CHAIRMAN REC'D

04 SEP -8 AM 9:47

Dear Chairman Diaz,

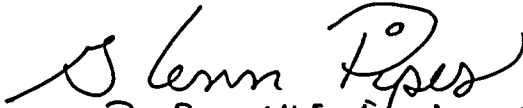

I whole heartedly support the establishment of the National Enrichment Facility (NEF) building a new gas centrifuge uranium enrichment plant in Lea County, NM. using the world's most advanced, energy-efficient and cost effective technology.

This new facility will bring a positive economic impact to the community by:

- Providing new jobs
- Education and training
- Construction opportunities
- Corporate contributions to local organizations

The National Enrichment Facility will be both safe and environmentally sound along with providing the United States a domestic source of enriched uranium for commercial nuclear power plants. They are most welcome to the residents of Lea County.

Sincerely,

PO Box 1045 Edmire, NM 88231

CHAIRMAN REC'D
04 SEP -8 AM 9:47

8-4
5885

Dear Chairman Diaz,

I am taking this opportunity to provide my support of the new National Enrichment Facility (NEF) to be built in Lea County, NM. Louisiana Energy Services (LES) has proven to be supportive of Lea County and LES will provide many jobs and opportunities for the citizens of Lea County.

The NEF will use the world's most advanced, energy efficient and cost-effective uranium enrichment technology, a technology that has been in use for over 30 years, and will provide a clean and safe working environment.

The establishment of the NEF will have a positive impact on the community providing benefits such as:

- Construction opportunities
- New jobs
- An estimated annual pay of \$10M
- \$3.1M in annual benefits

The people of Lea County care deeply about their future and I think you will agree that this new facility will have a positive impact on Lea County as well as the State of New Mexico.

Sincerely,

Donna Walker

CHAIRMAN REC'D

04 SEP -8 AM 9:48

Dear Chairman Diaz,

I would like to endorse the plans for the National Enrichment Facility to locate a new gas centrifuge uranium enrichment plant in Lea County, NM. This facility will use the world's most advanced, energy-efficient and cost effective technology, a technology that has been in use for over 30 years. This facility will be both safe and economically sound.

This facility will have many positive aspects:

- Economic diversity
- Creation of new jobs
- Training and education
- Community growth

The building of the National Enrichment Facility will bring pride and hope to the citizens of southeastern New Mexico and will be a welcome addition to New Mexico.

Sincerely,

Eunice, H. M.

CHAIRMAN REC'D

04 SEP -8 AM 9:48

Dear Chairman Diaz,

Nuclear energy supplies approximately 20 percent of all U.S. electricity. Using the world's most advanced, energy-efficient and cost effective uranium enrichment technology the National Enrichment Facility is building a gas centrifuge enrichment facility that will not only benefit this nation but the residents of Lea County, New Mexico, as well. That is why I give my full support to the establishment of the \$1.2 billion facility which will have a positive economic impact on the southeastern New Mexico and west Texas communities.

This facility will provide a sustainable domestic supply of low enriched uranium, thereby substantially reducing U.S. reliance on the global nuclear fuel marketplace and encouraging competition within the U.S. market. Using technology that has been in use for over 30 years will be both safe and environmentally sound.

The introduction of the NEF will help to diversify the region's current economic base, which today relies primarily on energy and extractive industries such as oil and gas production.

This project will create many new jobs. During the construction phase the estimated annual payroll will be \$170 million. Annual facility operations will involve approximately 210 new jobs with an annual pay estimation of \$10 million.

Creating new jobs will also provide opportunities for new housing construction, provision of services, and education. For the majority of positions, employees will be provided with the necessary skills through classroom and on-the-job training.

By providing economic diversity, new jobs, construction and a safe and environmentally sound project, this facility will be of great benefit to the good citizens of Lea County.

