

DEAR MR. CALDWELL,

8-19-03

My NAME IS BEVERLY GONCY.
I LIVE IN [REDACTED] I AM
CONCERNED ABOUT THE HEALTH & SAFETY
OF MY COMMUNITY.

THE NRC'S TOP PRIORITY MUST
BE THE SAFETY OF THE PUBLIC, NOT
FIRST ENERGY'S SCHEDULE.

PLEASE KEEP THE DAVIS-BESSE
REACTOR CLOSED.

YOUR IMMEDIATE RESPONSE
WOULD BE GREATLY APPRECIATED.

THANK YOU

Beverly Goncy
[REDACTED]

August 24, 2003

Dear Mr. Caldwell,

I am writing to encourage you to keep the Davis Besse nuclear plant closed. The safety record of this plant, as you know, is very, very poor.

Your job, as you know, is that you work for the safety of the citizens of this country. You are to please serve our needs, not those of the company.

I will also mention that after all the years these plants have been open, WE STILL HAVE NO SAFE PLACE TO STORE THE SPENT FUEL RODS WHICH ARE HIGHLY RADIO ACTIVE FOR THOUSANDS OF YEARS!

For this reason alone, these plants, all of them should be shut down. Please start with Davis Besse.

I very much appreciate you listening to the concerns of my wife and I.

Sincerely, Ken Eiker (Eiker)

P.S. Please respond with your thoughts. Thank you!

Scott H. Foster
[REDACTED]
[REDACTED]

To The Attention of Jim Caldwell,

Thank for your attention Mr. Caldwell. My name is Scott H. Foster and I am a resident of [REDACTED]. My family and myself use Lake Erie on a regular basis for fishing and boating purposes. I also happen to be a biology teacher for the [REDACTED] School District, which allows me to recognize Lake Erie as a remarkable natural resource abundant with irreplaceable wildlife. As a registered voter, I would like to remind you of your responsibility to public safety and safety for the environment. It is my understanding that the Davis-Besse nuclear reactor is trying to cut corners and rush operation procedure. I realize that our country is also currently battling an energy production crisis. However, I would appreciate your prompt attention to such a matter that could jeopardize public and environmental safety. Do the right thing.

Sincerely,

A handwritten signature in cursive script that reads "Scott H. Foster". The signature is fluid and written in dark ink.

Scott H. Foster

James P. Mramor, J.D.

July 31, 2003

Mr. Jim Caldwell
Regional Administrator
U.S. Nuclear Regulatory Commission
801 Warrenville Road
Lisle, IL 60532-4351

Dear Mr. Caldwell,

I live in [REDACTED], a beautiful community of 20,000 people situated on the [REDACTED]. My children and grandchildren live in the area as well.

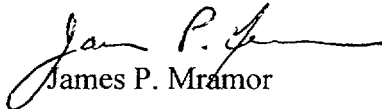

A mistake in opening the Davis-Besse power plant would be disastrous for the people in this region. I am sure that you are well aware of the predicted results of a major nuclear accident at that plant.

I am informed that you are in a position of public trust to insure that the public is safe from such a disaster. A failure of that trust could result in the most devastating event that this nation has ever seen. Yours is a heavy burden. Please don't fail us.

I need to know that it is safe for my family to live in the region. I respectfully request that you prevent the re-opening of this plant until you can assure me that I have nothing to worry about.

Please respond to this request for personal assurance before a re-opening occurs so that I may make an informed decision to stay or relocate.

Very Truly yours,

James P. Mramor

Dear Mr. Caldwell,

I chose to purchase my home on the [REDACTED]
[REDACTED] as it is a quiet, residential
area. I very much enjoy it here and look
forward to raising my family here. If Davis-
Besse's next incident is more than a near-
disaster, I may not get the opportunity to
even start my family. Please don't risk my
future by allowing Davis - Besse to see if
they're finally got it together. Please keep me
updated on your decisions so I can plan
my future.

 Marci Mayhew
[REDACTED]

Sincerely,
Marci Mayhew

Look me in the eye

and tell me Davis-Besse is safe

Mr. Jim Caldwell
Regional Administrator
U.S. Nuclear Regulatory Commission
801 Warrenville Road
Lisle, IL 60532-4351

Dear Mr. Jim Caldwell:

I'm writing this letter on behalf of the Ohio Citizen Action and my family. The problems that have happened with the Davis-Besse power plant have us concerned. We want to make sure that you are taking all the steps necessary to make sure that the plant is safe for all, if it is allowed to come back on line. Our concerns have come to ahead because of the latest events that have befallen the plant. It is the NRC's responsibility to keep the public safe so should the plant be questionable in its operations we would like to suggest that it remained closed.

I would like to thank you for your time on behalf of my family and myself

Respectfully,

Dino B. Stramer

Melissa Mika
[REDACTED]
[REDACTED]

August 22, 2003

Mr. Caldwell;

My family and I have resided in [REDACTED] for approximately [REDACTED] years, and one of my biggest concerns is my family's welfare and safety. I would hope that you take your responsibility as Regional Administrator of the NRC very seriously and would make decisions that reflect the concern the public has. I would urge you to use your position to insure that facilities such as the Davis-Basse nuclear reactor remains closed unless there is NO Possible threat to public safety. I trust you will respond to my concern at your soonest opportunity.

Sincerely,

Melissa Mika

August 28, 2003

Brigit Zeiger
[REDACTED]
[REDACTED]

Jim Caldwell, Regional Administrator
U.S. Nuclear Regulatory Commission
801 Warrenville Road
Lisle, IL. 60532-4351

Dear Mr. Caldwell,

As a [REDACTED] aged resident [REDACTED], I was privileged recently to experience a history making black out.

I do not want to also experience a history making nuclear disaster. Recently, in the media I have heard reports of officials ignoring known problems that could have prevented a major blackout, a space tragedy and more.

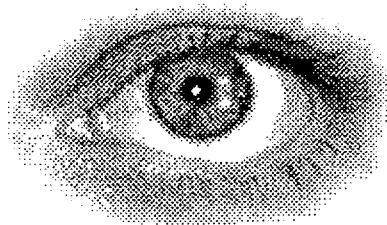

Please take the time to consider the irreversible damage to our population, environment and my future if the Davis-Besse nuclear power plant's problems are allowed to continue without accountability.

I need to know that you are doing all that is necessary to protect my family's future and the future of my state. Let the wisdom learned from recent disasters aid you to stop another.

Sincerely,

Brigit Zeiger

Look me in the eye
and tell me Davis-Besse is safe

[REDACTED]
August 5, 2003

Jim Caldwell, Regional Administrator
U.S. Nuclear Regulatory Commission
801 Warrenville Road
Lisle, IL 60532 - 4351

Dear Mr. Caldwell:

As an [REDACTED] resident and nurse, I have followed with concern the history of the Davis-Besse nuclear power plant operation. The most recent incident - a near disaster - demonstrated the danger this facility presents to the safety of our community.

The Nuclear Regulatory Commission's top priority must be public safety. I urge you to take steps to keep the Davis-Besse reactor closed.

Joan K. Miller

Aug. 20, 2003

Dear Jim,

Since the 2003 blackout last week - I think is a wake up ~~call~~ ^{all of} for us - and for our - safety - (public safety for sure).

Especially the Davis-Besse nuclear power plant - A 1982 study performed for the NRC estimated that a core meltdown at

Davis-Besse would cause \$84 billion in damages in 1982 dollars - that's \$159 billion in current dollars.

This figure doesn't include health care costs to the affected population, lost wages, decontamination costs, or lost property and farmland.

I live in Austintown township.

I think I'm close enough to
Davis - Besse to be concerned.

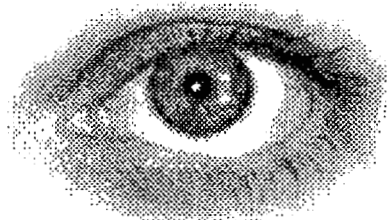

Just like you don't like insurance
companies saying you can go back
to work instead of your doctor.

I think NRC's top priority
must be public safety - not
First Energy's schedule.

Please Mr. Caldwell, I am
asking you to keep the Davis -
Besse nuclear reactor closed.

Please respond as soon as possible.

Sincerely,
John R. Banjo

TO: JIM CALDWELL
REGIONAL ADMINISTRATOR
U.S. NUCLEAR REG. COMM.
801 WARRENVILLE RD.
LISLE, IL 60532-4351

MR. CALDWELL:

Please consider this a serious request from a concerned citizen that resides close to Davis-Besse to PERMANENTLY close the facility.

The facility itself has been in shutdown mode since February, 2002. If it did come back on line, when would the next shutdown come? It seems to me that Davis Besse has been plagued with this problem too many times in its history.

Safety FOR our citizens must be paramount & precede schedules or political fallout. I ask that you make your decision promptly, for the greater good of this community. Thank you.

Sincerely,

Dean Robinson

July 15, 2003

James E. Dyer, Regional Administrator
U.S. Nuclear Regulatory Commission
801 Warrenville Road
Lisle, IL 60532-4351

Dear Mr. Dyer:

I am writing this letter to state my position on the David-Besse Plant. I urge you to consider keeping the plant closed. I live in [REDACTED], right [REDACTED] and realize the dangers that David-Besse could cause to our lake if the next near disaster becomes a reality.

Besides all of the health issues and dangers to those living near David-Besse I see one issue that would directly affect me is the loss of our Lake Erie.

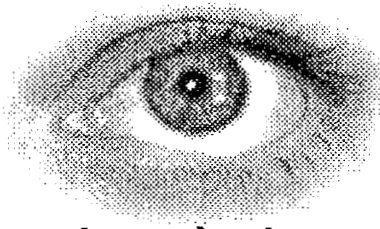

The water I get daily, which many times I take for granted, is supplied to me from the City of Huron Water Filtration Plant, which is pumped out of Lake Erie. Even if I may never be affected personally I cannot forget the ones who may be if a disaster would occur.

So I urge you once again to look at all sides of this issue before a decision is made concerning the David- Besse Plant.

Sincerely,

Catherine Ramey

July 10, 2003

James E Dyer, Regional Administrator
US Nuclear Regulatory Commission
801 Waverlyville Rd
Lisle, IL 60532-4351

Dear Mr Dyer:

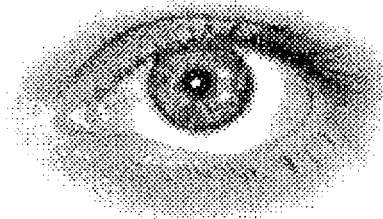

As residents of [REDACTED], my husband & I are concerned about the Davis-Besse nuclear power plant and the near-catastrophe that occurred there last year. A nuclear leak at Davis-Besse could contaminate Lake Erie and the drinking water of millions of people, ourselves included, not to mention the effects on the health of the people living near the plant. The lake is too important to public health and local tourism to take that kind of risk.

Please keep the Davis-Besse nuclear reactor closed until First Energy & the NRC can assure us that there is no risk of this happening again, that the causes of the hole have been eliminated & that preventative measures are in place and effective against future threats.

Thank you for your role in protecting public safety. Please respond to the address below.

Sincerely,

Janifer Bier
[REDACTED]

Look me in the eye
and tell me Davis-Besse is safe

Dear Mr. James Dyer,

Hello, My name is Jill King and I am a resident of [REDACTED]. I am greatly concerned of the dangers of keeping the Davis-Besse Nuclear reactor open. The risk of meltdown that could occur is just too great. The public's safety and well being must be put first, and this means keeping Davis-Besse closed. Please keep the NRC's main objective the well being and health of our community.

