13. Software Application: Associates location data, gathered with a GPS unit, and magnetometer readings.  Determines magnetometer base station drift relative to the first day, first base station reading, and adjusts measured magnetometer readings to remove this drift effect.  Determines the heading at each magnetometer reading and adjusts the reading to eliminate directional variations caused by the magnetic field of a bicycle (if used) while surveying.  Filters a data file by eliminating data lines containing readings above and below specified min and max values.  Performs an IGRF (International Geomagnetic Reference Field) correction on a data set of magnetometer readings using geodetic coordinates.  Converts latitude/longitude coordinates into UTM coordinates using the NAD83 ellipsoid (State Plane Coordinate Systems, North American Datum 1983).

# SOFTWARE CHANGE REPORT (SCR)

1. SCR No. (Software Developer Assigns): <b>GLGP-SCR-341</b>	2. Software Title and Version: Post Processing Software for Geomagnetic Surveys Version 1.1	3. Project No: 20-0751-013
4. Affected Software Module(s), Description of Problem(s): Copyright comments were added to the following filters in the software. Exactly four (4) comments were added to each filter at the beginning, end, and twice in random places within the software. These comments in no way affect the operation of the listed filters.  Drift, Filter, Heading, Igrf, Nad83, and Stn2xyz		
5. Change Requested by: <b>Brandi Winfrey</b>  Date: <b>October 13, 2000</b>	6. Change Authorized by (Software Developer):  Date: <b>10/19/00</b>	
7. Description of Change(s) or Problem Resolution (If changes not implemented, please justify):  The change includes the addition of a copyright notice to the source code for all six of the filter codes, as well as to the documentation. Each printout and all distributed printouts, to include the User's Manual, supplemental Source Code manual, and CDROM, have had the following line added to them. This includes all labeling as well as marking on the media on which the program is stored.  © 2000 Southwest Research Institute. All rights reserved.  No other changes were made.		
8. Implemented by: <b>Brandi Winfrey</b> 	Date: <b>OCTOBER 13, 2000</b>	
9. Description of Acceptance Tests:  None required as there was no alteration to the functioning code in the software (i.e., only comments were added).