Sincerely,

1674 1603 - Gurnea

CHAIRMAN REC'D

04 SEP -8 AM 9:48

Dear Chairman Diaz,

This letter is in support of the National Enrichment Facility (NEF) building a gas centrifuge uranium enrichment facility in Lea County. This will enable the U.S. to have a domestic source of enriched uranium for the country's commercial nuclear power plants. Nuclear energy supplies approximately 20 percent of U.S. electricity and is the second greatest source of the nation's electricity after coal. NEF will provide a sustainable domestic supply of low enriched uranium, thereby substantially reducing U.S. reliance on the global nuclear fuel marketplace and encourage competition within the U.S. market.

This facility will have a positive effect on Lea County by providing many new jobs, housing construction, provision of services and education.

The residents of Lea County benefit from the contributions that NEF has given to a wide range of local organizations. Not only will our nation benefit from this facility but the local residents of southeastern New Mexico and west Texas will benefit as well.

Sincerely,

CHAIRMAN REC'D
04 SEP - 8 AM 9:48

Dear Chairman Diaz,

I would like to take this opportunity to endorse the National Enrichment Facility (NEF) and provide my support for their uranium enrichment plant. This facility will provide a sustainable domestic supply of "low enriched uranium" that is essential for fueling commercial nuclear power plants.

The state of New Mexico has a notable history as a hub of scientific research and development. The NEF is a strong supporter of the communities in Lea County and will provide many benefits such as:

- Create many job opportunities, short and long term
- Diversify the region's current economic base
- Provide employees with necessary training

Louisiana Energy Services will continue to contribute to a wide range of organizations and help to boost the economy of the southeastern part of the state. They are a most welcome addition to New Mexico.

Sincerely,

David Reed

CHAIRMAN REC'D
04 SEP -8 AM 9:48

Dear Chairman Diaz,

I completely support the new gas centrifuge uranium enrichment facility that will be built in Lea County, New Mexico. Developed by Urenco, Ltd., the technology that will be used by the National Enrichment Facility (NEF) has been in use for over 30 years. They are concerned as much about the safety and the environment of the area as are the residents of Lea County. This facility will be both safe and environmentally sound by using the world's most advanced energy-efficient and cost effective uranium enrichment technology.

This \$1.2 billion facility will have a positive impact on the southeastern section of New Mexico and west Texas. The NEF will help to diversify the region's current economic base, which today relies primarily on energy and extractive industries such as oil and gas production.

With safety issues and environmental concerns of utmost importance to the NEF, the project will also create new jobs with an estimated annual pay of \$10 million.

The National Enrichment Facility will be a welcome addition to the citizens of Lea County and I strongly support this endeavor.

Sincerely,

CC: Governor Bill Richardson
Secretary Ron Curry

Dear Chairman Diaz,

I was born and raised in Lea County and I am very excited about the National Enrichment Facility (NEF) building their facility outside of Eunice.

I have, over the past few months, had a few opportunities to talk with the LES folks and attend their meetings. I have heard quite a bit about the proposed plan and now feel comfortable enough to write and urge your support.

The National Enrichment Facility (NEF) will:

- Create new jobs
- Diversify the economy
- Use a technology that is proven and been in use for 30 years.

I feel confident that the National Enrichment Facility can bring benefits to Eunice and to our nation while safeguarding my friends, family, and our environment.

Based on my encounters with the LES team, I am sure your careful consideration of the application will lead you to the same conclusion – this is a good plan, and LES will be good for our community.

The NEF gas centrifuge uranium enrichment facility will enable the United States to have a domestic source of enriched uranium for the country's commercial nuclear power plants. They will use the world's most advanced, energy-efficient and cost effective uranium enrichment technology. Developed by Urenco, Ltd., the technology has been in use for over 30 years and this technology will be both safe and environmentally sound.

Nuclear energy supplies approximately 20 percent of all U.S. electricity and is the second greatest source of the nation's electricity after coal. The NEF will provide a sustainable domestic supply of low enriched uranium, thereby substantially reducing U.S. reliance on the global nuclear fuel marketplace and encouraging competition within the U.S. market.

