Subject: Meeting With Boeing - Contract for 767 Structural Model
Place: O9b4 RES

I just talked to David Sweet, local rep for Boeing.

Pending confirmation that the Boeing engineers will be here, we scheduled a meeting for Tuesday, January 8, 2002, One White Flint, Room O9B4. Time: 10-noon.

The purpose for the meeting is to discuss the structural model Boeing would provide the NRC on a simplified 747 aircraft. We may decide to have a 747 with 777 engines mounted on the wings.

Please attend the meeting.

If we conclude that the Boeing model would meet our needs, then we will initiate a sole-source contract to obtain the model. Boeing estimates a two-staff month effort.

Please confirm your attendance.

Thanks,

Jack.
