Subject: Request for additional information			
<p>Summary:</p> <p>The amendment requests submitted to change the RSO and add one location and delete another location did not include the appropriate supporting documentation. An appropriate member of management is needed to request the change of RSO. Documentation is needed which describes the experience of the proposed RSO and a verification of training such as a certificate. Current leak test records are required and a signed statement confirming that no past leak tests have indicated positive results.</p> <p>I spoke with Mike Dudley and he stated that he would send a letter requesting the change of RSO. He also stated that he would send the proposed RSO experience and training records as well as the most recent leak test results. In the letter requesting the change of RSO he will also include a statement confirming that no leak tests have indicated positive results.</p>
