Subject: Re: DRAFT program office guidance for manual actions

Doug,

sorry this took so long...our staff was out last week.....it's a good start....we still struggle with cumulative impacts of manual actions especially assessing the resource demands. For instance, after our inspection at turkey point, they added 100 pages of manual actions. It's not clear how we evaluate that mess. Harris is similar...

this is a good process description and helps clear up our responsibilities...

Chuck,

Based on a recent meeting between IIPB and SPLB on subject question, I have crafted the attached memo. It reflects current, existing, documented ROP program guidance in IMC 2515 and IMC 0612. I propose that it be issued by both IIPB and SPLB to regional DRS Directors.

Will the content of this memo clearly answer the mail for you?

Doug
