Subject: Re: DRAFT FOR SPENT FUEL STORAGE VULNERABILITY

Comments for your consideration

In Prog Plan • Under threats delete " or as later directed" suggest you be specific and if they redirect the group then you can change a few thing like, timing and products.

In Prog Plan • can you define dispersion and dose resulting as two different assessments. to define dispersion you need to determine the amount of RAM released, and the particle size distribution. This will be the work of the structural and materials folks. while the doses and cost will be second assessment.

In Prog Plan • Suggest deleting death from non-radiation sources, this should be outside our scope. we have no way to even guess at this number

• combine property damage, denial of use and clean up into one measure of decommissioning costs.

Dissemi • Delete latent cancer deaths. this is a measure that should not be applied to population doses.

C. L. H.
Thanks

The attached material was forwarded to J.Guttmann on 1/25/02. Please review and comment by COB today if possible. I plan to have a meeting Tuesday afternoon since Jack's Section is scheduled for a Section meeting Tuesday morning. I will let you known the time and place by the end of the day.

I will forward the material developed by the other two groups for your information.
