Mr. O. L. Olson  
Department of Energy  
Richland Operations Office  
P.O. Box 550  
Richland, WA 99352

Dear Mr. Olson:

I am writing to express appreciation for the Rockwell documents sent to us by David Squires on October 29. This material is very useful in our efforts to collect the project documents that are needed for review of the site characterization report.

David indicated, when we spoke by telephone on November 2, that the ten documents that are not available until November 15 will be sent to us as soon as possible thereafter. These documents are, of course, of high interest, and they may well prove critical to the analysis of the site characterization report. I asked David, therefore, to give every consideration to means of getting this material into our hands by November 15 - the day of receipt of the site characterization report. Only in this way can we feel assured that the analysis of the site characterization report can proceed as planned.

On a related subject, I spoke today with David about two requested reports that are not accounted for in the transmittal of October 29. They are RMO-BWI-CR-128P and RSD-BWI-CR-004. Please advise when we can expect to receive these.

Sincerely,

*[Signature]*  
Robert J. Wright  
Senior Technical Advisor
