Subject: Re: URGENT - SITE REMOVAL

Please be aware that the information at this site has been copied and repackaged for the public at several other sites. See for example the following:

The US Geological Survey / The National Atlas: <http://www.nationalatlas.gov/atlasftp.html>

Or try a commercial vendor that makes this product available as a free download (which I found with a Yahoo search on "nuclear geospatial"): http://www.mapcruzin.com/ddownload_nrc.htm

(select any of the download options at the above site; the data is in a dbf file viewable by any database view program).

Thus, while we can remove this information from our site, the information is already effectively out of our control.
