road
Lisle, IL 60532-4351

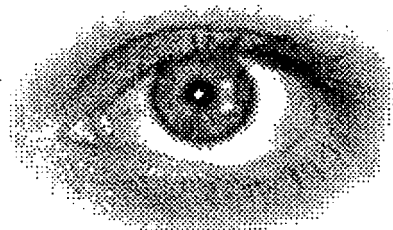

Dear Mr. Caldwell:

I live in [REDACTED] and I am very concerned for my family's safety because of the Davis-Beese nuclear power plant two near disasters. I would hope that you would help to keep the Davis-Beese nuclear reactor closed. This should be the NRC's top priority, because of the threat to public safety and the health of millions of families, not just the Murdock family. I would appreciate an immediate response to my letter, as I will be keeping a close watch on your action. As my family and I are avid fishermen, we have great concern for the safety of our beautiful Lake Erie. Please listen and keep Davis-Beese closed.

Sincerely,

Katherine A. Murdock

Katherine A. Murdock

Look me in the eye
and tell me Davis-Besse is safe

Dear Sir:

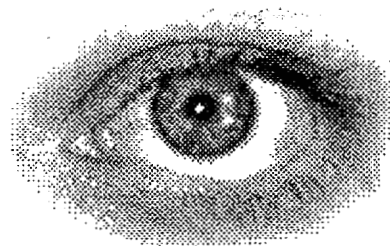

We live in [REDACTED]. We

are very concerned of good air. The
top concerned should be the public not
the Energy's Co.

Keep Davis-Besse nuclear closed.
We are also worried about our drinking
water.

PS
Please response
about Davis Besse nuclear plant
Thank you.

August 13, 2003

Dear Jim Caldwell,

I am writing to tell you that I am concerned about the safety of Ohio's citizens because of the problems at the Davis-Besse Nuclear Plant. I would hope that you would look out for the best interests of Ohioans that live near or work in the Plant. Please do not operate the reactor until it is safe to do so. In the difficult economy, I realize it is no fun to keep a plant closed and thousands out of work. That is why I urge you to do your job; fix the problems at the plant so that Ohioans can be safe, and so that the Davis-Besse employees can return to their jobs and support their families. I live in Cantfield, Ohio, in Mahoning County. Please respond immediately. Sincerely, Nikki Hershfeldt

Jim Caldwell, Regional Administrator
U.S. Nuclear Regulatory Commission
801 Warrenville Road
Lisle, IL 60532-4351

July 22, 2003

Dear Mr. Caldwell,

I am writing on behalf of myself, my family and neighbors about our grave concerns about the safety of the Davis Besse nuclear power plant. I live in [REDACTED], downwind from this nuclear power plant on Lake Erie.

It has been reported that a softball sized erosion in the steel barrier sealing the reactor caused by leaking boric acid was discovered by Davis-Besse workers in March 2002. It terrifies me to think of the consequences had a hole burst through this and threatened the emergency cooling system and led to a meltdown. The human, environmental and economic consequences could have been catastrophic. The disaster would have far exceeded Three Mile Island. Radiation carried by the winds would have affected all of northern Ohio, including my community, and radiation collected in Lake Erie would have generated a crippling ecologic disaster to this important lake.

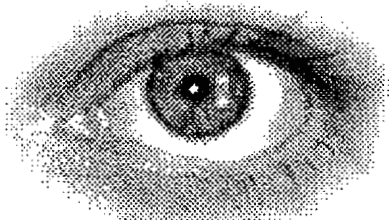

The more recent reports that protective safety valves in the emergency cooling system have been frozen for over a decade and the failure to institute serious protections against terrorism only adds to my lack of trust and confidence in the management of this 'disaster waiting to happen'. I implore you to put the safety of the people of this state and country at the fore in any considerations to reopen this damaged plant. Please remember it is the people you must serve and answer to, not the bottom line at First Energy.

Keep Davis-Besse closed. The fallout to our medical, economic, environmental, and social health is too risky.

