Dear Mr. Meyer:

Pursuant to our June 10, 1985 phone conversation, I have enclosed copies of the following documents for your information:

1. Review of "Analysis of Two-Well Tracer Test with a Pulse Input," letter from Wright to Olson, April 6, 1984.
2. Review of BWIP hydrologic test data, letter from Wright to Olson, May 25, 1984.
3. Summary meeting notes, BWIP/NRC hydrology meeting, June 12-13, 1984.
4. Follow-up comments on June 12-13 hydrology meeting, letter from Wright to Olson, October 29, 1984.
5. Summary meeting notes, BWIP/NRC hydrology meeting, December 12-13, 1984.
6. Review of "Effective Porosities of Basalt," memorandum from Gordon to Fliegel, February 15, 1985.
7. NRC review of Draft BWIP EA, March 20, 1985.
8. Review of "Analysis and Interpretation of a Recirculating Tracer Experiment Performed on a Basalt Flow Top," memorandum from Gordon to Wright, April 17, 1985.
9. Summary meeting notes, DOE/NRC meeting on BWIP hydrology, May 22, 1985.

These documents provide a good outline of NRC's comments, questions, and concerns regarding BWIP's hydrology program as documented since the beginning of FY 84. This roughly covers the period of communication lapse between our two agencies which coincided with the departure of Teek Verma from his position as lead NRC reviewer of BWIP's hydrology test program. I hope that this set of documents brings you up to date on NRC's viewpoint on the BWIP hydrologic test program.

I look forward to meeting with you and your staff in the near future to exchange views and information relevant to the hydrologic assessment of the Hanford Site and environs.

Sincerely,

Original Signed By

Matthew Gordon
