SUBJECT: LOST TRITIUM EXIT SIGNS

DESCRIPTION:

On December 18, 2003, the Nebraska Department of Health and Human Services (NDHHS) notified NRC's Operations Center that 17 tritium exit signs were missing at a general licensee's facility in Bellevue, Nebraska.

The State of Nebraska reported that Shop Go Stores, the Nebraska general licensee, could not account for 17 tritium exit signs. The signs were manufactured in July 1984. As of the date of manufacture, 17 exit signs contained 777 gigabequerels (21 curies) tritium for each exit sign. The NDHHS general licensee reported that three major renovations have taken place in the store since July 1984. The licensee believes that during one or more of these renovations these signs were lost. A review of store records indicate that 11 new signs were purchased in 1994. A search of the store by the licensee did not find any of the missing signs.

Region IV received notification of this occurrence from NRC's Operations Center on December 19, 2003. Region IV has informed OEDO, NMSS, OSTP, and the Region's PAO and SLO.

This information has been discussed with the State and is current as of 3:00 p.m. (CST) on December 19, 2003.