Please write to explain your stance on this critical issue. Hopefully your position on this will be both genuine and reassuring.

Sincerely,

Joseph F Marino

Dear Mr. Dyer:

I am concerned for the safety of my family and loved ones who live in this area. We live only and [REDACTED] away from Lake Erie and [REDACTED] away from the Davis-Besse Nuclear Plant. Please consider the public safety of your citizens and keep these reactors closed. Please double the security around the plant from terrorist who'd try to use it for their own publicity. I would appreciate an immediate response to my concerns. Thank you!

Sincerely,
Sandra Haekner

**Look me in the eye
and tell me Davis-Besse is safe**

To Whom It May Concern,

My name is Karen Jordan and I live in [REDACTED]. I am deeply concern about the opening of the nuclear power plant Davis-Besse. I feel it is not necessary for it to be open. The main reason I feel this way is that it is not safe for the residence in the area. There are no guarantees in life so you cannot give me a guarantee that it will be safe. Large businesses do not care about public safety until it is too late. Also, they try to find the cheapest way to their goal. One way they do this is by cutting corners on safety. So I ask of you to keep the plant closed and please respond back as soon as possible.

Thank You.

Karen Jordan

Dear Mr. Dyer -

I am only [redacted], I do not know a lot about the job you have been chosen or you chose to do. But I do know part of your job is to regulate safety. There is a good place to start. In this post 9/11 era we live in, safety is a profound thing many people seek. The people of [redacted] in this beautiful state of [redacted] do not want an explosion or even a minor accident happening because of a man's priority with FirstEnergy isn't straight. By opening Davis-Besse, you are endangering more than lives - you would ultimately sacrifice something much greater - the respect to any part of the U.S. Nuclear Regulatory Commission. Plain and simple - It isn't worth it. Just because you have power doesn't give you the right to abuse it. I'm 15 and I'm watching you, Mr. Dyer.

Make Me Proud.

Ms. S.M. Martin

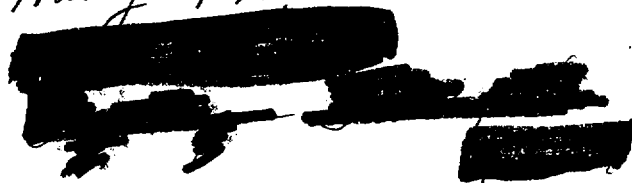

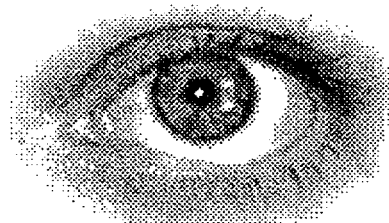

**Look me in the eye
and tell me Davis-Besse is safe**

Please keep Davis-Besse closed
until someone knows what they
are doing and can fix it right.
We worked long & hard to clean
up Lake Erie so lets keep it
CLEAN.

We should look into other means
of getting energy. We are already destroying
our world.

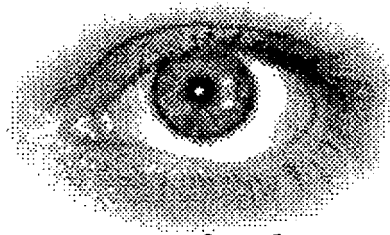

My name is Mary Pontius

**Look me in the eye
and tell me Davis-Besse is safe**

My family lives [REDACTED]
I feel we live in the blast
area. The NAC Top priority must be
public safety - I am concerned
of a meltdown. Davis Besse
nuclear reactor needs to be closed - a
meltdown would cause damage to the
Great Lakes - drinking water

Julia K. Crowder

July 15, 2003

James E. Dyer, Regional Administrator
U.S. Nuclear Regulatory Commission
801 Warrenville Road
Lisle, IL 60532-4351

Dear Mr. Dyer,

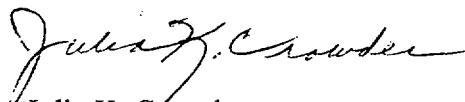

I am writing to urge you to use your influence to keep the Davis-Besse nuclear reactor closed.