Thanks,

Jill King

With legitimate concerns regarding public safety, and in view of some nuclear accidents of rather recent vintage, there has been no strong response addressing potential safety issues at Davis-Besse. The power industry has also done little to allay safety concerns relating to electromagnetic fields. The issues are not just related to catastrophic scenarios, but on-going chronic health problems.

Sincerely,

Kurt D. Waino

[REDACTED]
[REDACTED]

Dear Mr. Caldwell,

It has been brought to my attention that Davis-Besse Power Plant has been closed for some time now due to safety & health issues. As a homeowner and [REDACTED] taxpayer, I feel it is of the utmost importance that safety be your first concern to the population of the surrounding areas of the plant. But it is also important to consumers that if this plant can be safely re-started to operational conditions to lower prices of electricity to consumers this should also factor into your decision making. If the plant is of no way re-startable to next to perfect operations than it should not be allowed to ever open again, the cost to human suffering outweighs the price you will save.

Sincerely L.C. Yagatich

Look me in the eye
and tell me Davis-Besse is safe

Dear Mr. Caldwell,

We oppose the Davis-Besse
Power Plant because of the
irreversible damage to our freshwater!
We need clean water for our 50,000
residents!

Public safety must be your first
priority!

Keep the reactor closed!

James E. Dyer, Regional Administrator
U.S. Nuclear Regulatory Commission
801 Warrensville Road
Lisle, IL 60532-4351

Dear Mr. Dyer:

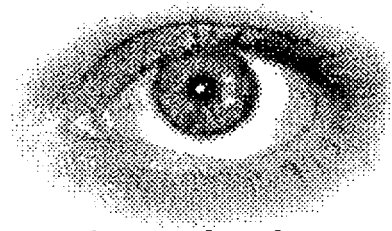

This letter serves as a support for the Ohio
Citizen Action organization whose goal is to keep
the Davis-Besse nuclear power plant closed.

The fact that it is closed shows clearly the
dangers involved, known and unknown, immediate
and long-term for the citizens of Ohio. Certainly
we are concerned with the future of powering Ohio.

However who decides when the risks far outweigh any
potential benefits? I remember the days of no or
limited power. We thrived and survived. Keep this
potentially disastrous plant closed. We'll manage
another way.

Respectfully,

La... de a McConnell

[REDACTED]

PLEASE RESPOND

Look me in the eye
and tell me Davis-Besse is safe

7-15-03

Dear Mr. Dyer,

The condition & safety of the Davis-Besse plant is of great concern to me & my family. My family consists of my husband, [redacted] grown daughters (which also live in the area) a [redacted] old grandson & a [redacted] old granddaughter, & myself.

The consequences of the plant not being safe definitely outweighs any reason you may have for not keeping it shutdown when you have reason to & the authority to.

We live in the [redacted] area & we keep bags packed for each member of our family & a place to go if needed. This has been planned like a fire escape plan. With everything else going on in the world, it would give us great piece of mind knowing you're doing everything in your power to keep us safe.

Thank you
[redacted]

Look me in the eye
and tell me Davis-Besse is safe

[REDACTED]

[REDACTED]

Dear Ms. Caldwell,

This is a request and plea, to keep the Davis-Besse nuclear reactor closed. The health of citizens and safety of the Great Lakes environment should be the highest priority for the NRC. Commercial and budget concerns of First Energy should take in the welfare of its clients and users of its ^{products by the} citizens.

Let's make the effort to find alternate ^{energy} resources and be leaders in environmental innovation. That would be a true contribution to our society.

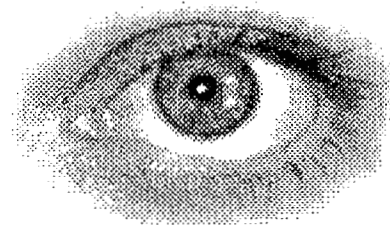

Gene J. Roy

Fax chenry@hb.edu

Dear Mr Caldwell. I am an Ohio Citizen living in [REDACTED]. I believe that the David-Besse power plant should not be re-opened, until the proper authorities are absolutely certain that the plant poses no risk to the people who live near it, and that it does not pose any threat to Lake Erie. Also First Energy should investigate safer means of energy. The respective citizens of Ohio's safety are much more important than First Energy's timetable. Please respond on how our safety concerns are being met. Thank you.

[REDACTED]

July 14, 2003

James E. Dyer, Regional Administrator
US Nuclear Regulatory Commission
801 Warrenville, Rd
Lisle, IL 60532-4351

Dear Mr. Dyer:

I urge you to keep the Davis-Besse nuclear reactor closed. The plant has had a poor safety record, and I doubt there has been sufficient time to successfully address the recent safety concerns, such as the deterioration in the reactor vessel head. The potential of disaster demands extreme caution.

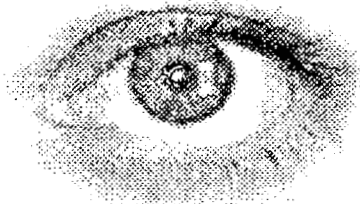

Although I live on the [REDACTED], I know that even this far away, my friends and neighbors could suffer health consequences of an accident. In addition, I am also concerned about protecting the natural resource of Lake Erie, where contamination could not only affect drinking water supplies, but also the lake's ecosystem.

For now, I want you to keep the reactor closed—and closed until we are *absolutely* sure that the reactor is safe and that the management of the facility is adequate to operate it safely. I doubt that is anytime soon.

I look for your response.

Sincerely yours,

Penny Allen

Look me in the eye

Mr. Dyer,

My name is India Meesig. I live in [REDACTED] with my husband and [REDACTED] sons. I wish to add my voice on the issue of the Davis-Besse nuclear power plant and urge you to keep them shut down for the safety of our citizens. Davis-Besse has failed on two separate occasions (1985 and 2002) to make their facility safe and I don't want them to get a third chance to fail!

The cost of a nuclear meltdown can not just be measured in dollars and cents. Let us think about the lives lost and the ongoing health problems we will all face. I hope you will make public safety your top priority and not buckle under the pressure of FirstEnergy's agenda.

I thank you for your time and ask for a prompt response on this matter.

Sincerely,

India Meesig
[REDACTED]
[REDACTED]

Look me in the eye
and tell me Davis-Besse is safe

Kathleen Spry
[REDACTED]
[REDACTED]

July 14, 2003

Dear Mr. Dyer,

As a resident of [REDACTED], I am asking you to keep the Davis-Besse nuclear reactor closed. I am concerned that the plant is not safe enough for operation.

Nuclear power is a risky endeavor, even under the best of circumstances. The NRC's top priority must be public safety, not the profit margin of local vendors.

As citizens who ultimately pay for the function of power plants, and for the salaries of the individuals employed by the energy vendors, we deserve energy that does not harm us or our environment.

Please start working, immediately, to keep the reactor closed, and to enforce the safest standards for nuclear reactors.

Sincerely,

Kathleen Spry

JACK GROBE
[REDACTED]
[REDACTED]

Dear Mr. Grobe:

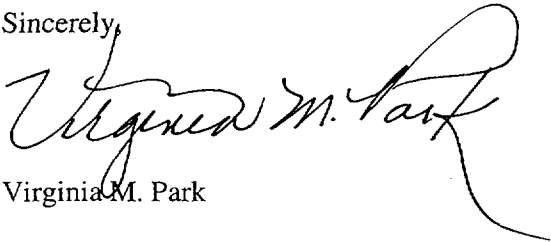

I am writing to encourage the immediate re-start of the Davis Besse Nuclear Power Plant.

So much work has been done. So many issues have been raised and successfully addressed. So much money has been spent and so many persons have disrupted their personal lives in order to work the long hours required to bring the plant back on line. It is time to put all the nay-saying behind us and get back to the business at hand. That is the generation of electricity at the plant.

Davis Besse is the largest employer in Ottawa County and is a significant part of our economic health. Davis Besse has been a good neighbor. Davis Besse has provided safe and steady employment for thousands of persons over the years. When mistakes have been made (and they have been minor), they have been rectified. Problems have been solved. And those situations have always resulted in significant improvement both in plant operations and the well-being of the community.

I urge you to do everything possible to get the Davis Besse plant up and running at full capacity in the immediate future. To me, this is a "no-brainer". Restarting the plant is a win-win situation. The company benefits, the community benefits and the customers benefit by the earliest possible re-start. Please do all in your authority to make sure that this happens as expeditiously as possible.

Sincerely,

Virginia M. Park

Jim Caldwell
U.S. NRC
801 Warrensville Rd.
Lisle, IL 60532--4351

7/17/03

Mr. Caldwell:

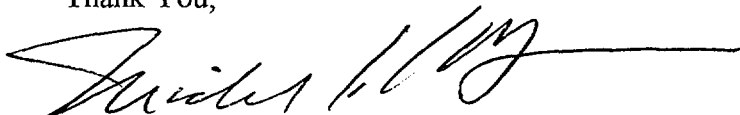

I [REDACTED] of the Davis-Besse Nuclear Power plant. I have seen the illustrations of the potential coverage of a radioactive release from the plant, and I have to admit it is troubling to me in light of the recent findings at the plant.

I am appalled at the lack of proper oversight as well as the lax management that could allow problems such as the corrosion of the steel lid of the containment vessel. If something so major can go unnoticed, what lesser problems would be found throughout the plant?

The NRC functions at the pleasure of the public, not the power industry, and should be representing our interests, not theirs. Therefore, I encourage you to keep the Davis-Besse plant closed until First Energy takes truly appropriate measures to ensure the safety of the plant and the residents of [REDACTED].

I would appreciate your timely response, and hope that your actions are in the public's interest.

Thank You,

Mike Kraft

Dear Mr. Caldwell,

I am a concerned citizen of the [REDACTED]. Our recent power situation resulting in the area power outage and national crisis affected my family very personally. My husband is a [REDACTED] and [REDACTED] and I am a State of [REDACTED]. He has been working around the clock because of First Energy's mistakes and this country's gluttony. I am presently unemployed due to medical illness and am rehabilitating and about to return to work. I have been working tirelessly as a volunteer to serve the area's needy during this crisis. First Energy can not be counted on obviously to be there for us. The technology is not keeping up with the demand of our society in North America by at least double. Fail Safe's aren't working and regulatory agencies can not and should not be trusting independent facilities. Far more must be done.

I am especially concerned about the Nuclear power plants nationally, but particularly in [REDACTED]. My home is located about [REDACTED] miles from [REDACTED]. Davis-Besse's well publicized disaster clearly show that we must do more to address safety in this states in all others in the US and in North America and globally. The future of our society is your responsibility. Public safety should be your number one concern. But if safety isn't your top concern, then economic damage due

only for college students and zealots. Well I have to say that many of my colleagues and friends are also concerned about environmental issues and are regular folks with average jobs who just want to see the world be a safer and better place to live. The Health Care industry ~~is~~ bears the brunt of the burden for many illnesses related to environmental issues already. Cancer and autoimmune illnesses are caused by many unknown factors - radiation / stress / among them. Insurance Companies understand prevention keeps illnesses and costs at bay. I would think Regulatory Commissions would do the same Preventing illness / exposure to radiation / loss of economic growth / increased health care costs / environmental catastrophe / loss of tourism → ALL CONNECTED → OBVIOUS ANSWER IS TO PREVENT DISASTER, KEEP PUBLIC SAFETY THE TOP PRIORITY AND KEEP DAVIS-BESSE NUCLEAR REACTOR CLOSED.

FURTHERMORE, if you have any input - review First Energy status completely. They are not operating safely.

Thank you for making this very messy and disorganized, but thoughtful letter. (I am ~~the~~ armed at the moment. just had a ~~_____~~ ~~_____~~ & then ~~_____~~ it afterward.

