Jackson, Mississippi 39202

Dear Mr. Forsythe:

SUBJECT: MEETING SUMMARY WITH NRC

Enclosed for your information is a summary of a May 23, 1984 meeting DOE had with NRC to help our architect-engineer for the repository, Fluor Engineers, Inc., view appropriate safeguards and security plans.

Sincerely,

J. O. Neff  
Program Manager  
Salt Repository Project Office

May 23, 1984 Meeting Summary with NRC

Meeting Purpose: To ascertain whether it would be useful to get a copy of the security plans from spent fuel storage facilities for Fluor to fulfill their SOW obligations to DOE concerning repository conceptual design.

Meeting Attendees: Russell R. Rentschler, NRC-NMSS  
Odell F. Smith, NRC-NMSS  
Stan Neuder, NRC-WM  
Bob Johnson, NRC-WM  
Al Smith, Fluor (DOE contractor)  
Leslie A. Casey, DOE-SRPO

In the morning we discussed the range of security required at different types of facilities. As a result it became apparent that at this time the GE Morris Illinois spent fuel facility was the most applicable representative of a NRC licensed facility and that the NFS West Valley facility was the most applicable DOE facility.

In the afternoon we had an opportunity to view the GE Morris physical security plan, the DOE West Valley facility plan, as well as the VEPCO Surry security plan and training manual which is under review for licensing.

As a result of the meeting and review of the plans DOE intends to ask the licensee (GE Morris Illinois) for a copy of the security plan for Fluor and to locate the appropriate DOE contact to ask for a copy of the West Valley security plan. The contact leads NRC supplied us are:

GE MORRIS ILLINOIS  
Chuck Harington  
General Electric Co.  
174 Curtner Avenue  
San Jose, CA 95125

DOE WEST VALLEY  
Dr. Hannum (West Valley Project Director)

Philip Hamric (DOE-Idaho)

NRC CONTACT  
R. Rentschler, NRC/NMSS  
and  
R. Johnson, NRC/WM  
(614/427-4177)

NRC CONTACT  
Tom Clark, NRC/NMSS  
and  
Robert Johnson, NRC/WM

DOE will copy NRC on correspondence with our requests for the copies of security plans.

R. Johnson will work with L. Casey to put the appropriate paperwork in the system to make sure DOE and Fluor are kept apprised of revisions NRC is making to the applicable regulations (i.e., 10 CFR 73) through coordination with Bob Dube, NRC.

NRC also gave us at the meeting a copy of the index to active regulatory guides for spent fuel facilities and a copy of 10 CFR Parts 72 and 73.

The meeting summary was signed by:

Robert L. Johnson  
NRC  
5/23/84

Leslie Casey