Following the 9-11 terrorist attack, my husband and I were speculating as to the possible targets of any additional attacks. I immediately thought of the devastation that would occur if a bomb were detonated at a nuclear power plant. I envisioned the effects that such an act would have on the health and welfare of millions of U.S. citizens, on the water supply, and on the environment. Imagine my horror when I recently learned that the threat of disaster at the Davis-Besse plant is very real and imminent, due—not to terrorist activity—but to the poor condition of the reactor itself and to the inefficiency of its emergency cooling system!

As a parent, I would never allow one of my children to ride in a car that had passed only 13 out of 31 items on a safety inspection checklist. As the Regional Administrator of the NRC, your top priority must be to protect the public by insuring that a nuclear reactor that has similarly failed its safety inspections is prevented from re-opening.

I would appreciate an immediate response to my concerns. Thank you for your time and consideration.

Sincerely,

Julia K. Crowder

Oct. 18

Dear Mr. Caldwell

I am writing to express my great concern about the Davis-Besse nuclear power plant. I have no confidence that the plant can ever be safe enough to warrant the risk.

I live in [REDACTED], which is about [REDACTED] miles south of [REDACTED]. I am very concerned for my family's well-being and for all the citizens of Northeast Ohio. It scares me that something so potentially dangerous can happen even when everyone is doing their best to prevent it. It seems that monitoring and watching will not be enough to cover every inch of the reactor.

The NRC first priority must be people's safety. The future depends upon it.

Please keep the reactor closed. We will all sleep better at night.

Cathy King
[REDACTED]

Sincerely,

Cathy King

Jim Caldwell, Regional Admin.
NRC Nuclear Regulatory Comm.
801 Warrenville Rd. Suite N. 60531

Mr. Caldwell,

We are from [REDACTED] and are writing to ask you to please stop the reopening of the Davis Besse nuclear reactor.

The N.R.C.'s top priority should be public safety. We are aware that this facility is in need of major repairs.

I am concerned for my families safety and hope that you will do something to stop this reopening.

Sincerely,

Phiona G. Benson
[REDACTED]

Jim Caldwell, Regional Administrator
U.S. Nuclear Regulatory Commission
801 Warrenville Road
Lisle, IL 60532-4351

August 13, 2003

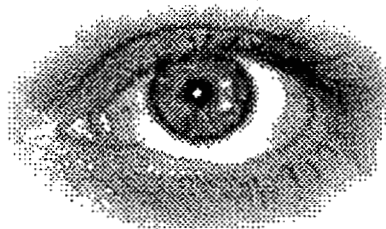

Dear Mr. Caldwell,

My family and I reside in [REDACTED] but every year we go to Family Camp at [REDACTED] in [REDACTED]. This camp is situated on Lake Erie, and various streams empty into this shallowest of the Great Lakes. We are very concerned about our personal safety, but also that of our planet and the inhabitants who depend on its water.

Therefore, I and my family ask you to keep the Davis-Besse nuclear reactor closed. Perhaps your FirstEnergy schedule will experience some delays in the short run but in the long run, you will be saving waterways & possibly lives — maybe even your own or that of a loved one. Repair, renovate, but do not reopen this nuclear reactor.

Sincerely,

Ann E. Kurzy

Jim Caldwell, Regional administrator,

Dear Sir, I hope you keep the Davis Besse closed.

It seems to have problem every now & then, so
it must not be repaired or fixed very well.
It's a public nuisance if its not made very
well.

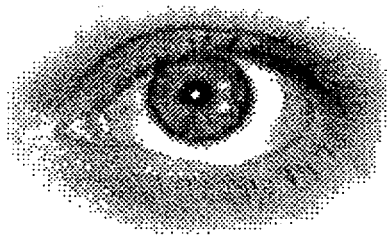

I live in [REDACTED] & think its a problem
for hundreds of miles from it in all directions
from it.