The project will create 400 to 800 short-term construction jobs with a total payroll during construction of \$170 million. Annual facility operations will involve approximately 210 employees who will receive an estimated annual pay of \$10 million and an estimated \$3.1 million in annual benefits.

The National Enrichment Facility will continue to be a good corporate citizen by contributing to a wide range of organizations for the benefit of the residents of Lea County.

Sincerely,

CC: Governor Bill Richardson
Secretary Ron Curry

CHAIRMAN REC'D

04 SEP -8 AM 9:49

Dear Chairman Diaz,

The introduction of the National Enrichment Facility to Lea County, New Mexico will make a positive economic impact on the region's current economic base, which today relies primarily on energy and extractive industries such as oil and gas production. This project will create 400 – 800 short term construction jobs and over 200 permanent jobs. The creation of the new jobs will provide an estimated annual pay of \$10 million and also provide opportunities for new housing development, provision of services and education.

This new gas centrifuge uranium enrichment facility will not only be safe and environmentally sound, but will enable the United States to have a domestic source of enriched uranium for the country's commercial nuclear power plants. Nuclear energy supplies approximately 20 percent of U.S. electricity and is the second greatest source of the nation's electricity after coal. The National Enrichment Facility will provide a sustainable domestic supply of low enriched uranium substantially reducing the United States reliance on the global nuclear fuel marketplace.

For these reasons, I whole heartedly support the new enrichment facility to be built in Lea County, New Mexico. The NEF has proven to be a good corporate citizen by contributing to a wide range of organizations for the benefit of the people of southeastern New Mexico.

Sincerely,

Dennis Egan

CHAIRMAN REC'D
04 SEP -8 AM 9:49

Dear Chairman Diaz,

The establishment of a \$1.2 billion gas centrifuge uranium enrichment facility in Lea County, New Mexico will have a positive economic impact on the communities of southeastern New Mexico and west Texas. Therefore, I fully support the building of the National Enrichment Facility.

This facility will be using the worlds most advanced, energy-efficient and cost effective uranium enrichment technology, a technology that has been in use for over 30 years and will be both safe and environmentally sound. NEF will enable the United States to have a domestic source of enriched uranium for the country's commercial nuclear power plants.

Nuclear energy supplies approximately 20 percent of the nation's electricity and is the second greatest source of electricity after coal. NEF will provide a sustainable domestic supply of low enriched uranium, thereby substantially reducing the United States reliance on the global nuclear fuel marketplace and encouraging competition within the U.S. market.

The project will create 400-800 short-term construction jobs with a total payroll during that phase estimated to be \$170 million. Annual facility operations will involve 210 employees who will receive an estimated annual pay of \$10 million and an estimated \$3.1 million in annual benefits. The majority of positions will be provided with the necessary skills through classroom and on-the-job training.

The National Enrichment Facility is both needed and welcome in Lea County.

Sincerely,

Brigitte D. Fulfer

CHAIRMAN REC'D
04 SEP -8 AM 9:49

Dear Chairman Diaz,

This letter is in support of the National Enrichment Facility (NEF) building a gas centrifuge uranium enrichment facility in Lea County. This will enable the U.S. to have a domestic source of enriched uranium for the country's commercial nuclear power plants. Nuclear energy supplies approximately 20 percent of U.S. electricity and is the second greatest source of the nation's electricity after coal. NEF will provide a sustainable domestic supply of low enriched uranium, thereby substantially reducing U.S. reliance on the global nuclear fuel marketplace and encourage competition within the U.S. market.

This facility will have a positive effect on Lea County by providing many new jobs, housing construction, provision of services and education.

The residents of Lea County benefit from the contributions that NEF has given to a wide range of local organizations. Not only will our nation benefit from this facility but the local residents of southeastern New Mexico and west Texas will benefit as well.

