NRC RESTORES ONLINE AVAILABILITY OF LARGE NUMBER OF REACTOR-RELATED DOCUMENTS

In a continuation of restoring public access to documents on its Web site, the Nuclear Regulatory Commission has returned a large number of reactor-related documents to its online public library, ADAMS.

The documents are now available from ADAMS by using the CITRIX access to the NRC electronic reading room site, available at <http://www.nrc.gov/reading-rm/adams.html>. Users should click on "CITRIX" and follow the instructions for loading this software program. Help in using ADAMS through CITRIX is available by contacting the NRC Public Document Room by phone at 1/800-397-4209 or 301-415-4737, or by e-mail to PDR@nrc.gov.

The restoration includes power, research and test reactor documents that were formerly accessible through ADAMS and deemed non-sensitive as a result of the NRC's review. This action restores a large portion of documents that were removed on Oct. 25 for a security review. The remaining non-docket-related and non-reactor documents are being screened through a security review to identify documents that contain sensitive information.
