SUBJECT: NECESSARY REFERENCES FOR REVIEW OF HANFORD FINAL EA

In response to your request made at the BWIP team meeting on March 19, Neil Coleman and I have identified the following references as necessary for our review of hydrogeological aspects of the final EA(NWPA) for the Hanford Site. This note lists only the highest priority references, i.e. those references necessary for NRC review prior to FEA review. These include:

In support of our review of the FEA, we urge you to obtain these references as soon as practical. In addition to this list, we have identified many other references that appear to be less important to our immediate review than those requested above. Consequently, we defer the request for these references until after DOE has provided NRC with the highest priority documents. Please contact me if you have any questions.