Mr. Jim Caldwell
U. S. Nuclear Regional Administrator
801 Warrenville Road
Lisle, IL 60532-4351

Dear Mr. Caldwell:

Subject: Davis-Bessie Nuclear Power Plant

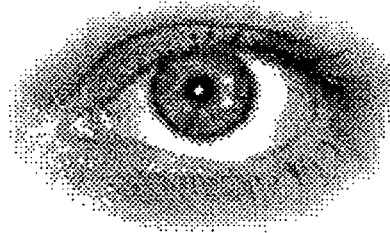

As a citizen of [REDACTED] for [REDACTED] my life I wanted to take time out to express my concerns about the Davis-Bessie Nuclear Power Plant. Recent events have raised grave issues as to the capability of this plant to deliver cheap and abundant electricity to our area in a safe and efficient manner. This is not the first time that this facilities capability to meet these goals have come into question. There has, over the years, been several events that would suggest that this plant is a danger to the citizens of Northeast Ohio and many others since a nuclear breach in a facility located on the shores of lake Erie could cause a environmental disaster of incalculable measure.

Since you are the Regional Administrator of the U.S. Nuclear Regulatory Commission I feel that I must remind you that your responsibility for the safety and well being of the people of this area must compel you to keep this Power Plant closed. I believe that it is the only proper course of action that a person in your position can take. It is also a stance that I fully recommend and agree with. Your attention to this situation is greatly desired appreciated. Please let me know your position and plan of action on this issue at your earliest convenience.

Respectfully yours,

Timothy D. L. Strobe

Jim Caldwell, Regional Administrator
U.S. Nuclear Regulatory Commission
801 Warrenville Road
Lisle, IL 60532-4351

Dear Mr. Caldwell:

I am writing to you in regards to the Davis-Besse nuclear power plant. I am a resident of [REDACTED]. I am requesting that you keep the Davis-Besse nuclear reactor closed for the safety of not only my family and myself but of my friends and my neighbors. The dangers of Davis-Besse far outweigh the benefits. The top priority of the NRC is public safety. I would like an immediate response as to what the intentions are of the NRC in regards to this situation. I appreciate your time.

Sincerely,

Mary Prebel-Houston

[REDACTED]
[REDACTED]
[REDACTED]

Look me in the eye
and tell me Davis-Besse is safe

8-25-03

Jim Caldwell:

We live in [REDACTED] - close to [REDACTED] -
We visit and enjoy the lake and park close
by - would not like anything to happen to
the water. The last blackout was enough
to put us through. We are thankful for water
and electricity - that we can depend on all
the time.

There are so many people out of work now,
health, money problems are enough for a family
to worry about - we need NRC's top priority to
be public safety. Would appreciate it if you
would consider keeping the Davis-Besse
nuclear reactor closed - we couldn't
handle hearing of an accident there - people's
safety should be your top priority.
Would appreciate an immediate response.

Thank you,

Mrs. Gertrude Kenczierske

[REDACTED]

Lisa Elliott
[REDACTED]
[REDACTED]

Jim Caldwell, Regional Administrator
U.S. Nuclear Regulatory Commission
801 Warrensville Road
Lisle, Illinois 60532-4351

Dear Mr. Caldwell:

I would like to convey to you my opposition to the restarting of the Davis-Besse Nuclear Power Plant. FirstEnergy has shown such a disregard for public safety that I think that the NRC needs to step in with both feet and make an example for the rest of the power industry before something dreadful happens.

Think for a moment about what would happen if there was a core meltdown at Davis-Besse. All of the farmland in that area would be taken away from family farmers and shut down for an unknown future. Lake Erie would be contaminated affecting millions of people in the U.S. and Canada. My family lives [REDACTED]. I also know that this damage is not hypothetical. My husband worked on a project to stabilize the [REDACTED]. We know what the meltdown did there.

In closing, please give serious thought to a permanent closure of Davis-Besse. I would appreciate a response regarding this. Thank you.

Sincerely,

Lisa Elliott

October 15, 2003

Jim Caldwell, Regional Administrator
U.S. Nuclear Regulatory Commission
801 Warrenville Road
Lisle, IL 60532-4351

Dear Mr. Jim Caldwell-

As both an [REDACTED] Citizen and U.S. citizen, and a healthcare professional, I would like to voice my concern over the safety of the Davis-Besse Nuclear Plant. In light of the history of two near disasters and the recent discovery of a boric acid hole in March 2002, I ask that you and your administration consider the grave risks of operating this plant over the energy benefits produced.

Without further elaboration about the imminent risks associated with a nuclear meltdown, especially to the healthy and safety of Ohio citizens and the waters of Lake Erie, I plead that the Davis-Besse Plant remain closed.

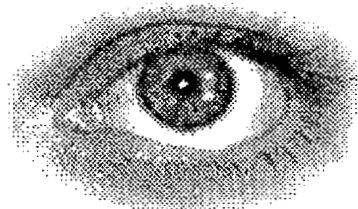

Please reply with your intended actions for this nuclear plant. I thank you in advance for your attention to this matter.

Sincerely,

Ronald R. Gambino, RN, BSN, MPA

[REDACTED]
[REDACTED]

**Look me in the eye
and tell me Davis-Besse is safe**

Dear Mr Caldwell,

We are concerned for the safety of our family and community and ask you to please keep the Davis-Besse nuclear reactor closed. There is too great a risk to the lives and future health of the people who reside in [REDACTED] if the plant should attempt to open. Please, we want our 6-year son to grow up without fearing for his safety from a nuclear disaster - there are too many other things in the world to fear and this should not be one of them. Please keep the reactor closed for the safety of the citizens of the Lake Erie shoreline and surrounding communities. Your attention to this matter should be a top priority on your agenda.

Respectfully Yours

The Scott Family
Robert, Melissa + Justin

To,
James Caldwell
NRC Regional Administrator
801 Warrenville Road
Lisle, Illinois 60532-4351

Dear Sir,

I have worked in the [REDACTED] station in [REDACTED], holding responsible positions for over [REDACTED]. I have seen that people involved in design, engineering, quality assurance, operation, maintenance, safety evaluations, etc. always look for safety as they are fully aware of the grave consequences and the nuclear catastrophe that may result because of their mistakes. Hence, these groups very critically examine and analyze the cause of failures, write down detailed procedures for repairs modification and quality assurance tests that may be required. Regulatory Authorities are also informed/consulted and their permission sought if required. I am sure Davis-Besse nuclear power plant staff, who are now showing great confidence in the repairs they have carried out, must have undergone through all the process, safety evaluated and regulatory bodies taken into confidence.

Today nuclear power program in many countries has been curtailed or completely stopped because of some apprehension of their safe operation. But if we see the records of availability, efficiency, reliability and safety aspects, we find that most of the nuclear plants have far superior records than fossil fired plants in the world. They also don't produce the green house gases, which has become a matter of great concern in almost all parts of the world and WHO.

In view of the above I support the restart of FENCO'S Davis-Besse nuclear power plant.

N.P.SRIVASTAVA

OCT 20 2003

October 22, 2003

Jim Caldwell, Regional Administrator
U.S. Nuclear Regulatory Commission
801 Warrenville Road
Lisle, IL 60532-4351

Dear Mr. Caldwell:

I am writing this letter to ask you to keep the Davis-Besse nuclear power plant near my home closed.

This plant has had a history of problems and I am concerned for the safety of my family and myself. Studies have shown that a meltdown at Davis-Besse would cause thousands of deaths and radiation related injuries.

An accident at this plant would also destroy Lake Erie, which is essential to Ohio's tourism, fishing and agriculture industries and would potentially damage the Great Lakes system, the largest freshwater system in the world. Lake Erie also supplies freshwater to over eleven million people in this area.

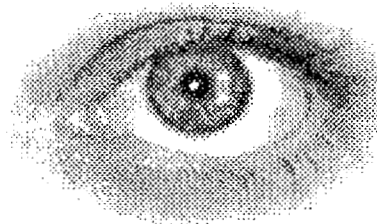

I am relying on the NRC to make public safety its top priority and not First Energy's schedule. Thank you for your consideration and I look forward to a response.

Sincerely,

Theresa M. Smith

Look me in the eye
and tell me Davis-Besse is safe

July 11, 03

Dear Mr. Dyer,

I live in [REDACTED] with
my husband and [REDACTED] month old son.

I have been following the story of the
Davis-Besse plant, and am concerned
about the plant's safety. I am concerned
about both the possible environmental
damage which could occur as the result
of more leaks, as also the damage to
human life. As a mother, I want my
child and all children to grow up in
a safe, healthy world. Please keep
the Davis-Besse plant closed, and the
cost of reopening could be so potentially
high.

Sincerely

Lara To Angelini

Regional Administrator
U.S. Nuclear Regulatory Commission
801 Warrensville Road
Lisle, IL 6053204351

Re: Davis-Besse nuclear Reactor

Dear Mr. Dyer:

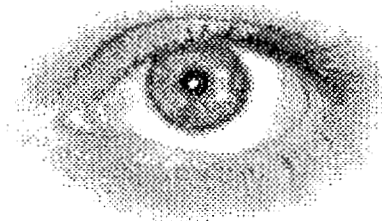

I urge you to continue to keep the Davis-Besse nuclear Reactor off line until it is thoroughly inspected for maintenance neglect and aging problems. I have serious concerns that First Energy is failing to properly maintain the reactor to insure our safety. I'd like to see detailed schedules and maintenance slips to maintain the plant instituted that must be signed by the worker completing the inspection and turned in to your office. I'd like to see periodic verification checks made to see that these maintenance checks are being made.

I fear for my friends and co-workers near the Davis-Besse plant for minor contamination due to excessive concern for the immediate fiscal bottom line. I also fear for myself and my family from the fall out from a more serious accident. The only way this reactor can continue to function safely in our neighborhood is if you and your office make sufficient detailed demands to demand that it operate within safe limits.

Sincerely,

Valerie Brandenburg
Attorney-at-law

In Re: Davis-Besse nuclear power plant

Dear Mr. Dyer,

I am prompted to write by the advocacy efforts of Ohio Citizen Action volunteers.

I am writing regarding the Davis-Besse nuclear power plant. I am appalled that the rusted exterior of the reactor was not earlier detected nor the plant shut down for its continuing inattention to matters of environmental and human health and safety.

You have oversight concerning this matter. I urge you to take action in accordance with the general public interest. FirstEnergy's interests have been amply accommodated in the recovery rate they managed to obtain from the Ohio PUC. Your job is to protect the public.

I trust you will do so.

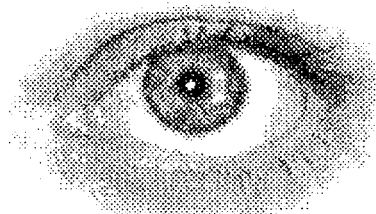

I appreciate your time and attention.

Sincerely,

/s/

Barbara E. Rose

My Name is MARK AMBROSIO and
I LIVE IN [REDACTED] and
CURRENTLY RESIDE [REDACTED]
I AM CONCERN WITH THE SAFETY OF
MY FAMILY'S FRIENDS REGARDING
THE DAVIS-BESSE NUCLEAR PLANT.
SHOULD THEY WORRY MORE ABOUT THE
ENERGY RESOURCES RATHER THAN THE
SAFETY OF MANY PEOPLE. I THINK
SAFETY OF THE COMMUNITY SHOULD
BE #1. I KNOW THE COMPANY
PROBABLY TRIES TO DO WHAT THEY
HAVE TO ACCORDING TO REGULATIONS
BUT, IS IT WORTH MANY PEOPLE'S
LIVES IF THEY DON'T SHUT DOWN
THE PLANT IF THEY CONTINUE TO
HAVE THESE PROBLEMS. SURE IT COSTS
MONEY TO FIX. BUT SAFETY SHOULD
BE THE FIRST KEY. IN MY
OPION THE DAVIS-BESSE NUCLEAR
REACTOR SHOULD BE CLOSED RATHER
THAN RISK TAKING THE RESPONSIBILITY
OF ITS OUTCOME SHOULD AN ACCIDENT
OCCUR.

