AMENDMENT, CONTROL NO. 135663

Dear Dr. Spath:

This refers to your license amendment request dated September 2, 2004. Enclosed with this letter is the amended license. Please note that we have authorized Dr. Kagaoan to perform procedures permitted by 10 CFR 35.100 and 35.200 only. Although you requested Dr. Kagaoan to perform procedures permitted by 35.300, this use is not currently authorized on your license.

Please review the enclosed document carefully and be sure that you understand and fully implement all the conditions incorporated into the amended license.

Please note the last condition on your license indicates that, "This license condition applies only to those procedures that are required to be submitted in accordance with the regulations." Therefore, any procedures submitted that were not required by regulation to be submitted, e.g., calibration of dose calibrators, will not be considered a part of your license and were not reviewed during the licensing process. These procedures will be reviewed during inspections, as necessary. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region I Office, Licensing Assistance Team, (610) 337-5239, so that we can provide appropriate corrections and answers.

*An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(14).*