It could spoil Lake Erie for drinking water and
spoil fishing in it.

Hope you & your Commission closes it.

yours Truly,
Dorothy Getz

Dear Mr. Caldwell:

I believe that the NRC's top priority is public safety not First Energy's schedule. For this reason I am asking you to keep the Davis-Besse nuclear reactor closed for Lake Erie's environmental and economic benefit.

Sincerely,
Marie Malernee

DeAR MR. Jim Caldwell
Please keep the plant closed

Thank you

CE

**Look me in the eye
and tell me Davis-Besse is safe**

Dear Mr. Caldwell,

My name is Budgett White and I live in [redacted] with my husband Andy and our children. I am writing this letter in regards to the Davis-Besse nuclear power plant. I want you to keep this plant closed. I need not go into the dangers of a nuclear meltdown, I'm sure you're well aware. I too am aware of the benefits of a nuclear power plant. My concern sir, is that the cons outweigh the pros. It is too great of a risk to take (opening the plant). In the new millennium there are many alternatives. My fear sir, is that you will open the plant, & some day disaster will occur. Will you Mr. Caldwell be able to look suffering people in the eye

**Look me in the eye
and tell me Davis-Besse is safe**

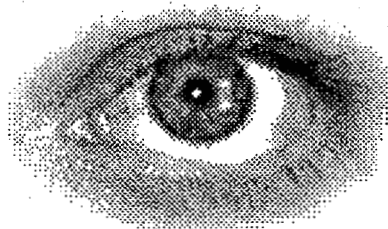

Dear Jim,

As a concerned citizen, I am writing because I would like to know how or what measures will be taken to keep us safe and the future (my grandchildren safe) from the Davis Besse power plant. It has been in the news numerous times. It should remain closed to keep everyone safe. Our safety cannot be guaranteed and for that reason alone, it should be kept closed. I would appreciate a response to my letter.

Sincerely

Pam Dowdell

[Redacted signature area]

Look me in the eye
and tell me Davis-Besse is safe

8/8/03

Dear Mr. Caldwell,

As a child I spent many happy summers on Lake Erie. I would hate to see the Lake become contaminated for future generations.

The children are our most important resource. Let's keep it safe for them. You have the ability to keep the power plants safe and I underline safe as closed, if a danger.

The Great Lakes affect all of Ohio and although I am not that near the power plants, many thousands of people are near and possibly in danger.

Thank you for your consideration in this matter. I would like a response if possible.

Régina R. Reed
[REDACTED]
[REDACTED]

Jim Caldwell, Regional Administrator
U.S. Nuclear Regulatory Commission
801 Warrenville Road
Lisle, IL 60532-4351

Dear Mr. Caldwell :

I am greatly concerned about the possible reopening of the Davis-Besse nuclear power plant. I am a Mother with [REDACTED] children. The risk of a nuclear accident is too great to jeopardize the future and health of Ohio's children. Dealing with nuclear power, there is not room for error or accidents. The accident or errors on March 6, 2002 at Davis-Besse nuclear power was one too many. We can't afford second chances regarding safety with nuclear power.

Please keep the Davis-Besse nuclear power plant closed.

Thank you,
Régina R. Reed

**Look me in the eye
and tell me Davis-Besse is safe**

Dear NRC

My name is Bobbie Ward my Family
and I live at [REDACTED]
about [REDACTED] miles away From Davis-Besse.

My biggest concerned is my Family,
are we going to be safe if we re-open
Davis-Besse?

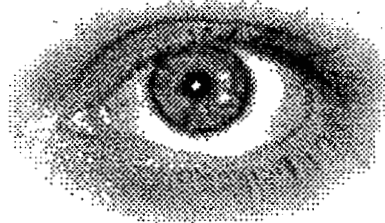

If we do re-open Davis-Besse and
a meltdown would happen a lot of people would
die from cancer have early fatalities due
to radiation exposure/require Hospital treatment
or medical attention and what about
Lake Erie.