MARK AMBROSIO

Dear Sir

My name is Jeff Kinnison, I live at
[REDACTED]

I have great concerns about a Nuclear
Plant in Ohio.

Why isn't First Energy accountable for what it
does at the plant. Why so much trouble?

Why is the NRC dragging its feet about things?

I am not yet water but I do ~~remember~~ remember
things like LSD trips America troops took.

Nuc testing with U.S. troops.

Agent Orange

Gulf War

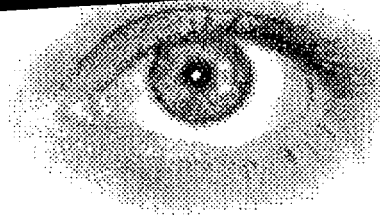

Why is NRC trying to do the same?

The people have a right to Know

Are we ~~safe~~ safe or ~~not~~ what?

And you in E.L. do you really care about Ohio?

signed Jeff Kinnison

To: James Dyer (NRC)

Dear Mr Dyer,

I am in [REDACTED],

[REDACTED] and I'm concerned about
the safety of my family and neighbors.
Your Commission's top priority must be
public safety. I am requesting that you
keep the Davis Besse Nuclear Reactor
closed. Statistics have shown what the
catastrophic results of radiation exposure
can be. This is very frightening. I would
appreciate a response.

Mrs Anna Dunn
[REDACTED]

August 12, 2003

Mr. Jim Caldwell,

Our family lives in [REDACTED] -
[REDACTED] Davis - Besse for us to be
deeply concerned over its operation.

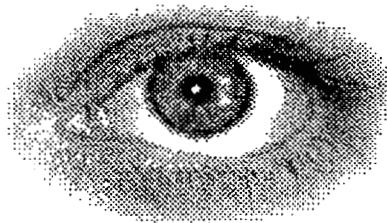

I'm writing to ask you to enforce
your authority to keep this plant closed!
No one knows more than you, yourself
how unsafe these plants are! There's no
such thing as a "safe way" to dispose of
nuclear waste. And this plant ~~is~~ particular
come a hair's breath from disaster!

Your primary responsibility as far as I'm
concerned is the public safety and welfare.

For the common good, please don't let the
plant again.

I'll be looking forward to your reply.

Mrs. Valerie Pasqualini

Dear Mr Caldwell,

I live in [REDACTED] and I am concerned about the safety of the Davis - Besse Nuclear power plant. Not only have they had two near disasters but it is an ongoing health risk to people in the Greater Cleveland area. My biggest concern is the fact it is on Lake Erie which is our drinking supply.

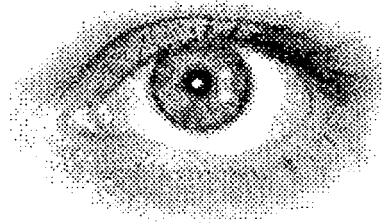

Your top priority must be the safety of our families not First Energy's schedule.

I am please asking you to keep Davis-Besse Nuclear plant closed.

My name is Paige Dickey [REDACTED]

[REDACTED] I please ask for your immediate response. Thank you

Paige Dickey

**Look me in the eye
and tell me Davis-Besse is safe**

Dear Mr. James E. Dyer,

When the Ohio Citizen Action came to my door urging me to write this letter, it was not the first time I heard of the Davis-Besse problem. To me, a plant such as this is too dangerous to operate in our community. I live in [REDACTED], not far from the [REDACTED]. With two near misses in twenty years, I am not prepared to risk the safety of thousands of people on a chance that this disaster may happen again. Lake Erie helps sustain millions of people. With only $\frac{1}{4}$ of the earth's water being potable, we should not put such a valuable resource in harms way because of an unsafe plant like Davis-Besse.

The money we put into Davis-Besse could better be used to find safer, renewable sources of energy. We should be looking toward a future where these accidents are obsolete instead of floundering to perfect an imperfect plant. Please listen to my voice and the voice of many other Ohioans. We value our safety and know that you do too. Keep Davis-Besse safe - keep it closed.

Sincerely,

Cyndi [REDACTED]

Look me in the eye
and tell me Davis-Besse is safe

Sept. 4, 2004

Dear Mr. Caldwell —

I live in [REDACTED] & I

am concerned about the safety of the
Davis-Besse nuclear power plant.

Please make public safety
your top priority & closed Davis-
Besse nuclear reactor.

Please respond.

Sincerely,
Meg Manny

[REDACTED]

Dear Mr. Caldwell,

I am a resident of [REDACTED]
and am concerned for the safety of myself
and my family. The NRC's top priority must
be public safety and not First Energy's
schedule. Please keep Davis-Besse's nuclear
reactor closed. Please respond to:

Kiersten Boden
[REDACTED]
[REDACTED]

Thank

**Look me in the eye
and tell me Davis-Besse is safe**

Dear Sir

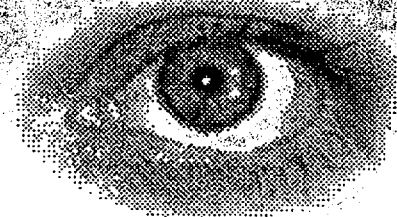

I'm writing this letter in regards to concerns with the Davis-Besse nuclear power plant. I'm asking you to take charge and stand up for doing the right thing. You need to make sure that the power plant is safe and inspected properly. If not you know that millions will die from your hands of not doing the right thing. Also one day we all will be judge for what we did on this Earth. There will be consequences for our actions along with not having peace while here on Earth. Thank you for a immediate response. Remember safety first not just Energy's Schedule. (because money is there only concern)

Thank you,

Judith Azuela
[REDACTED]
[REDACTED]

I live [REDACTED] and I have children whom I hope will grow up and enjoy the Earth as you and me will.

SEP 11 2003

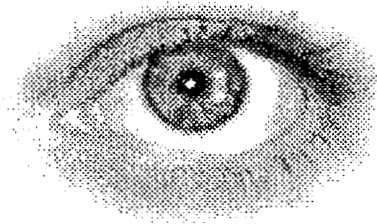

**Look me in the eye
and tell me Davis-Besse is safe**

Mr. Caldwell,

I live in [REDACTED] and
I am concerned about my families safety.
Safety and health issues are first and
foremost of importance. First energy's
Schedule should not even be a factor in decision
making when it comes to putting lives in danger.
I am asking that you keep this plant closed.
I would like to see our lives and environment
spared from the outcome of this plant when errors
occur. This is a serious decision and one can
never turn back the hands of time - even to
fix a mistake. The land, lakes and citizens of
this area are #1!!

I am anxiously awaiting a response from you
concerning this issue, and thank you in advance
for sending me.

Mrs. Jackie Pratt
[REDACTED]

Look me in the eye
and tell me Davis-Besse is safe

Att. Mr. Jim Caldwell:

Concerning the Davis-Besse Plant. Its
certainly has its problems.

This plant should remain closed, for
it has had too many problems in the
past. The Environmental problems would
be devastating.

All piping for a plant of this nature
should have been of stainless steel of
the best Variety.

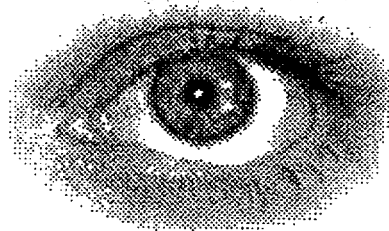

Your consideration to keep this plant
closed would be of the utmost importance.

Thank you for your consideration in
this matter.

I remain a Concerned
Citizen,

John Wadian

Look me in the eye
and tell me Davis-Besse is safe

9-2-2003

MR Caldwell~

I am ~~now~~ writing to you to encourage
you to keep the Davis-Besse nuclear reactor closed.
My family and I live approx. ~~10~~ miles from
the both Perry Nuclear and Davis Besse and
the fear of problems with the plants is a
everyday threat. With the recent problems
with First Energy, I find it ~~hard~~ hard to
believe that they would do everything possible
to keep the public safe. Please for our
future, and future generations, keep
Davis-Besse closed!!!

K Kinseel
~~_____~~

Dear Mr. Caldwell:

We live in [redacted] &
are concerned about our family's
safety with the nuclear waste.

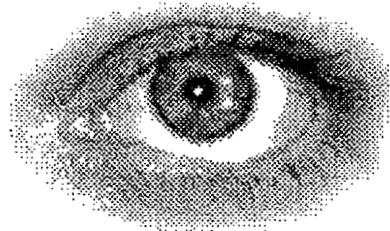

We know that the NRC's top
priority must be public safety not
First Energys schedule.

We would like to request that you
keep the Davis-Besse nuclear reactor
closed. Thanks in advance!

Sincerely,

Timothy & Kathleen Dillon
[redacted]
[redacted] [redacted] [redacted] [redacted]

P.S. We would
like an immediate response! Thanks,
Again!
KD

**Look me in the eye
and tell me Davis-Besse is safe**

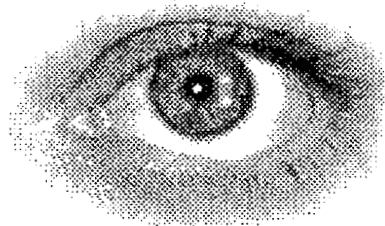

Dear Mr. Caldwell,

I DO NOT BELIEVE DAVIS-BESSE IS SAFE
FOR OPERATION. I BELIEVE MY FAMILY IS SAFER
WITH IT SHUT DOWN. PLEASE DO NOT RE-OPEN
DAVIS-BESSE UNTIL EVERY PART OF THAT PLANT
IS SAFE - NOT JUST BECAUSE OHIO EDISON (FIRST ENERGY)
SAYS IT IS.

Thank you For Your Consideration!

Susan M Kunkel

[REDACTED]
[REDACTED]

**Look me in the eye
and tell me Davis-Besse is safe**

Dear Mr. Caldwell,

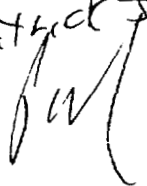

My name is Patrick J. Kinsella. I live at [REDACTED]
[REDACTED]. This is about [REDACTED] miles
east of the Davis-Besse Nuclear Power Plant.

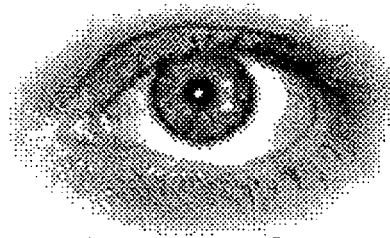

Davis-Besse has serious maintenance issues & its
proximity to Lake Erie and population centers makes
re-opening the reactor too risky.

I request that you do everything in your power
to keep the Davis-Besse reactor closed for good.

Please let me know your opinions on this. My
address is above.

Sincerely,

Patrick J. Kinsella

**Look me in the eye
and tell me Davis-Besse is safe**

Mr Jim Caldwell,

I live in [REDACTED]

[REDACTED] to the Lake Erie.

Please Keep the Davis-Besse nuclear
reactor closed for our safety
I have read of the two near
disasters re: The power plant.
Keep our citizens safe!

Sincerely
Margaret Anakora

[REDACTED]

[REDACTED]

Please write & let me know
what you will do.

**Look me in the eye
and tell me Davis-Besse is safe**

Dear Mr. Caldwell,

My name is Hilda Habat and I am
a resident of [REDACTED]. My family and
I are concerned with our health and safety
due to the meltdown at Davis-Besse. As a
resident of [REDACTED] I feel it is my
duty to ask that the nuclear reactor stay
closed due to the potential threat to our
lake and environment.

