

*2003 Statement of Work for Dr. Rui Chen*

*Provide professional geophysical services for review and evaluation of probabilistic and deterministic seismic hazard information, including seismic source characterization, ground motion attenuation, development of hazard and response spectra, and site response modeling.*

*Review and evaluation of seismic hazard information will support CNWRA work for the NRC High-Level Waste Branch, Spent Fuel Project Office, and the Division of Fuel Cycle Safety and Safeguards. Work may include travel.*
