RE: Questions discussed during phone conversation of 11/9/2004 regarding
PET of America

Dear Mr. Ragland:

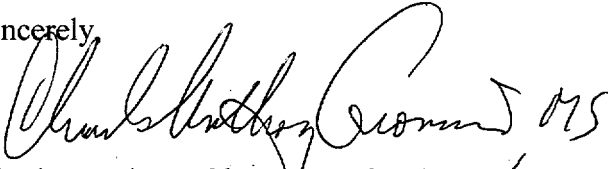

This letter is a follow up to our telephone conversation of Tuesday, November 9, 2004 regarding the mobile PET coach owned by PET of America. At that time, there were 3 issues that you wanted clarification. Please allow the following paragraphs to assist.

1. The mobile coach is locked at all times unless the technical staff is present and working within the coach. It is locked in the event that they leave during working hours to go to lunch or enter the hospital they are servicing.
2. The keys will be given to the driver of the tractor, lead technologist, and supplier of radioactive materials (radiopharmacy).
2. The home base will be:
St. Francis Medical Center
601 Hamilton Ave.
Trenton, New Jersey 08629

All records will be maintained on the coach for review. Periodically, they will be removed and brought to 178 Bergen Blvd. Fairview, New Jersey 07022. We may elect to change the home base for this coach at which time, we will notify the NRC of doing so.

Should you have any questions regarding this application, please feel free to contact me for assistance.

Sincerely,

Charles Anthony Giomuso, MS, MBA
Radiation Safety Officer to PET of America
