

DRAFT OUTLINE COMMENTS

Administrative JPMs

- Radiation control topic involving entry and exit from the RCA for both the RO and SRO is too simple and should not be used. **Resolution: The JPM will be more challenging because the entry will involve an additional entry into a high radiation area.**

Walk-throughs

- What walk-throughs will be performed together? **ANS: JPMs 6, 7, and 8 and JPMs 2 and 3 will be performed simultaneously.**
- Any repeat use of previous NRC exam material? If so how much (in percentage) is the repeat? **ANS: One JPM, #200-08, is the only part of the exam that is repeated from the last NRC exam.**

Scenarios

- _____ Identify the actual attributes given on ES-301-4
- Form ES-301-5, Scenario 1, RO: The BOP does not have a normal evolution and the RO number 4 for Instrument/component should be number 5. **Resolution: Will make changes to the ES-301-5 forms.**
- Form ES-301-5, Scenario 1, SRO-I: As RO, the number 4 for instrument/component should be number 5. **Resolution: Will make changes to the ES-301-5 forms.**
- I would like each specific applicant to have their own ES-301-5.

Written

- Please include the KA description on the reference written exam.
- For K/As that require the use of procedures, be sure that the question references a procedure.
- Need a cross-reference between the outline subject and the question developed to address this subject. **Resolution: A cross reference will be developed.**
- Record of rejected KAs, SRO Page 1 5th table entry, why rejected? **ANS: Agree, the KA should not be rejected. Will develop a question for this KA.**

General

- Would like a separate listing of the PRA and IPE insights (ES 201-2 item 4a).
- Any repeats from the audit examination (ES 201-2, item 3a(3))? **ANS: No**

- Which W/T JPM meets the response to the emergency or abnormal condition (ES 201-2, item 3b(3))? **ANS: In-plant walk-throughs 1 and 2.**
- Is any SROU going to take only the 25 question test? **ANS: No**