Sincerely,
Hilda Habat

P.S: An immediate response
would be much appreciated.

Hilda Habat
[REDACTED]
[REDACTED]

**Look me in the eye
and tell me Davis-Besse is safe**

Hello Mr. Caldwell,

As you can see there is a concern about the health and safety of the American people in this region. Twenty years ago there was a similar concern and the American Government along with big business used the EPA to close most of the Union coal mines in District 6.

It was said that there was too high of a pollution factor in high sulfur coal.

EPA and the Government also closed down other major industries along the OHIO RIVER to protect WE THE PEOPLE from ourselves. Now the products that we made here in this region are made in ASIA. What a profit big business has produced for its investors.

Your Administration is now responsible to protect WE THE PEOPLE, not from ourselves, but from BIG BUSINESS whom is trying to make a profit for its investors at the cost of Our Health and Safety.

We The People are asking you to please keep the Davis-Besse nuclear reactor closed.

I am asking you Mr. Jim Caldwell, "Would you be willing to bring your family to live by this plant?" Who are we suppose to trust to keep our environment safe if not you?

Coal fired plants pollute the air which can be cleaned by nature and other means. Nuclear plants can IF NOT MAINTAINED PROPERLY, like Davis-Besse, pollute the air, water, and the ground forever making this region inhabitable for many lifetimes.

This is your call Mr. Caldwell.

Thank You for your time,

Jim Skrtich
Jim Skrtich

[REDACTED]

8-18-03

Dear Sir,

After our recent "Black out"
I understand First Energy may be
in trouble concerning risks. We
are also concerned with their well-
known problems with Davis-Besse.

If we must have nuclear
reactors — they must be operated
safely.

Please make sure First Energy
does their job.

Thank you,
Larry and Carolyn Ravea

[REDACTED]

SEP 15 2003

Jim Caldwell,

My name is Michael Crawford, my family and I live in [REDACTED] not too far from [REDACTED] and the [REDACTED]. I am concerned about the safety of the Davis-Besse nuclear power plant due to its "near misses" and "close calls". Based on the 1982 Study performed by the NRC there could be many dangers associated with its operation ranging from cancer to economic disaster. Please remember that the NRC's top priority must be public safety and not FirstEnergy's agenda. Please keep the Davis-Besse nuclear reactor closed. I am interested to hear what you are thinking regarding this matter.

Sincerely,

Michael Crawford.

Michael Crawford
[REDACTED]
[REDACTED]

Look me in the eye
and tell me Davis-Besse is safe

Dear Mr. Caldwell

As residents of [REDACTED] we appreciate
the value of living on the [REDACTED]

We also realize that while nuclear power can
be an inexpensive and efficient form of energy,
it can also be life threatening and unbelievably
dangerous if not properly looked after.

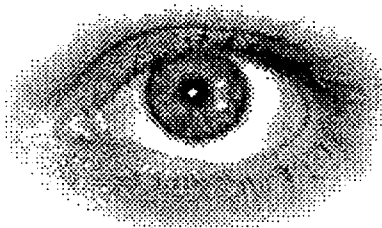

The vision of Homer Simpson sleeping at a control desk
while lights and siren are going off, is not really funny.
While I know that is the comic intent, in real life
I can't even imagine the whole, life changing ^{his} picture
if an accident should happen because of failures due
to leaks, cracks & holes and poor maintenance. The

property of nuclear energy is to last a very long time.
Frankly, the risk of accidents is too great. It's not an
accident that can just be "cleaned up". It has a residual
effect that can last generations, for humans and air and
land.

Please keep Davis-Besse Closed. Thank you
for listening

Constance Lartin
[REDACTED]
[REDACTED]

SEP 1987

Look me in the eye
and tell me Davis-Besse is safe

Aug 4, 2003

Jim Caldwell Regional Administrator
U.S. N.R.C., 801 Warrenville Rd. Lisle Ill. 60532-4351

Sir;

My family and me live in [REDACTED]
and with a Nuclear Power Plant [REDACTED] of
where we live is of great concern to me about these
near misses that could be a disaster in the making.

The contamination of the waters of Lake Erie is
astronomical to the general public caused by the amount
of radiation released. Steps should be taken to keep the
Davis-Besse plant shut down for the present, and also to
make sure the Perry Plant is completely inspected to
see if anything is in the same condition as exists at
the Davis Besse Plant. After Public Safety should come
first over anything else.

The amount of sickness and deaths is not worth the
the benefits of this plant to be re-opened.

Yours

Leo D. Schmand
[REDACTED]
[REDACTED]
[REDACTED]

Dear Jim Caldwell

I have recently moved (May 2003) from [REDACTED] (Davis-Besse Area) to [REDACTED]

My family and I lived in the Davis-Besse area for [REDACTED] years on the [REDACTED] end of the [REDACTED]

Moving to town, [REDACTED], is approx [REDACTED] miles to the southwest of the D-B site.

This I know is not far enough away from being in a safety area if the plant ever has a major accident, but it gives me some peace of mind just being out of sight of what I call a disaster waiting to happen.

I have lived by this troubled nuclear plant all these years not knowing what fate I might meet if a major accident were to happen.

Many times over the years D-B has had many incidents, some minor, some major and each time the public was always told no safety issues were present, no harm or claim to the public.

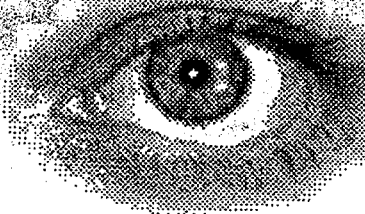

I have great distrust in the safety issues, the management and the ability to ensure a safe environment for the [REDACTED]

NRC

As a resident of [REDACTED]
& a great lover of our beloved Lake
Erie, the Davis Besse Plant must be
Closed Permanently until such time
as ~~Nuclear~~ Nuclear energy is accident
free. I was appalled at how close
we came to a nuclear meltdown.
I do not wish to live in a
world where I am in constant
fear of death & of our great
source of fresh water is compromised
for the benefit of First Energy &
its material concerns. I would rather
live w/ less energy & more safety
Please respond to this plea.

Jim Caldwell Regional Administrator
U.S. Nuclear Regulatory Commission
801 WILSONVILLE ROAD
LISIE, IL, 60532-4351

Dear Mr. Caldwell,

Our living [REDACTED] To The Davis-Besse Nuclear Power Plant is of
great concern to us. Your position, as Administrator of the
Regulatory Commission, is our only line of defense against disaster.
You have a tremendous amount of power - Backed by "We the
People, for the people, and by the People" AND we want to support
you in your fight, upon our behalf, to keep Davis-Besse safe.
Shareholders, investors, boards of directors, etc. know going in that
they may face financial losses - This gamble is their choice.
Davis-Besse must answer not to "the People". If the
'Almighty Dollar' comes before the Commission of
The Almighty God to have your brother as your god, you
could say you're somewhat of a Caesar. We hope
your good name, integrity, and pride in a job well
done strengthens you to keep up the good fight.
Look your children in the eye and let them know you
stand up for what's right. We pray there is no disaster
on your watch. Thank you for all your efforts.

Marilyn A. Allamon

**Look me in the eye
and tell me Davis-Besse is safe**

Mr. Jim Caldwell,

My family lives in [REDACTED], on the [REDACTED]
[REDACTED] and only a [REDACTED] from the power
plant. If this plant is rarely on-line and poses
environmental, economic, & health concerns for our
area I encourage you to keep the plant closed.

I'm not sure how much money this plant generates
for First Energy, but I am sure of the cost of clean-up,
irreversible environmental damage & lawsuits after a
disaster at Davis-Besse. It's just not worth it to
re-start the plant. Jim, I would ask that you give me
an update on plans for this plant. Please send them to
the following address:

Davis Schwanger
[REDACTED]
[REDACTED]
[REDACTED]

Money has always been DB greatest concern, profit first and safety last.

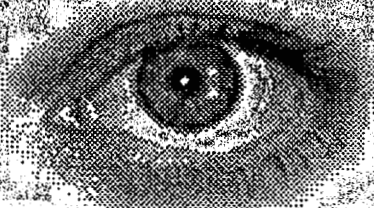

Make big money, keep stock holders happy, make big salaries and incentives for management, while neglecting maintenance, safe work environment and meeting concerns of locals and their best interests, as long as the tax base keeps the locals happy. They were hiding the true facts, (PROFIT FIRST)

NRC police actions trouble me, did they know the truth & the facts, were they overlooking the true issues and shattering the Nuclear industry.

For NRC to gain back (TRUST) they must keep D-D closed until they are 110% plus sure of all safety issues or moth ball the plant forever and ever.

As a youth many years ago I was a duck hunter and hunted on the present Davis-Besse area. If only we could turn time back to where there were no Nuclear industries to threaten the people and the world they live in.

Thank you for your time, I will look forward to a prompt response, keep up your efforts they are appreciated.

**Look me in the eye
and tell me Davis-Besse is safe**

Mr. Jim Coldwell,

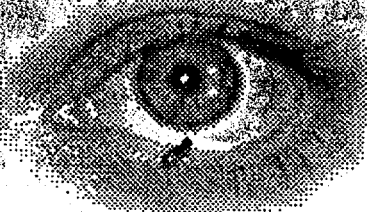

Please keep the Davis-Besse Nuclear
reactor closed.

Your top priority should be public
safety and not First Energy's schedule.

I live in [REDACTED] and I am very
concerned for my families safety and the
safety of all the families in the area.

Can you be sure of no accidents? No one
can be sure of that. Please keep our
families safe.

Margie Moksym

Look me in the eye
and tell me Davis-Besse is safe

DEAR MR. CALDWELL,

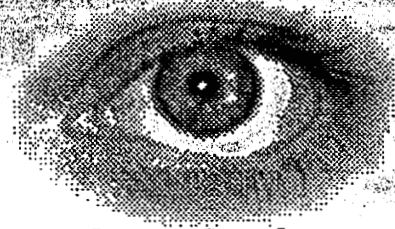

I WAS BORN AND RAISED IN THE [REDACTED] AREA. FOR THE PAST [REDACTED] YRS. I HAVE LIVED IN [REDACTED] [REDACTED] THROUGH THE YEARS I HAVE NOTICED THE DEFERIORATION OF LAKE ERIE, WITH POLLUTION FROM INDUSTRY, RAISING THE MERCURY CONTENT SO ANY FISH FROM THE LAKE IS NOT EDIBLE. BACTERIA ALSO PERMEATES THE LAKE MAKING IT DANGEROUS TO EVEN SWALLOW WHILE SWIMMING.

IF A MELTDOWN WOULD OCCUR AT DAVIS-BESSE IT WOULD BE CATASTROPHIC FOR THE POPULATION IN THE GREAT LAKES AREA. I SEE NO FUTURE ADVANTAGE FOR OUR RESIDENTS IN THE RE-ACTIVATION OF DAVIS-BESSE. YOUR ORGANIZATION HAS BEEN CHARGED WITH OUR SAFETY, NOT THE BEST INTERESTS OF DAVIS-BESSE OR ANY OTHER NUCLEAR FACILITY. I HOPE YOU WILL TAKE THIS LETTER UNDER ADVISEMENT AND ACT ACCORDINGLY.

Sincerely,
Mike Bowatz

Jim Caldwell, Regional Administrator
U. S. Nuclear Regulatory Commission
801 Warrenville Road
Lisle, IL 60532-4351

Dear Mr. Caldwell:

I would like you to look into the operation of the Davis-Besse nuclear plant. This plant has had two near disasters: one in 1985 and more, recently on March 6, 2002. A meltdown at this plant could cause severe illnesses and fatalities to the people who live and work around Cleveland, Ohio. Plus, any meltdown would ultimately affect Lake Erie. This freshwater source supplies water to twelve million people. Lake Erie is my families' water source; therefore, I am concerned with the possible contamination of Lake Erie as are the people of my community. Please remember that the NRC's top priority **MUST** be public safety. Please keep the Davis-Besse nuclear reactor closed.

