Date: Sun, Nov 21, 2004 8:30 PM  
Subject: Nuclear Security Concerns

DOCKETED  
USNRC

November 22, 2004 (7:53am)

OFFICE OF SECRETARY  
RULEMAKINGS AND  
ADJUDICATIONS STAFF

After much study and reflection I am moved to write and strongly urge you to Urgently Upgrade Nuclear Security Requirements. Our nuclear plants, particularly the spent fuel storage pools, are not secure from terrorist attacks. This has been proven in simulated drills which the agency conducted and has chosen not to deal with but instead has chosen to proceed with business as usual. In addition air attacks on a nuclear facility would be devastating but could be averted by installing proposed barriers. The health and public safety of the American people, future generations and the rest of the world (in the event of a major contamination leak) are in your hands. You must examine your conscience and proceed wisely on these issues while serving the general public and the environment before the special interests of the nuclear industry. Thank you for your time. Sincerely, Peter Bock M.D. Eudora, KS.
