### **Fire Safety**

Date and Time: 10:00 AM; June 30, 2004

Call Participants:	R. Wescott/NRC	B. Smith/NRC
	T.C. Johnson/NRC	R. Krich/LES
	D. Green/LES	S. Tyler/LES
	D. Williamson/LES	

### **Text removed under 10 CFR 2.390.**

RAIs ISA-35 and FS-2 address hydrogen sources in the battery rooms and in the laboratory. NRC staff asked what subsections of National Fire Protection Association Standard NFPA 70E and American National Standards Institute Standard ANSI C2 would be used. These standards cover many areas and additional detail is needed to assess the actual programs LES will use. LES agreed to define the subsections in these standards that will be used.

RAI ISA-58 refers to enhanced administrative controls. NRC staff asked if an enhanced administrative control is still applicable to IROFS36. NRC staff also indicated that it is unclear how the index value for enhanced administrative controls for IROFS36 is justified. LES staff indicated that IROFS36 consists of several components and an index value of -3 is still appropriate. LES staff indicated that it will revise the IROFS36 scenario to clearly show its basis.