Thank you,

Janice Costaras

801 Warrenville Road
Lisle, IL 60532-4351

Dear Mr. Caldwell,

I am writing to you as a highly concerned resident of [REDACTED]. My concerns regard the Davis-Besse nuclear plant which, as you are well aware, has experienced two "close calls". If reopened, Davis-Besse would endanger thousands and would threaten our environment and regional economy in countless ways. The Nuclear Regulatory Commission must put public safety first, not FirstEnergy's agenda.

Please do the right thing and keep the Davis-Besse facility closed. I look forward to a prompt response to the concerns I have expressed.

Sincerely,

Carrie Tate

[REDACTED]

SEP 15 2003

[REDACTED]
September 6, 2003

Dear Mr. Caldwell,

For too long, First Energy has put our citizens in harms way. They have taken advantage of NRC's reprieve, i.e. to give them more time to correct the problem(s). Instead of being responsible, in the first place, they have neglected their plant, their employees safety, as well as, the safety of all the citizens in the area.

It is now your responsibility to draw the line. Do not allow them to restart the Davis-Besse Nuclear plant until — and only then — they have repaired the problem(s).

Please do not put blinders over your eyes. Please do not allow Big Business to do the regulating! I am counting on you!

Yours truly,
(Mrs.) Patricia K. Corrane

Jim Caldwell
Regional Administrator
U.S. Nuclear Regulatory Commission

Dear Mr. Caldwell

I am a resident of [REDACTED] and I am writing this letter in behalf of my wife, my four month old baby and the whole community of Ohio.

I was informed regarding the safety issues involving the David-Besse Nuclear Power Plant. And I would like to freely express my opinion that this should be looked at seriously.

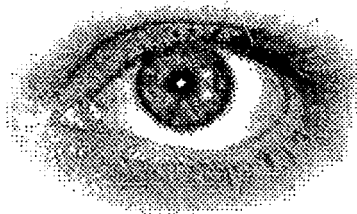

I hope through your leadership, NRC would take serious steps to safeguard the citizen's of Ohio from any nuclear disaster. I hope you'll agree that prevention is the best solution. And so we are hoping that you'll keep the Davis-Besse nuclear reactor closed at all costs.

I also hope you'll keep the public informed with all the facts, current plans, and safety measures being address by NRC to make sure the problems are being solve regarding these issues.

I would appreciate immediate response to help us have a peace of mind.

Thank you.

Sincerely,

and tell me Davis-Besse is safe

10/30/03

Dear Mr. Caldwell,

I'm a little confused as to why we even need to write to you, to keep Davis-Besse closed. Clearly, with 2 near-disasters in very recent history, it seems obvious to the rest of us that because of the high probability of disaster, it would remain closed until fixed.

We live in [REDACTED] and hope that our safety will not be compromised because of a big company's immoral actions.

Please do the right thing so you can sleep at night. Thank you for your attention.

Cindy Kennedy

**Look me in the eye
and tell me Davis-Besse is safe**

Mr Jim Caldwell,

I understand that there are some troubling issues with the Davis-Besse nuclear power plant. Slipshod management has put citizens of Northern Ohio, Lake Erie, and surrounding areas at grave risk because someone wants to make a buck on an ill-conceived monstrosity. I am requesting that you keep this nightmare closed until it can be properly repaired and the reactor will not pose a risk to public health and safety. If it cannot be repaired properly, then close it forever and dismantle the place and quit throwing good money after bad (especially, the public's).

Please be so kind to let me know what you intend to do.

Henry L Crowell

**Look me in the eye
and tell me Davis-Besse is safe**

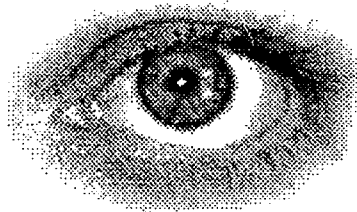

Mr. Caldwell -

Normally I Am Not One To Anticipate In Letter writing
OUT CRIES, BUT WITH THE LATEST NEWS OF A HOLE
BEING FOUND IN THE REACTOR, IT CAUSES THE HEARD OF
A FAMILY TO BE CONCERNED ABOUT THE HEALTH AND
SAFETY OF HIS (OR HER) FAMILY, AS WELL AS THE
AREA HE AND HIS FAMILY (IN THIS CASE ME AND MY
FAMILY) RESIDES.

ENERGY AT A CHEAPER PRICE IS OUTSTANDING, WHEN
THE PLANT THAT PRODUCES THAT ENERGY CAN POTENTIALLY
LEAD TO CANCER, LEUKEMIA, AND/OR OTHER POTENTIAL
HEALTH CONDITIONS THAT CAN LEAD TO HOSPITALIZATION
I BELIEVE ITS USE SHOULD BE RECONSIDERED.

IF THIS REACTOR IS INEFFICIENT AND A HEALTH RISK
AND CAN POTENTIALLY AFFECT WAGES AND OUR ECONOMY
(FAMILY - PROPERTY) PLEASE CLOSE THE REACTOR
THANK YOU FOR YOUR TIME, AND I WOULD APPRECIATE YOUR
RESPONSE,

Richard Waldrow

October 23, 2003

Jim Caldwell, Regional Administrator
U.S. Nuclear Regulatory Commission
801 Warrenville Road
Lisle, IL 60532-4351

Dear Mr. Caldwell,

My family and I live in [REDACTED] south of [REDACTED]. We are relatively close to Lake Erie and are concerned about safety issues at the Davis-Besse nuclear power plant.

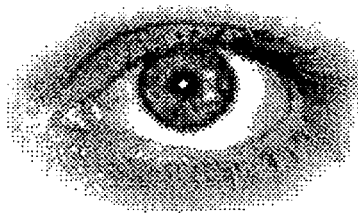

No one has to be an expert to understand the ramifications a melt down at this plant would have on the water table of Lake Erie's surrounding communities.

The National Regulatory Commission's first priority must be the safety of the public, not the schedule or profits of First Energy. I think First Energy has displayed a lack of good faith with the latest electric grid failure issues. They should not be granted any more concessions.

Please keep the reactor closed. The potential loss of life and health for the community, and the staggering recovery costs would be impossible to bear for an area that has been hit as hard economically as this area has been the last few years.

Thank you for your consideration.

801 Warrenville Road
Lisle, IL 60532-4351

10-8-03

Dear Mr. Caldwell,

My family and I reside just south of [REDACTED] and the Davis-Besse Nuclear Power Plant. Due to the power plant's disastrous history and the NRC's failure to create and maintain a safe environment in and around the plant we feel that the plant should remain closed. NRC's top priority must be public safety and human and environmental welfare, not First Energy and their need for big business.

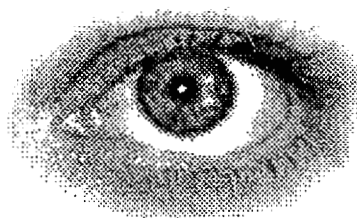

An accident at the plant, whether it is deemed large or small, could cost my family for the rest of our lives. I am not willing to risk the life of my newborn son, his well-being or welfare. Truly the lives of those living around and in the vicinity of the power plant are worth much more than the risk? I believe so.

The disaster at Chernobyl Nuclear Power Plant should be a lesson the world learned from. If history is forgotten, it is doomed to repeat itself. This would be a very tough lesson to take. Unfortunately it seems that history is on the road to repetition with the reactor at Davis-Besse.

Keep Davis-Besse Nuclear reactor closed.

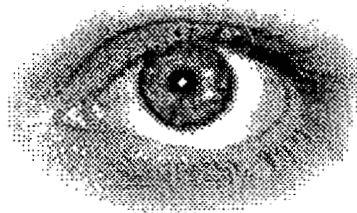

Sincerely,

Jennifer A. Dell

Thank you

Mrs. J. Pitner

Look me in the eye
and tell me Davis-Besse is safe

DEAR Jim Caldwell,

I am A resident of [REDACTED]

I think the best predictor OF FUTURE performance
is WHATS happen in the PAST/HISTORY. This power
plant's history is terrible, I would like to see
this plant closed. I have to believe with
All the geniuses we have in the U.S.
we could come up with ^{an} Alternative energy
sources at a lower cost. Lets close this hazard
we should think safety first. Dont be blinded by
greed, politics, and money.

PAUL RYPINSKI

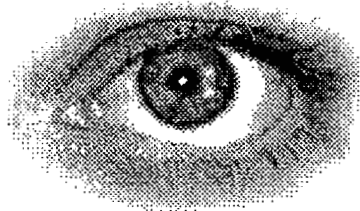

**Look me in the eye
and tell me Davis-Besse is safe**

Jim Caldwell

*Please keep Davis
Besse closed for the
public safety.*

M. Storum

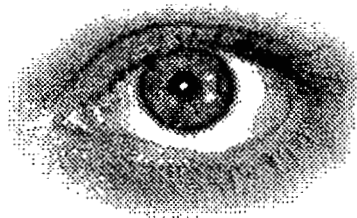

**Look me in the eye
and tell me Davis-Besse is safe**

Dear Jim Caldwell,

I am a resident of [REDACTED]
and was notified of the dangers of the Power plant
at Davis-Besse. My family and I realize all
of the concerns are real and a threat to
us if the power plant reopens. I for one
would like to see the Perry Power Plant closed
as well as all the others. I feel there is got to be
another way to receive the power in a safer
more efficient way than through nuclear power.
Please keep the plant at Davis-Besse
closed.

Very truly,
Laura E. Rypinski

Look me in the eye
and tell me Davis-Besse is safe

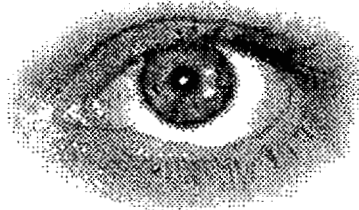

Put safety in front of profit.
Don't let happen another Chernobyl.

Concern Resident,

Martin Smilovich

[REDACTED]

[REDACTED]

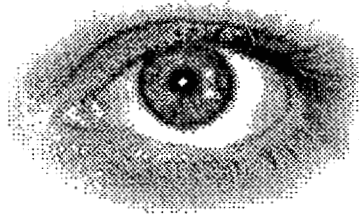

**Look me in the eye
and tell me Davis-Besse is safe**

Dear Mr. Caldwell,

I would like to first start by saying that I am not necessarily against Nuclear Power, however, I am concerned about the safety of nuclear power. I believe the NRC should be more concerned with a Power Plant that is working properly not just a schedule. Unless First Energy can prove, by allowing inspections by the NRC, that the Davis Besse Plant is absolutely safe, I feel the plant should be kept closed.

Michelle Gabbato

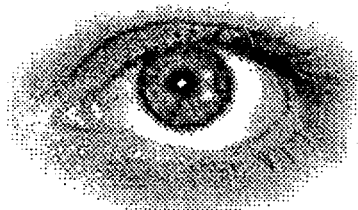

**Look me in the eye
and tell me Davis-Besse is safe**

Jim Caldwell,

Better safe than
sorry!

Mark Smith

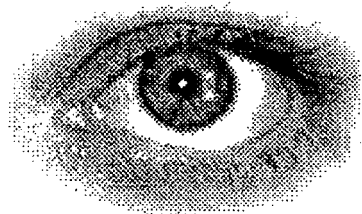

**Look me in the eye
and tell me Davis-Besse is safe**

Dr. Mr Caldwell ~

Please keep our families safe by
keeping the reactor off line.