Now ask yourself that one question.

"Is it all worth it?"

To me it's Not, So please keep
DAVIS-Besse Nuclear reactor closed
For Good.

P.S Return with an immediate Response.

Look me in the eye
and tell me Davis-Besse is safe

Mr. Caldwell:

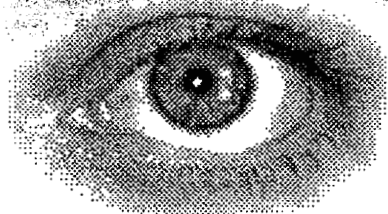

My Wife and I live approx [REDACTED] from D.B. and
We would be some of the first to go in the event of a accident.

First Energy should think of the population first instead
of its bottom line. I hope you ~~will~~ will keep D.B. closed and
insist that they convert to coal. They probably own the
coal mines anyway so their bottom line will not be hurt.

I would rather have a little sulphur and coal dust
in the air than radiation for 125 years.

Thank you
Richard L. Marsh

Joseph W & Jennifer L Mongold

August 8, 2003

Dear Friend,

I am writing regarding the Davis-Besse nuclear power plant. I am concerned for the environment and the people living near the power plant and the people, like my family, that often visit the Lake Erie shores. We fear that an accident at Davis-Besse would have a severe effect on those in the surrounding areas as well as those of us who visit Lake Erie each and every year with our families. We are asking that you take immediate action in keeping this power plant closed, and consider the public safety as well and the environment. Thank you for your attention in this matter.

Sincerely,

Jennifer Mongold

To Mr. Caldwell,

Our names are Julie + Matt
Tropell We live in [REDACTED]
[REDACTED]. We were approached by
the OCAE about the Davis Besse
nuclear plant & the problems
this plant could cause. We
hope that you will read over
the information they showed us
& come to the conclusion to
keep the plant closed for the
safety of the community & our
family.

Julie + Matt Tropell
[REDACTED]

Jim Caldwell

I live in [REDACTED] near the
[REDACTED], and if there is a melt down at
Davis-Besse it could destroy the rivers. Not
to mention all of deaths that would be caused
from being exposed to radiation. And seeing ~~being~~
there was a 5x7 inch hole found on March 6th
of 2002 that was overseen it is sure to happen
again and the next time we might not be as lucky.
I would like to know that my concerns are being
heard. If I could get an immediate response
sent to [REDACTED]
[REDACTED] it would be greatly appreciated

JACK MARSHALL

Aug. 7, 2003

Mr. Jim Caldwell, Regional Administrator
U. S. Nuclear Regulatory Commission
801 Warrenville Rd.,
Lisle, IL 60532-4351

Dear Mr. Caldwell:

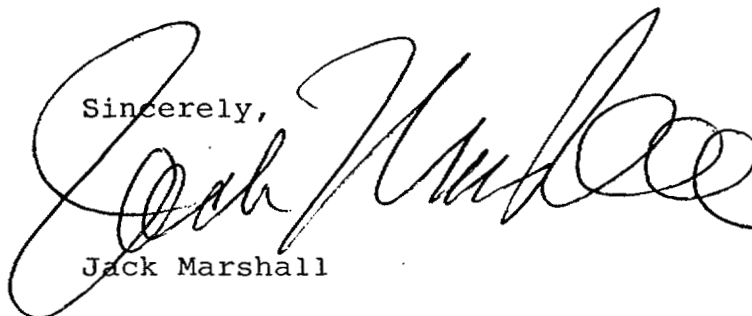

My wife and I live close enough-- too close-- to Lake Erie and Davis-Besse to be more than a little concerned about the wisdom of keeping the nuclear reactor in operation. Safer, better ways of generating electricity are available.

We follow the excellent work done by the Ohio Citizens Organization. We can only hope that the NRC is anywhere near as conscientious.

