Ms. Shirley Ann Jackson

Chair

Nuclear Regulatory Commission

11555 Rockville Pike

Rockville, MD 20852

Dear Ms. Jackson:

I am currently a Senior in High School. As a young boy I was often astounded by the great amount of energy behind nuclear power, especially weapons. I am writing to you in hopes that you may be able to explain how you regulate the transfer and containment of our nuclear weapons and generators.

I have come to the understanding that nuclear power may be difficult to control when its power is harnessed. I would like to know why our country is interested in creating these devices. I would also like to know more specifics about the NRC and how it operates.

As an American, how then does the NRC affect my everyday life? What would the NRC do if a nuclear device turned up missing?

I would truly appreciate your response to the questions I have raised. I am very interested in the NRC and would like to receive some additional information about the agency. Thanks again for your time and efforts.

Sincerely,

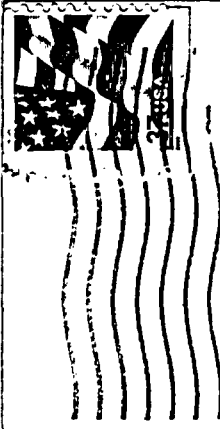

Eric Goff
