SUBJECT: Inspection of License No. 31-30746-01 (03036064/2004001)

On January 14, 2003 this license was issued with a new number due to a change of address. The licensee has no permanent storage location and must notify Region I before obtaining licensed material. Therefore, the telephone discussion on January 26, 2004 with the Radiation Safety Officer wherein he stated they have possessed no licensed material, fulfills the requirement to conduct the scheduled inspection. The next inspection is due in December 2004.