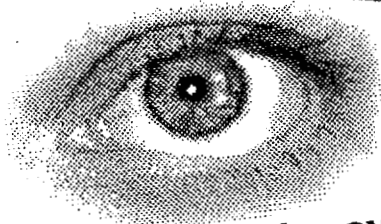

Without an ironclad guarantee that the reactor is safe and will never fail, which is impossible, we doubt that your organization has any other choice than to find some other way of generating power.

With considerable trepidation, we will be interested in your answer, as our first line of defense against an impossible disaster.

Sincerely,

A large, stylized handwritten signature in black ink, appearing to read 'Jack Marshall', is written over the typed name.

Jack Marshall

Jim Caldwell,

My name is Michelle Flower and I live in [REDACTED]. I am concerned about the Davis-Besse nuclear reactor. I think that you should consider all of the health problems and risks that could occur by not keeping the reactor closed. It is pretty scary that it could effect people hundreds of miles away. Public safety is so much more important than First Energy's schedule. I hope you do the right thing morally, for yourself and all of the people you could affect.

thnx, Michelle

Please respond and let me know what is happening.

Jim Caldwell, Regional Administrator
U.S. Nuclear Regulatory Commission
801 Warrensville Road
Lisle, Il 60532-4351

Dear Sir:

I am writing on behalf of my family and loved ones regarding the Davis-Besse Nuclear Power Plant. I understand I have a right to an opinion and I hope you listen to my concerns. As a registered voter and U.S. citizen I feel I am being led astray with wrong information concerning how safe this plant actually is.

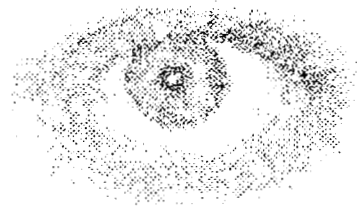

After two near disasters already, I feel it is time to tell those who profit in dollars, that they can find alternative energy sources. These big companies have no regard for my children or their future children when they allow these reactors to come within three eighths of an inch of a melt-down to occur.

The devastation would be unheard of. Please take my concerns into consideration when recommending the continued closing of this power plant. The jobs lost with its closing cannot possibly compare to the lives saved with it closed. Please keep me posted on any future decisions that may affect my health and well being as much as this plant would.

Sincerely;

Jim Norris

July 24, 2003

Jim Caldwell, Regional Administrator
U.S. Nuclear Regulatory Commission
801 Warrensville Road,
Lisle, IL 60532-4351

Mr. Caldwell,

I have only recently been made aware that the NRC has been considering the possibility of reopening the Davis-Besse nuclear plant. Based on the recent near accident, (the hole discovered in the reactor on 3/6/2002) and the failure of First Energy to make repairs and guaranty the safety of the public from a potential meltdown, I feel the dangers of reopening this particular plant outweigh the benefits that nuclear energy normally provides.

As a resident of [REDACTED] and a citizen who relies on Lake Erie for drinking water, I am concerned about the environmental dangers as well as the potential economic losses to our state if the plant is permitted to reopen in it's current faulty state.

Please make sure your top priority is public safety for the citizens of northeast Ohio and not the bottom line of an energy company.

Thank you for your attention.

Cynthia Boyd
[REDACTED]

Look me in the eye
and tell me Davis-Besse is safe

Jim Caldwell, Regional Administrator
U.S. Nuclear Regulatory Commission
801 Warrenville Road
Lisle, IL 60532-4351

Dear Mr. Caldwell,

I live in [REDACTED] in the nice small city of [REDACTED]. After moving here in [REDACTED] I found out how close in proximity we live to the Davis-Besse nuclear power plant (approx. 30-35 miles). And in the years to come, all the news of the problems they have had. Especially of the possible disaster of a melt-down with a defective lid, and had the hole burst with the emergency cooling system not working, it most definitely would have caused a melt-down, and other safety related issues.