Sincerely,

CC: Governor Bill Richardson
Secretary Ron Curry

CHAIRMAN REC'D
04 SEP -8 AM 9:49

Dear Chairman Diaz,

This letter is being sent to you to show my support of the National Enrichment Facility building their gas centrifuge uranium enrichment facility in southeastern New Mexico. The introduction of this facility into Lea County, New Mexico will have positive economic impacts and will help to diversify the region's current economic base, which today relies primarily on energy and extractive industries such as oil and gas production.

The National Enrichment Facility will use the world's most advanced technology that has been in use for over 30 years. It has proven to be both safe and environmentally sound. The facility will provide a sustainable domestic supply of low enriched uranium, thereby substantially reducing the United States reliance on the global nuclear fuel marketplace and thereby encouraging competition within the U.S. market.

With the creation of 400 to 800 temporary construction jobs and over 200 permanent jobs there will be opportunities for new housing construction, provision of services and education. LES will provide employees with the necessary skills through classroom instruction and on-the-job training. Total payroll during construction is estimated to be \$170 million and annual facility operations will involve an estimated annual pay of \$10 million.

The citizens welcome the National Enrichment Facility to New Mexico and as I do, totally support the project.

Sincerely,

CHAIRMAN REC'D

04 SEP -8 AM 9:49

Dear Chairman Diaz,

Nuclear energy supplies approximately 20 percent of all U.S. electricity. Using the world's most advanced, energy-efficient and cost effective uranium enrichment technology the National Enrichment Facility is building a gas centrifuge enrichment facility that will not only benefit this nation but the residents of Lea County, New Mexico, as well. That is why I give my full support to the establishment of the \$1.2 billion facility which will have a positive economic impact on the southeastern New Mexico and west Texas communities.

This facility will provide a sustainable domestic supply of low enriched uranium, thereby substantially reducing U.S. reliance on the global nuclear fuel marketplace and encouraging competition within the U.S. market. Using technology that has been in use for over 30 years will be both safe and environmentally sound.

The introduction of the NEF will help to diversify the region's current economic base, which today relies primarily on energy and extractive industries such as oil and gas production.

This project will create many new jobs. During the construction phase the estimated annual payroll will be \$170 million. Annual facility operations will involve approximately 210 new jobs with an annual pay estimation of \$10 million.

Creating new jobs will also provide opportunities for new housing construction, provision of services, and education. For the majority of positions, employees will be provided with the necessary skills through classroom and on-the-job training.

By providing economic diversity, new jobs, construction and a safe and environmentally sound project, this facility will be of great benefit to the good citizens of Lea County.

CHAIRMAN REC'D
04 SEP -8 AM 9:44

Dear Chairman Diaz,

I would like to offer my full support on the National Enrichment Facility that will be built in Lea County, New Mexico. This enrichment facility will be a domestic source of enriched uranium for our country's commercial nuclear power plants.

This establishment of 1.2 billion NEF in Lea County, NM will have a great and positive impact on the economies of New Mexico and west Texas Areas. These areas rely on primarily oil and gas production in which I feel that these jobs are decreasing due to large companies centrally locating there offices and headquarters to larger cities that will better suit there needs.

I have heard that this project will create 400 to 800 short term jobs for New Mexico construction workers and will employ 210 permanent jobs who will receive an annual pay of \$10 million and an estimated 3.1 million in annual benefits. That means great opportunities for new house construction and job services for surrounding communities that is desperately needed in this area of the country.

The National Enrichment Facility will be a great investment in America and to this region.

Sincerely,

John McLeod

Dear Chairman Diaz,

I would like to take this opportunity to endorse the National Enrichment Facility (NEF) and provide my support for their uranium enrichment plant. This facility will provide a sustainable domestic supply of "low enriched uranium" that is essential for fueling commercial nuclear power plants.