Sincerely
Kim Gabe

**Look me in the eye
and tell me Davis-Besse is safe**

Mr Jim Caldwell

Please in [REDACTED] and am concerned that
the Davis-Besse nuclear reactor could be
opened.

Please keep the nrc closed

Thank you
Barbara Dehner

Look me in the eye
and tell me Davis-Besse is safe

We live in [REDACTED] and have
family closer to the nuclear power
plant

We are worried about there
safety.

If it is not safe we would
like to see it closed

Kadlub family

**Look me in the eye
and tell me Davis-Besse is safe**

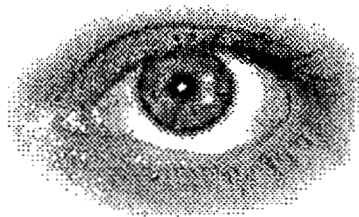

To Whom it may concern:

This letter is to support the
goals of the Ohio Citizens Action
Committee in re: the lack of
proper oversight at the Davis-Besse
plant.

Money & profit are obviously
placed before safety of all citizens.
It is my hope that honest assess-
ment will be forthcoming

Grace Weber

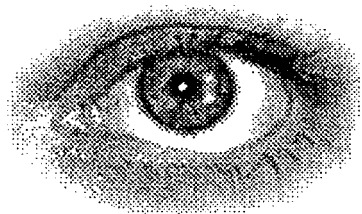

**Look me in the eye
and tell me Davis-Besse is safe**

*As a concerned citizen I agree
that the Davis-Besse nuclear power
plant should continue to be shut down
until the current problems are
addressed and fixed.*

Safety & Health concerns

Larry Kuback

Look me in the eye
and tell me Davis-Besse is safe

Oct 14, 2003

Dear Mr. Caldwell,

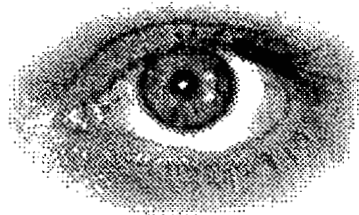

I am writing as a very concerned citizen in [REDACTED] where my family and I enjoy the great advantage of a location on [REDACTED]. It is our fear that re-opening Davis Besse would be a great threat to our welfare and peace of mind. We feel the operation of the plant has been careless in the past, and dread to think of the tragic results from radiation exposure should a melt down occur.

Public safety is far more important than any plans First Energy may have!

I say, keep Davis Besse closed.
Look forward to hearing from you.

Sincerely

Rita B. Kierck

**Look me in the eye
and tell me Davis-Besse is safe**

To : Jim Caldwell (NRC)

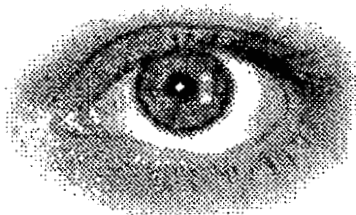

Re : Davis-Besse Nuclear Power in Ohio

As an MD, I'm very concerned about the safety of my family, and, by extension, our neighbors,

therefore my family and I are opposed to the use of the Davis-Besse Nuclear power plant

Would you dare to live nearby that station, and submit to the consequence of its malfunction? I guess not!

Bechzer Hatoun MD
10 / 16 / 03.

Look me in the eye
and tell me Davis-Besse is safe

10/13/03

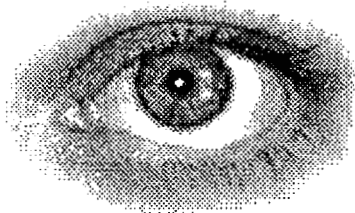

Dear Mr. Caldwell,

I have spent the last [redacted] years of my life living here in [redacted]. Day after day we hear of the many ways our environment is endangered on a global scale. Well, when this endangerment comes so close to home — I have to take a stand!

I am not writing this to beg the NRC to take appropriate action — but as a citizen, demanding the NRC does everything in its ability to keep the Davis-Besse ^{reactor} ~~closed~~ ^{close} for our children, our air, our water, our lives — please, shut down Davis-Besse NOW!

Increase The Peace,

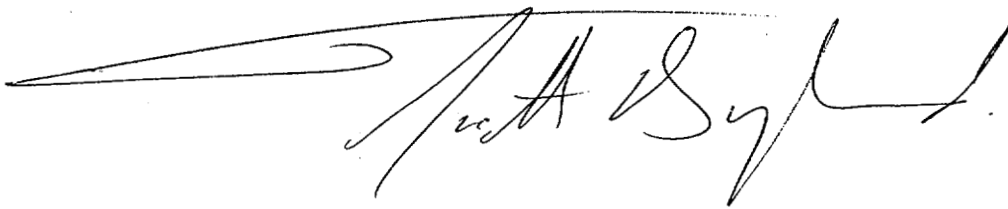

Ryan C. Mackin

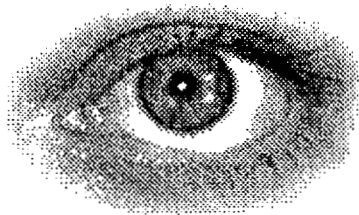

**Look me in the eye
and tell me Davis-Besse is safe**

Lake Erie is our only water supply here
on [REDACTED]
please do not reopen the
Davis-Besse nuclear power plant.

I am getting married this year and
planning on starting a family and would
like to be sure we have safe drinking
water.

10-14-03.

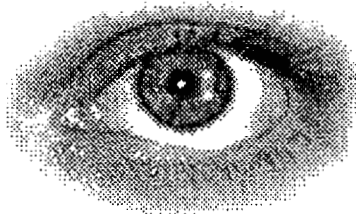

**Look me in the eye
and tell me Davis-Besse is safe**

Dear Mr. Caldwell,

This letter is hoping to reach you and please keep Davis-Besse shut down. Their past record speaks for itself. I do this plea as a concerned parent, who finds this world scary enough without the threat of a meltdown and the obvious consequences of such a meltdown. We have been blessed with our beautiful Lake Erie, and we need to look at ways of prolonging that beauty for our children, and make sure that future generations can live here with the peace of mind that a nuclear meltdown cannot happen here.

Sincerely,
Joia Alexik

**Look me in the eye
and tell me Davis-Besse is safe**

Oct. 14, 03

Dear Mrs. Caldwell,

I am writing in regard to the Davis-Besse nuclear power plant. It was quite a sizable investment and promised to benefit the public. This did not happen with our safety being compromised.

Please take into account the track record over the years in all areas. Please keep the reactor closed to insure the health and safety of all residents.

Sincerely,

Pauline Anolovich

**Look me in the eye
and tell me Davis-Besse is safe**

Mr. [unclear]

I WAS MADE AWARE OF THE
SITUATION OF THE POWER PLANT FROM
A YOUNG MAN WHO CAME TO MY DOOR.
I HAVE READ THE PAPERS AND FEEL
STRONG THAT EVERYTHING SHOULD BE
DONE TO KEEP OUR WORKERS SAFE AND
HEALTHY. THE PLANT, THEN, SHOULD
BE KEPT AS MY DAUGHTER TO CONTINUE
ENJOYING [REDACTED] KNOWING IT'S A
SAFE ENVIRONMENT. AND I AM SURE
EVERYONE ELSE WOULD BE
THE SAME WAY.

Sincerely,
Ed Roberts

Jim Caldwell, Regional Administrator

and tell me Davis-Besse is safe**

October 25, 2003

Dear Mr. Caldwell:

I live in [REDACTED]
Ohio. I am concerned about
what I have ^{heard} about Davis-Besse.

I have been informed that NRC
has the job of regulating any
dangers that could be present
at Davis-Besse.

Please be persistent in
your examination of this facility

Thank you,

Janet Gung

**Look me in the eye
and tell me Davis-Besse is safe**

Jim Caldwell, Regional administrator
In this event of unsafe conditions
and doubts, I say one thing think
about your loved ones, and think how
others feel the same about their
loved ones. Dont be foolish about human
lives!! Think

L. Ross

**Look me in the eye
and tell me Davis-Besse is safe**

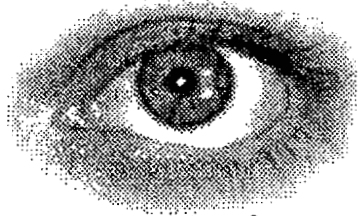

Dear Mr. Caldwell,

I am a mother of [REDACTED] wonderful children, and we live [REDACTED] to the Davis-Besse Power Plant. My husband and I were concerned enough when we thought that terrorist may attack the power plant, but to find out that our concern should be coming from human error I think is even worse.

Sir how do you suggest I explain to my children when; not if but when they come down with a sickness with no cure, or that they some day will not be able to have children of their own. And it's because someone didn't care enough about people to shut down a power plant. And it leaked into their food and drinking water. Because Sir I don't know anybody that would understand that. Do you?

So Sir as a mother of 3 and hopefully some day a grandmother please do the right thing and either fix it right or shut it down for good.

Thank-you
Joyce Rettig

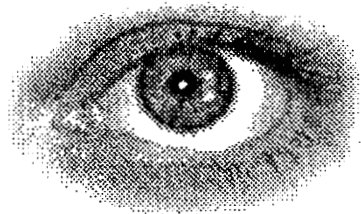

**Look me in the eye
and tell me Davis-Besse is safe**

Mr. Jim Caldwell,

I live in [REDACTED] which is very [REDACTED] Davis-Besse. I know many people that work there I was shocked when I heard about the size of the whole that was found. I could not believe that a ~~whole~~ whole that size was not found any sooner. A whole of any size is unacceptable in my eyes when you are dealing with something as ~~dangerous~~ dangerous to the people who live around Davis-Besse. I would like to see Davis-Besse closed until we can have a 100% guarantee that Davis-Besse will be closer inspected.

Sincerely,
Natalie Schneider
Natalie Schneider

**Look me in the eye
and tell me Davis-Besse is safe**

Dear Mr. Adams

I am a student at St. Joseph
Bishop's High School and I
am very concerned of the possibilities
that may happen if Davis-Besse
will to reopen. Hopefully you take
my thoughts into consideration, it
would really mean a lot.

Your Concerned Citizen

Amber Adams

**Look me in the eye
and tell me Davis-Besse is safe**

We all need Energy. We don't need
A NoTher Black out Like we had
Last Summer. But IF Davis Besse
IS NOT SAFE don't RUN. IT

We should chinst IT To a NATURAL
gas plant

**Look me in the eye
and tell me Davis-Besse is safe**

Dir Sir or MADAME,

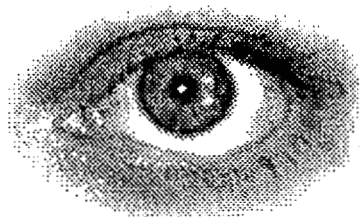

First off, let me state that I am a firm believer in nuclear power. I think that it is currently the most efficient way to provide mass power without mass pollution.

I am concerned, however, with the management of the Davis Besse plant. Through the information that I receive, I'm not confident that Davis Besse is being run in a safe manner and regardless of the advantages of clean power, safety has to be my primary concern.

I'm asking that this plant remain offline until the Ohio Citizen Action group is comfortable that it can be safely run.

Thank you for your attention,

Scott Nunawi

**Look me in the eye
and tell me Davis-Besse is safe**

Dear Mr. Caldwell,

As a surviving child of a cancer victim
(as well as a grandchild and great-grandchild of cancer
victims) I am extremely concerned about the
state of our environment. Is the cost of power
worth the possible cost in human life? From
my perspective it is NOT! I have seen no
solid evidence that the Davis-Besse power
plant has been made safe for the public.
First Energy really needs to look harder at
alternative energy sources. Keeping Davis-Besse
closed will not only help keep the environment
and my health, safer but could force First
Energy to seriously consider alternatives.
Please, Mr. Caldwell, for the sake of human
life in this area don't let Davis-Besse
re-open. Thank you.

