Serial No. 03-312A  
NL&OS/ETS R0  
Docket No. 50-280  
License No. DPR-32

**VIRGINIA ELECTRIC AND POWER COMPANY**  
**SURRY POWER STATION UNIT 1**  
**REQUEST TO USE SUBSEQUENT EDITION AND ADDENDA OF ASME SECTION XI**  
**FOR QUALIFICATION OF EXAMINATION PERSONNEL FOR CONTAINMENT**  
**INSPECTION PROGRAM**

In a May 6, 2003 letter (Serial No. 03-312), Virginia Electric And Power Company (Dominion) requested approval to use the 1998 Edition through the 2000 Addenda of ASME Section XI, subsection IWA-2300, including references CP-189, 1995 Edition, Appendix VI and Appendix VII and any associated rule modification and limitation, to establish the examiner qualification requirements. This request was for the North Anna Units 1 & 2, Surry Unit 2 ISI programs and the Surry and North Anna containment inspection programs. Since Surry Unit 1 will be entering its fourth inspection interval on October 14, 2003 using the 1998 Edition through the 2000 Addenda of ASME Section XI, this Code edition forms the basis for the qualification requirements. Although the request included Surry Unit 1 for the containment inspection program examiner qualifications, the letter did not specifically identify the Surry Unit 1 docket number. This letter corrects that administrative omission and specifically requests use of the above mentioned ASME Code examiner qualification requirements for the containment inspection program for the remainder of the Surry Unit 1 containment inspection interval.

Very truly yours,

C. L. Funderburk  
Director – Nuclear Licensing and Operations Support
