Subject: statement on ---Licensing of the proposed LES uranium enrichment plant in Lea
County-

I believe the Les plant emissions will get into the loose topsoil we have in this area. Successive seasonal high winds that blow from the south that we have in this area will carry the loose radioactive soil over Hobbs. Winds also blow to the west in this area. Eunice will get contaminated soils also. Pathway for emissions from the Les plant to humans will be the sandstorms. I believe the licensing of this uranium enrichment plant poses a long term health risk to over 30,000 people.

Phillip Barr
Lea County, New Mexico

You legal guys should save this one for future reference
