NRC MEETING WITH PSEG NUCLEAR DEC. 17 CONCERNING HOPE CREEK MAINTENANCE ISSUES

Nuclear Regulatory Commission staff and managers will meet with representatives of PSEG Nuclear, LLC on Dec. 17 at NRC Headquarters in Rockville, Md., to discuss the Hope Creek nuclear power plant in southern New Jersey.

The meeting will focus on high vibrations in a pump at Hope Creek and how PSEG is planning to ensure the pump doesn't affect the plant's safe operation, as well as damage to a turbine exhaust discovered during the plant's current refueling outage. The meeting will run from 10:00 a.m. to 3:00 p.m. in Room T7A1 of the agency's Two White Flint North Building, at 11545 Rockville Pike.

The public is invited to observe the meeting and will have an opportunity to talk with NRC staff after the business portion, but before the meeting is adjourned. Those interested in participating by telephone should call 888-455-0045. The passcode for the teleconference is "Hope Creek", and several dozen lines have been reserved for this meeting.