Sincerely,

Anna Marie Ceraich

**Look me in the eye
and tell me Davis-Besse is safe**

October 31, 2003

Jim Caldwell, Regional Administrator
U.S. Nuclear Regulatory Commission

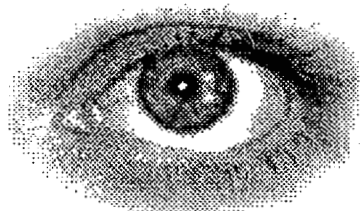

Dear Sir,

My family and I live in [REDACTED]. We are concerned about the safety of our home and health. For our sake and the sake of all Ohioans, please keep Davis-Besse nuclear reactor plant closed.

Your immediate attention to this matter is greatly appreciated.

Sincerely,

The O'Donnell's

**Look me in the eye
and tell me Davis-Besse is safe**

Dear Jim Carbell

Please keep the reactor closed
until it is safe to operate

Tom T. Oglin

Look me in the eye
and tell me Davis-Besse is safe

James Caldwell,

The statistics on the Davis-Besse
are not good.

Our family and others like us, live
along Lake Erie. We'd like to be
able to keep it that way.

Lake Erie is a very important
resource, and so are the people.

Think, very carefully and make a
good decision.

Thank you,
Karen Smith

JAMES CALDWELL - U.S. Nuclear Reg. Commission

DEAR SIR,

IN MY OPINION IF FIRST ENERGY
CANNOT GET ITS ACT TOGETHER CONCERNING DAVIS-BESSE
MAYBE THE BEST COURSE OF ACTION IS TO LET
SOME OTHER CONCERN TAKE OVER ITS OPERATION
TO ASSURE THAT IT'S RUN IN A SAFE AND
PROPER MANNER. MY FAMILY LIVES ON THE
[REDACTED] BUT THE LOCATION
of the PLANT IS NOT THAT [REDACTED] THAT I AM
NOT CONCERNED ABOUT IT BEING RUN IN A SAFE
MANNER. THANK YOU FOR YOUR SINCERE CONSIDERATION
OF THIS MATTER

Arthur M. Mink
EASTLICK OHIO

**Look me in the eye
and tell me Davis-Besse is safe**

Any efforts to correct nuclear related
problems is beneficial to our families + our
community.

Angela Jackson

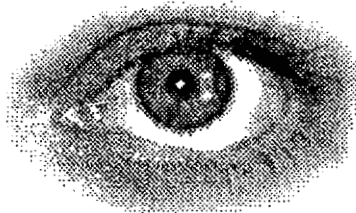

**Look me in the eye
and tell me Davis-Besse is safe**

To whom it may concern:

I live in [REDACTED] approx. [REDACTED] away from [REDACTED]. I don't believe in shutting down the Davis-Besse Power Plant, however maybe building a new one or selling the plant to someone who cares for the Public Safety. We are never notified when problems arise at the Davis-Besse Power plant whether there is a safety risk or not. It seems that Davis-Besse just wants to cover up, and hide the problems. This is a serious issue, it affects all the citizens of this state not just the ones around Davis-Besse. I have two dogs that I take to the lake and swim. Everytime I go to the lake I don't know if I'm at risk or they are, since Davis-Besse tries to cover the problems and not report them. We receive information about the Perry Power Plant, why not the Davis-Besse Power Plant?

Respectfully,

Alvin [Signature]

I am a resident

I am very concerned about the

Davis-Besse Plant. Public Safety

must come first! Please keep the

Plant closed for all our sake!

We have a population along the

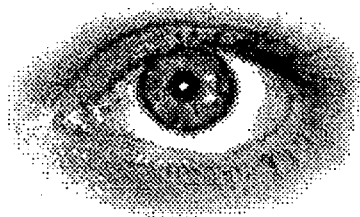

Lake shore that can't be replaced.

Please consider this prompt

action

Thank you

McFarland Family

Look me in the eye
and tell me Davis-Besse is safe

Mr Caldwell,

My name is George Graham,
I live on the [REDACTED] a [REDACTED] hour
[REDACTED] for Davis Besse Plant.

My concern is the safety of the
people in the area, also the waters of
Lake Erie, the farm lands and also
the total environment, and "all life"
in case of a "melt down".

In all work places, safety
is the main concern. Therefore your
main priority should be safety for the
people also —

Therefore I ask you to keep
the Davis Besse Plant closed

Sincerely,
George Graham

**Look me in the eye
and tell me Davis-Besse is safe**

I would not like to see the
Davis-Besse nuclear reactor
opened.

It is a health hazard to
the community & our children.

Just thinking about the damage
that it would ^{cause} to our
community & drinking water,
etc... scares me.

Please see to it that the
Davis-Besse nuclear
reactor stays closed.

P.S. I would like a
response as to if it's
going to stay closed. Please

Sincerely,
Cynthia L. Fulk

**Look me in the eye
and tell me Davis-Besse is safe**

Dear Mr. Caldwell,

Chalk me up on the list of concerned citizens when it comes to the Davis-Besse power plant. I do not want the Davis-Besse to be opened for use at this time. The record shows a poor history. I see no benefit and only great risk if this power plant were to be put to use. More attention needs to be directed toward solar, wind and water power. Time is wasting. We need a new option. I have seen, first hand, these alternate sources can work. What will it take?

Sincerely,

Dennis J. Jedd

Mr. Caldwell,

My family and I live in [REDACTED]
[REDACTED], we are concerned about the safety
at the Davis-Besse plant.

Is First Energy taking all precautionary mea-
sures to keep the plant running safely?

How many safety interactions have been
found at the plant?

Have a nice day

11 Thanks!

Dear Jim Caldwell,

I would like you to keep the plant closed. I'm 11 years old and I still have my whole life in front of me. I enjoy the environment & the animals around us. The other day I saw a frog swimming in our creek with out a leg and his eye was all red and infected. There is tons of birds around here & they go to Lake Erie for food so if it opens the fish, birds & the things around will all die including us. So please keep it closed.

sincerely,

Aina No Meyer

**Look me in the eye
and tell me Davis-Besse is safe**

My name is Mrs. Meyer & I live in [redacted]
[redacted] my family moved to Lake Erie for the land & fresh air.
We used to live by the Airport [redacted]

We want our small children to grow up knowing
that we as adults try our best to keep them safe from
harm, including nuclear waste.

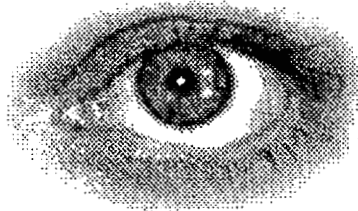

My husband and my top priority are to keep
our children safe. I would do anything possible to
keep any child, including yours safe.

As for the wild life & fish that live here, as you
know they are starting to make a come-back.
We are seeing bald eagles picking & nesting. We
enjoy watching the Egrets & Blue herons. ~~These~~
These are just some of the birds that survive on
the fish from Lake Erie.

I, as a mother, a naturalist & a human with
compassion for all things am asking you, Tim Caldwell
to keep the Davis-Besse closed until we know
for sure that we will all be safe. We as adults have
harmed this environment enough. Soon there will
be nothing for our babies or Grand babies.

Thank you.

Jim Callwell, Regional Administrator
U.S. Nuclear Regulatory Commission
801 Warrenville Rd
Lisle, IL 60532-4351

Dear Mr. Callwell,

We live in [REDACTED] and my Relative's
lives near the Davis-Besse Nuclear Plant - this
gives us great concern.

Utilities should be for the good of the Public -
it is too bad they have been deregulated. It has
only added to the cost and led to big complicated
big business with any attempt to increase cost.
However, we should remember Three Mile Island,
the incident in Russia, etc.

Everything with nuclear power should be
very strict, build up safety measures,
efficient operations and very qualified
personnel. (over)

KEEP DAVIS BESSE CLOSED
my priority MUST BE PUBLIC SAFETY

Homer McPeak

[REDACTED]

Christy Carson

July 31, 2003

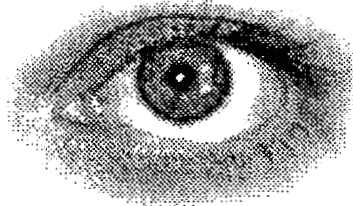

Look me in the eye
and tell me Davis-Besse is safe

Dear Mr. Caldwell,

My name is Christy Carson and I am a student residing in [REDACTED]. Throughout highschool I have been taught about nuclear power plants and alternate energy sources. Using the fission of atoms to produce power was an excellent idea, but when the very people the plant was made to help becomes unsafe, it's just not worth it. If you're unaware of the magnitude of problems a "fatty" power plant can cause, it would be easy to let this issue slip through your fingers. Why risk it? You cannot skim through major economical issues without hearing about Davis-Besse. I would rather have graffiti on bridges and trash in my front yard than discover major health complications from drinking contaminated water. All three should be acted on with emphasis on the harmful drinking water that's possible if, or when the plant malfunctions. We live in a beautiful place that is threatened daily by humans and man-made, atmosphere-destroying machines. Someone needs to completely fix the plant or shut it down. I don't know why anyone wouldn't stand up for this cause. Maybe because they're uninformed or uncaring. Either way, ignorance will be shown no mercy when Davis-Besse produces a headache for way too many people. In America, we are lucky to have water we can drink. Other nations desperately seek it. Why should we pollute our own water? Why sacrifice our well-being? We the citizens deserve the voice we're entitled to. Shut down Davis-Besse.

P.S. Please give me your response right away.

Sincerely, Christy Carson

**Look me in the eye
and tell me Davis-Besse is safe**

Mr. Caldwell-

Hello, my name is Brittany Hoose and I live with my parents and one brother and one sister in [REDACTED]. I am [REDACTED]-years old and learned about the Davis-Besse situation in Science class.

I am concerned that my friends and family's health will be threatened by the Davis-Besse reactor. Your top priority as the top priority as the regional administrator of the U.S. Nuclear Regulatory Commission should be to keep the citizens safe. Please keep the reactor closed to ensure our safety. Don't worry about First Energy's schedule, worry about keeping us alive!

Thanks for your time and please respond as quickly as possible.

Sincerely,
Brittany Hoose

Jim Caldwell,

My name is Melissa Forman
and I am married with [REDACTED] daughters
under the age of two. We live in [REDACTED].
I am concerned with their safety.
It scares me to know that there
is no way to secure our safety
of Davis-Besse. The only way is
to keep Davis Besse nuclear reactor
closed. I appreciate your time.

Thank you,
Melissa

Look me in the eye
and tell me Davis-Besse is safe

October 7, 2003

Dear Jim Caldwell,

I am concerned with the safety of my family if you open the Davis-Besse nuclear power plant. We live only around [REDACTED] miles from the plant and would like to have a safe and clean environment for my children and grandchildren to live.

So please keep the doors shut on Davis-Besse. At least for the sake of God's children and his world.

Thank you

Sharon David

Jim Caldwell - ~~SA~~

Oct 7 - 2003

I hope you'll keep Davis-Besse
closed. I live in [REDACTED] it can
effect us. I have a daughter moving
back to Ohio & wants to be in Port
Clinton & That's even closer than here.
I want her, her husband & boy to be
safe.

K. Hosang

Jim Caldwell, Regional Administrator
U.S. Nuclear Regulatory Commission
801 Wacker Drive
Lisle, Ill. 60532-4351

Mr. Caldwell:

As a resident of [REDACTED] I am
writing to ask you to keep the Davis -
Besse nuclear reactor closed.

I feel that any benefits of keeping it
open are far outweighed by the
danger to public safety.

Please advise on how this will be handled.

Barbara Burke
