Dear Mr. Linehan:

SUBJECT: IDENTIFICATION OF AND ACCESS TO NRC APPROVED SITE SECURITY PLANS
AND NUCLEAR MATERIALS CONTROL AND SAFEGUARDS PLANS

We have asked our repository architect engineer for the Salt Repository Project, Fluor Engineers, Inc., to do a comprehensive review of the following existing types of plans:

- o Site Security Plans;
- o Nuclear Materials Control and Safeguards Plans.

We would appreciate your identifying and providing us copies of any such plans that have been developed by industry and national laboratories and approved by NRC for other nuclear facilities which may be applicable to a high level waste repository. In the event that after checking there are no NRC approved plans that would be applicable to a repository, we would appreciate your simply documenting this in a letter back to us. If, however, you do identify some plans which may be of use to our architect engineer we would appreciate receiving: 1) a list of the plans and 2) copies of the plans if they are unrestricted or requirements and procedures regarding personnel clearance, access and handling of information if the material is restricted or sensitive in some way.

We would appreciate receiving feedback on whether any applicable NRC approved plans exist by March 28, 1984 if possible. If you have any questions, please contact L. Casey (FTS 976-5916) of my staff.

Sincerely,

A large, stylized handwritten signature in black ink, appearing to read "J. O. Neff". The signature is written over the typed name and title.
