CONVERSATION

SUBJECT

GEOSCIENCE PLANS AND TELECOMMUNICATIONS

SUMMARY

returned a call of 6/24/85 to the BWIP Geology Communicator, S. Price (as named in Appendix 1-BWIP of the September 18, 1984 DOE/NRC Site Specific Procedural Agreement.)

S. Price said that B. Hurley (DOE-Geologist) had been on vacation during the week of June 17 to June 21. Due to B. Hurley's absence and the non-urgent nature of the few remaining open items on geoscience plans, S. Price explained that my calls during the week of June 17th to 21st weren't returned as promptly as they would have been otherwise.

I said that I am aware of DOE's current position on prior approval for scheduling phone calls to have a DOE representative present to listen and help direct the discussions. I acknowledged that while there is a variability in response time to my phone messages, often S. Price's return calls are prompt and are always courteous and professional. I also pointed out that based on recent discussions with NRC's other BWIP team members, our geology telephone communications have been more significant and more frequent than for the other disciplines. However, some procedural problems remain unresolved.
