In June 2002, we issued an environmental assessment (EA) for the Blended Low-Enriched Uranium (BLEU) Project at Nuclear Fuel Services in Erwin, TN. At that time, we concluded that the BLEU Project would have no significant impact on the environment. The 2002 EA is available from our web site (<http://www.nrc.gov/reading-rm/adams.html>) using Accession No. ML021790068.

We are now reviewing the third and final license amendment request for the BLEU Project. A draft EA for this action is attached. We request that you review the draft EA and provide any comments by April 16, 2004. Please contact me if you have any questions.
