

SOFTWARE RELEASE NOTICE

1. SRN Number: GLGP-SRN-199		
2. Project Title: Structural Deformation and Seismicity KTI		Project No. 20-1402-471
3. SRN Title: GM-SYS Version 4.04.08C		
4. Originator/Requestor: Peter C. La Femina		Date: 08/04/99
5. Summary of Actions <input checked="" type="checkbox"/> Release of new software <input type="checkbox"/> Release of modified software: <input type="checkbox"/> Enhancements made <input type="checkbox"/> Corrections made <input type="checkbox"/> Change of access software <input type="checkbox"/> Software Retirement		
6. Persons Authorized Access		
Name	Read Only/Read-Write	Addition/Change/Delete
Peter C. La Femina	RO	A
John Stamatakis	RO	A
Chuck Connor	RO	A
David Farrell	RO	A
7. Element Manager Approval: Larry McKague <i>Larry McKague</i> Date: 8/6/99		
8. Remarks:		

SOFTWARE SUMMARY FORM

01. Summary Date: 8/04/99	02. Summary prepared by (Name and phone) Peter C. La Femina (210) 522-6837	03. Summary Action: NEW	
04. Software Date: 11/9/98	05. Short Title: GM-SYS		
06. Software Title: GM-SYS Version 4.04.08C - Gravity and Magnetic Modeling for Windows and X-Windows			07. Internal Software ID: N/A
08. Software Type: <input type="checkbox"/> Automated Data System <input checked="" type="checkbox"/> Computer Program <input type="checkbox"/> Subroutine/Module	09. Processing Mode: <input checked="" type="checkbox"/> Interactive <input type="checkbox"/> Batch <input type="checkbox"/> Combination	10. Application Area a. General: <input checked="" type="checkbox"/> Scientific/Engineering <input type="checkbox"/> Auxiliary Analyses <input type="checkbox"/> Total System PA <input type="checkbox"/> Subsystem PA <input type="checkbox"/> Other b. Specific:	
11. Submitting Organization and Address: CNWRA/SwRI 6220 Culebra Road San Antonio, TX 78228		12. Technical Contact(s) and Phone: Northwest Geophysical Associates, Inc. <u>Support@nga.com</u> (541) 757-7231	
13. Software Application: Modeling of gravity and magnetic data.			
14. Computer Platform PC	15. Computer Operating System: Windows & X-Windows	16. Programming Language(s): N/A	17. Number of Source Program Statements: N/A
18. Computer Memory Requirements: N/A	19. Tape Drives: N/A	20. Disk Units: N/A	21. Graphics: N/A
22. Other Operational Requirements:			
23. Software Availability: <input checked="" type="checkbox"/> Available <input type="checkbox"/> Limited <input type="checkbox"/> In-House ONLY		24. Documentation Availability: <input checked="" type="checkbox"/> Available <input type="checkbox"/> Preliminary <input type="checkbox"/> In-House ONLY	
25. Software Developer: Northwest Geophysical Associates, Inc. Date: Copyright 1998			

Peter C. La Femina

TO: Bruce Mabrito
FROM: Peter C. La Femina
SUBJECT: GM-SYS™
DATE: July 23, 1999

GM-SYS™ is a widely distributed, off-the-shelf program for geophysical potential field data modeling. It is an interactive, geophysical modeling software package that allows for the importation of well log and other geologic data, which may be used to constrain the geophysical models.

GM-SYS™, version 4.04, is the current version of this software package released by Northwest Geophysical Associates, Inc. The current version was released on November 9, 1998 and runs under the Microsoft Windows 95™ and Windows NT™ operating systems.

The installation of the software was successful and has now been installed on several personal computers. To test the gravity modeling computations of GM-SYS™, a model of a thin faulted slab was constructed and calculated using GM-SYS™. The resulting model was compared to the analytical solution for a thin faulted slab following Dobrin and Savit (1988). The results of this test are attached and demonstrate the validation of this software for modeling gravity data.

Reference

Dobrin, M.B. and Savit, C.H., 1988. Introduction to Geophysical Prospecting (Fourth Edition), McGraw-Hill Book Company, New York, p. 867.

The following documents are provided in the TOP-018 folder:

The front cover and table of contents of the GM-SYS™ User's Manual. The complete and original manual is kept by Peter C. La Femina in office A263.

1 GM-SYS™ gravity profile and model image output of a thin faulted slab.

1 Graph of the analytical solution for a thin faulted slab following Dobrin and Savit (1988) and the data used to create the graph.

1 3.5 Floppy disc of the GM-SYS™ installation program and ancillary information.
