SUBJECT: WOLF CREEK GENERATING STATION – WITHDRAWAL OF DEFENSE-IN-DEPTH AND DIVERSITY ASSESSMENT FOR DIGITAL UPGRADE OF INSTRUMENTATION AND CONTROL SYSTEMS (TAC NO. MC2286)

Dear Mr. Muench:

By letter dated March 3, 2004 (WO 04-0002), you submitted a defense-in-depth and diversity (D³) assessment for the Framatome Advanced Nuclear Power (FANP) TELEPERM XS system to be installed in the Wolf Creek Generating Station (WCGS). The D³ assessment was submitted in a proprietary and a non-proprietary version. The FANP TELEPERM XS system was to replace the current analog-based instrumentation and control (I&C) systems, including the reactor trip system and engineered safety features actuation systems, with a digital-based system, and the D³ assessment was to support license amendment requests for the planned I&C system replacements at WCGS. This D³ assessment was submitted jointly with the Union Electric Company, and review of this D³ assessment was requested by December 1, 2004.

A meeting that included representatives of the Union Electric Company was held on April 15, 2004, in which the NRC staff recommended that your staff consider submitting an alternative to the D³ assessment if approval was needed by December 1, 2004. The meeting summary was issued by the NRC on April 22, 2004. A letter accepting the proprietary information submitted in the letter of March 3, 2004, was issued by the NRC on April 22, 2004.

In the letter of October 13, 2004 (WM 04-0042), your staff stated that, based in part on the discussion in the April 15, 2004, meeting, it has decided to withdraw the D³ assessment. In addition, the implementation schedule for the FANP TELEPERM XS modifications at WCGS has been postponed. Based on the letter of October 13, 2004, we have closed out our review of the D³ assessment of the FANP TELEPERM XS system and TAC No. MC2286 is closed.

Sincerely,

/RA/
