Brian Sheron, Associate Director  
For Licensing Project & Technical Analysis  
Office of Nuclear Reactor Regulation  
United States Nuclear Regulatory Commission  
Washington, D.C. 20555-0001

Brian:

Thank you for your comprehensive and eminently satisfactory reply to my letter of September 23, 2003.

It is most reassuring that you are in agreement with the specific limits extended to TVA as to use in repair of the shield building only.

Again, thank you for your complete and clear explanation of the NRC's position in this matter.

Sincerely,

*Robert G. Smith*