The state of New Mexico has a notable history as a hub of scientific research and development. The NEF is a strong supporter of the communities in Lea County and will provide many benefits such as:

- Create many job opportunities, short and long term
- Diversify the region's current economic base
- Provide employees with necessary training

Louisiana Energy Services will continue to contribute to a wide range of organizations and help to boost the economy of the southeastern part of the state. They are a most welcome addition to New Mexico.

Dear Chairman Diaz,

I would like to take this opportunity to endorse the National Enrichment Facility (NEF) and provide my support for their uranium enrichment plant. This facility will provide a sustainable domestic supply of "low enriched uranium" that is essential for fueling commercial nuclear power plants.

The state of New Mexico has a notable history as a hub of scientific research and development. The NEF is a strong supporter of the communities in Lea County and will provide many benefits such as:

- Create many job opportunities, short and long term
- Diversify the region's current economic base
- Provide employees with necessary training

Louisiana Energy Services will continue to contribute to a wide range of organizations and help to boost the economy of the southeastern part of the state. They are a most welcome addition to New Mexico,

Sincerely,

Joann Arcidez

Dear Chairman Diaz,

I am taking this opportunity to provide my support of the new National Enrichment Facility (NEF) to be built in Lea County, NM. Louisiana Energy Services (LES) has proven to be supportive of Lea County and LES will provide many jobs and opportunities for the citizens of Lea County.

The NEF will use the world's most advanced, energy efficient and cost-effective uranium enrichment technology, a technology that has been in use for over 30 years, and will provide a clean and safe working environment.

The establishment of the NEF will have a positive impact on the community providing benefits such as:

- Construction opportunities
- New jobs
- An estimated annual pay of \$10M
- \$3.1M in annual benefits

The people of Lea County care deeply about their future and I think you will agree that this new facility will have a positive impact on Lea County as well as the State of New Mexico.

Dear Chairman Diaz,

The residents of Lea County, New Mexico, are fortunate to have the opportunity for the National Enrichment Facility to be built in their area. The establishment of the \$1.2 billion gas centrifuge uranium enrichment facility will have a positive economic impact on the southeastern New Mexico and west Texas communities. Therefore, I support this project 100 percent.

The National Enrichment Facility will be using the world's most advanced, energy-efficient and cost effective technology, a technology that has been in use for over 30 years, and will prove to be both safe and environmentally sound. Nuclear energy supplies approximately 20 percent of the nation's electricity and is the second greatest source of electricity after coal. This facility will provide a sustainable domestic supply of low enriched uranium, thereby substantially reducing the United States relying on the global nuclear fuel marketplace. This will encourage competition within the U.S. market.

This project will create many new jobs that will involve approximately 210 permanent employees with an estimated annual pay of \$10 million and an estimated \$3.1 million in annual benefits.

The citizens of Lea County will greatly benefit from this project and I support it fully.

Sincerely,

Randy Gladden

Dear Chairman Diaz,

This letter is being sent to you to show my support of the National Enrichment Facility building their gas centrifuge uranium enrichment facility in southeastern New Mexico. The introduction of this facility into Lea County, New Mexico will have positive economic impacts and will help to diversify the region's current economic base, which today relies primarily on energy and extractive industries such as oil and gas production.

The National Enrichment Facility will use the world's most advanced technology that has been in use for over 30 years. It has proven to be both safe and environmentally sound. The facility will provide a sustainable domestic supply of low enriched uranium, thereby substantially reducing the United States reliance on the global nuclear fuel marketplace and thereby encouraging competition within the U.S. market.

With the creation of 400 to 800 temporary construction jobs and over 200 permanent jobs there will be opportunities for new housing construction, provision of services and education. LES will provide employees with the necessary skills through classroom instruction and on-the-job training. Total payroll during construction is estimated to be \$170 million and annual facility operations will involve an estimated annual pay of \$10 million.

The citizens welcome the National Enrichment Facility to New Mexico and as I do, totally support the project.

