Subject: decommission/termination			
<p>Summary:</p> <p>I confirmed with the RSO that the licensee still wished to terminate their license. I was told the last time they had received a Mo99/Tc99 generator was the end of November and that they had stopped their use of RAM.</p> <p>I discussed with the RSO what information they needed to send in; items listed in NUREG 1757, vol. 1, 8.2. The license stated they would have their consultant physicist perform the FSS within the next month and would send in all the required documentation.</p>