Lake Erie is just beginning to get clear of the pollutants that had caused the fishing industry to become almost extinct. I am only starting to eat the fish from the lake again. And if anything did happen with the power plant, what would the millions of citizens do or go?

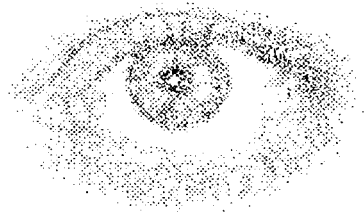

The bottom line is PUBLIC SAFETY! The NRC's top priority should be to the public, not First Energy's wanting to make millions of dollars at the risk of our safety.

In my opinion, this power plant has been a time bomb waiting to blow since it first went online. Therefore, I believe it is in the best interest of all of the local and distant citizens of Lake Erie, that it be dismantled and hauled away.

Thank you for your time in reading this, and I would very much like a response from you on this issue.

Respectively,

James L. Buzzard
[REDACTED]
[REDACTED]

Look me in the eye

23 July 2003

Sharon Woodburn
[REDACTED]
[REDACTED]

Jim Caldwell, Regional Administrator
U.S. Nuclear Regulatory Commission
801 Warrensville Road
Lisle, IL 60532-4351

Dear Mr. Caldwell,

My family and I live in the [REDACTED] from Davis Besse. The safety of living near Davis Besse has always been a concern, because of the fear of an "Accident". The most recent leak of Boric acid should never have happened, and it is clear that the necessary procedures failed to prevent this.

Please continue to keep Davis Besse closed, and look for alternative methods of power.

Even though I am a First Energy stockholder, I feel that the safety of our families, our environment and our natural resources should be the first priority. There is an alarming incidence of cancer and related illnesses in the surrounding areas. NASA and Plumbrook, were always thought to be safe too.

Please respond regarding any action that is being taken at this time, and in the future to ensure that our safety is the NRC's number one concern.

Sincerely,

Sharon Woodburn

Look me in the eye
and tell me Davis-Besse is safe

July 23, 2003

Mr. Jim Caldwell, Regional Administrator
U.S. Nuclear Regulatory Commission
801 Warrenville Road
Lisle, IL 60532-4351

Dear Mr. Caldwell:

I am writing to ask you to keep the Davis-Besse nuclear power plant closed for the following reasons: 1) the danger to Lake Erie and, 2) the health and safety of the local population.

I have been a resident of [REDACTED]. I believe this is one of the nicest areas in the country to live in terms of cost of living and quality of life. We are privileged to enjoy the many benefits of Lake Erie, which include a fresh water supply, tourism, recreation, etc. Other areas of our country that are experiencing severe water shortages may eventually need to tap into the Great Lakes for their water supply as well. Please ensure that one of our greatest natural resources here remains safe and usable.

The health and safety of residents of this general area must be the top priority for the NRC. Davis-Besse came dangerously close to a meltdown in March of 2002. We are all aware of the consequences of exposure to radiation. At a time when exposure to toxic substances in our daily environment is routine, please consider removing one of those health hazards by keeping Davis-Besse closed.

Yours very truly,

Diane Barnum

Jim Caldwell, Regional Administrator
U.S. Nuclear Regulatory Commission
801 Warrenville Road
Lisle, IL 60532-4351

Dear Mr. Caldwell,

I live in [REDACTED] in [REDACTED]. Though my community is more than [REDACTED] miles from the Davis-Besse Nuclear Plant, I am concerned about the possibility of life threatening and detrimental environmental consequences should the Davis-Besse facility be reopened.

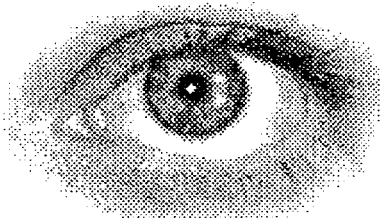

I respectfully remind you that the NRC's top priority must be public safety and not a schedule determined by First Energy. Therefore, I ask you to keep the Davis-Besse nuclear reactor closed.