Sincerely,

04 SEP -8 AM 9:43

Dear Chairman Diaz,

The introduction of the National Enrichment Facility to Lea County, New Mexico will make a positive economic impact on the region's current economic base, which today relies primarily on energy and extractive industries such as oil and gas production. This project will create 400 – 800 short term construction jobs and over 200 permanent jobs. The creation of the new jobs will provide an estimated annual pay of \$10 million and also provide opportunities for new housing development, provision of services and education.

This new gas centrifuge uranium enrichment facility will not only be safe and environmentally sound, but will enable the United States to have a domestic source of enriched uranium for the country's commercial nuclear power plants. Nuclear energy supplies approximately 20 percent of U.S. electricity and is the second greatest source of the nation's electricity after coal. The National Enrichment Facility will provide a sustainable domestic supply of low enriched uranium substantially reducing the United States reliance on the global nuclear fuel marketplace.

For these reasons, I whole heartedly support the new enrichment facility to be built in Lea County, New Mexico. The NEF has proven to be a good corporate citizen by contributing to a wide range of organizations for the benefit of the people of southeastern New Mexico.

Sincerely,

CC: Governor Bill Richardson
Secretary Ron Curry

Dear Chairman Diaz,

I would like to endorse the plans for the National Enrichment Facility to locate a new gas centrifuge uranium enrichment plant in Lea County, NM. This facility will use the world's most advanced, energy-efficient and cost effective technology, a technology that has been in use for over 30 years. This facility will be both safe and economically sound.

This facility will have many positive aspects:

- Economic diversity
- Creation of new jobs
- Training and education
- Community growth

The building of the National Enrichment Facility will bring pride and hope to the citizens of southeastern New Mexico and will be a welcome addition to New Mexico.

Sincerely,

Patricia Henson

Dear Chairman Diaz,

I whole heartedly support the establishment of the National Enrichment Facility (NEF) building a new gas centrifuge uranium enrichment plant in Lea County, NM. using the world's most advanced, energy-efficient and cost effective technology.

This new facility will bring a positive economic impact to the community by:

- Providing new jobs
- Education and training
- Construction opportunities
- Corporate contributions to local organizations

The National Enrichment Facility will be both safe and environmentally sound along with providing the United States a domestic source of enriched uranium for commercial nuclear power plants. They are most welcome to the residents of Lea County.

04 SEP -8 AM 9:40

Dear Chairman Diaz,

I whole heartedly support the establishment of the National Enrichment Facility (NEF) building a new gas centrifuge uranium enrichment plant in Lea County, NM. using the world's most advanced, energy-efficient and cost effective technology.

This new facility will bring a positive economic impact to the community by:

- Providing new jobs
- Education and training
- Construction opportunities
- Corporate contributions to local organizations

The National Enrichment Facility will be both safe and environmentally sound along with providing the United States a domestic source of enriched uranium for commercial nuclear power plants. They are most welcome to the residents of Lea County.

Sincerely,

Carolyn Duran

CHAIRMAN REC'D
04 SEP -8 AM 9:51

Dear Chairman Diaz,

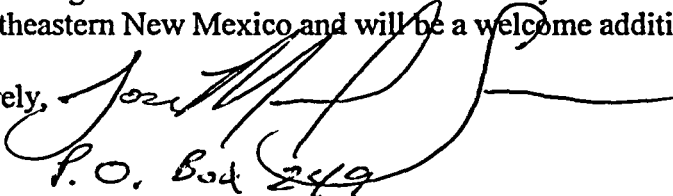

I would like to endorse the plans for the National Enrichment Facility to locate a new gas centrifuge uranium enrichment plant in Lea County, NM. This facility will use the world's most advanced, energy-efficient and cost effective technology, a technology that has been in use for over 30 years. This facility will be both safe and economically sound.

This facility will have many positive aspects:

- Economic diversity
- Creation of new jobs
- Training and education
- Community growth

The building of the National Enrichment Facility will bring pride and hope to the citizens of southeastern New Mexico and will be a welcome addition to New Mexico.

Sincerely,

P.O. Box 249
