UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

WM DOCKET CONTROL  
CENTER

MEMORANDUM FOR: Robert E. Browning, Director  
Division of Waste Management

FROM: Tilak R. Verma, Senior On-Site  
Licensing Representative

SUBJECT: SRPO SITE REPORT FOR THE WEEK  
OF MARCH 19, 1984

'84 APR -2 P3:45

1. Neff informed me of DOE's planned trip to West Germany and Belgium. NRC is invited to send a technical representative on this trip. The purpose of the trip is to review research and development of heater and radioactive material tests at the Asse Mine. There may be several of these trips by DOE and their contractors during the summer and fall of this year.
2. I received the draft of Identification of Preferred Sites Within the Palo Duro Basin, Volume I and II. There is a fair amount of information in these two volumes. I will ask Linehan if he is interested in reviewing these.
3. I also received a draft copy of the Geological Circular 83-0. This is an annual report prepared by the TBEG for DOE and covers the work done by the TBEG during the period of October 1981 through September 1982. I am making the report available to Mal Knapp. I shall send him a copy of the final report as soon as it becomes available from ONWI.
4. I attended (as an observer) the Permian Basin Monthly Manager's Meeting in Boston on March 22, 1984. The meeting was attended by DOE, ONWI, Stone and Webster Engineering Company (SWE) and TBEG. The topics of discussion included: EAs, SCP preparation, contractor and subcontractor participation in current drill-hole testing, topical reports being prepared by the contractors, hydrofracture tests from the Holtzclaw Well and the geochemical work being done by ONWI. Status of the bore-hole completion reports by SWE was discussed. I will provide details to Linehan and Johnson.
5. PC for the OSLR (SALT) has been received.