I look forward to your immediate response to my correspondence.

Sincerely,

Patricia A. Newman

Look me in the eye
and tell me Davis-Besse is safe

Dear Mr. Caldwell

I live in [REDACTED] Ohio which is not that close to the Davis-Besse plant, but I am still concerned about the safety factor of all the people in the immediate area of the plant, from their track record so far I see no reason for anyone to have any confidence in the actions or the words of the people running Davis-Besse. If an accident happens it would be catastrophic for the entire area including where I live. I want my grandchildren to be able to enjoy the beautiful area & lakes that we have here for years to come, and I don't believe this is possible if you allow this plant to continue to operate as it has in the past. I am in favor of shutting it down completely. One failure and there is no fixing or mending the damage to the fresh water lakes that we enjoy, the recreational industry that is at stake, and last but not most important the lives that would be affected by such an accident. (OVER)

Please help in saving the largest
fresh water system in the world.

Thank You
G. Horton

May I have a reply on this
matter please.

Dear Jim Caldwell,

I am a resident of the Cuyahoga County Area. My Family and I are very concerned about our safety and demand why you would continue to run a faulty power plant. Now that another dangerous accident has occurred, it is very evident ~~that the~~ the Davis-Besse ~~facility is a hazard~~. The health risks that are presented from running the Davis-Besse power plants are outrageous, ~~for~~ our future generation will be greatly effected by your decision. The economic and environmental hazards ~~of~~ of continuing to run the facility are outstanding and the foreseen dangers should guide your decision to the right path. Our community's well being rests in your hands. Make the right choice, ~~and~~ keep the powerplant closed.

I will enclose my address and look forward to your immediate response. Also, I would like more information on this issue ~~so~~ so that I can be even better informed.

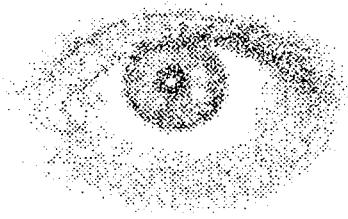

Thank you for your time, and keep
citizens of Ohio in mind.

Sincerely,

Kendra Chatburn

Look me in the eye
and tell me Davis-Besse is safe

Dear Mr Caldwell,

My name is Christine Budd. My family consists of myself, my husband ^{Andrew} and our ~~one~~ year old boy, Joshua. We reside in a city named ~~located~~ located within Summit County. While my family and I do not live right next to Davis-Besse, I am deeply concerned of all of the ramifications of a decision to reopen this plant. I know you are quite aware of all of the ~~statistics~~ ^{statistics} of the absolute destruction that a meltdown of this ~~plant~~ could cause to millions of individuals (and their families). As far as we are from Davis-Besse... any type of nuclear disaster would affect (harm) my family as well. Whether the repercussions be to millions of peoples' health, our economy and detrimental environment effects.... It is ^(lives) obvious that this plant is a hazard and has not proven to be safe in its operations. I have also read other literature (varying opinions, stats, research) regarding Davis-Besse and are not convinced that there are safeguards in place, nor proper repairs made that would ensure the community (and other surrounding areas) that it could be safely run. It appears to be a high price to pay just to cut costs in generating power -- is it really worth saving a company a little money?? My question would then be, "who is going to be responsible for all of the loss of life should a meltdown occur?" I realize that you have a very important role in making the crucial decision in this matter. I would only hope and pray that God will give you wisdom to recognize the obvious choice in reopening this plant. Opting to preserve millions of lives over saving money

(→)

is the noble choice. I would appreciate it if you
would respond to my concern regarding this matter.
If you feel that I am being misled on my views
of the why this plant should ~~or should not~~ be reopened...
I would like to know what your plans are (if it is be opened
etc.
I am open to any type of literature to support
findings to actually ^{support} opening this facility. Although I am
almost quite sure the pros will not outweigh the cons.

 Thank You for your
time and I will
await your response.

Christine Budd
