Ralph Stein, Team Leader
Repository Projects Team
Office of Waste Isolation NE-30
DOE Headquarters
Washington, DC 20545

Dear Mr. Stein:

Justus Wright

In our meeting last week, I promised to provide illustrations of documents produced by the different waste isolation projects and in the DOE concurrence chain that would be useful to have access to. Documents such as these would be useful to the NRC in our interactions with DOE should they be available to us prior to distribution to the general public.

1. RHO-BWI-ST-14; Geologic Characterization of the Cold Creek Syncline at Hanford, WA.
2. RSD-BWI-TP-007; July 1981 Test Plan for Phase I of the ESTF.
3. BWIP (NWRB); Conceptual Design, September 1981.
4. RHO-MA-150; Quality Assurance Manual.
5. The Latest Revision (Beyond V) of RHO-CD-132.
6. Location Recommendation Report, Paradox Basin (ONWI).
7. Site Characterization Plan, Dome Salt, January 1982.
8. Revision of PNL-2955 "Reference Site Initial Assessment for a Salt Dome Repository," December 1981 - January 1982.

This list is provided to make it easier for us to determine what early access NRC can have to DOE documents. Thank you for your cooperation, please call after you have had time to look into this matter.

Hubert J. Miller, Chief
High-Level Waste Technical
Development Branch
Division of Waste Management
